19. Power

Energy for supplying mechanical power, heat, light and refrigeration for the complex machinery and processes necessary to maintain productivity and comfort in the United States is derived primarily from coal, oil, water, natural gas, wood and waste, wind, certain basic chemical and physical reactions, and the rays of the sun. Of these an increasing percentage of the coal, oil, water, and gas are being converted to electric energy for application to the energy requirements of our economic system. In 1950 approximately 23 percent of the coal, 8 percent of the oil, practically all of the water power, and 11 percent of the natural gas were consumed in the production of electric energy.

Statistics on these various sources of energy are compiled by numerous agencies but only a few of the series are reasonably complete or arranged to avoid duplication in a manner that permits ready computation of total energy requirements. Oil, coal, natural gas, and wood yield many products as well as power and, consequently, enter into many statistical series.

Data on coal, oil, and natural gas production, utilization, and related subjects are compiled annually by the Bureau of Mines and are published in the *Minerals Yearbook*. For summaries of statistical material from this source, see section 28, Mining and Mineral Products. Data on natural gas utilization and the production of manufactured gas from coal, oil, and related products, its utilization, and related statistics are published by the American Gas Association in its monthly bulletins and annual statistical numbers. Annual summary data are included in this section.

Data on the production of electric energy by type of prime mover and showing the quantities of basic fuels—coal, oil, natural gas, and others—used in production, and the capacity of all generating plants by type of prime mover and related statistics are compiled and published annually by the Federal Power Commission. These data cover both generation for public use by electric utilities and for use by the producer where generated by non-utility establishments. Data on sales, revenues, and customers by classes of service, on rates and typical bills, and related matters are also published by the Commission. Monthly statistics on production, fuels used in production, sales by classes of service, salaries and wages, taxes, and other costs are also published and distributed by the Federal Power Commission in a loose-leaf current data series known as *Electric Power Statistics*. Statistics on the distribution of electric energy by utilities for public use are presented monthly and annually by the Edison Electric Institute in its *Statistical Bulletins*. Summaries of these statistics appear in the following tables.

Data on the use of power by manufacturing, extracting, and related industries are issued from time to time by the Bureau of the Census in its Censuses of Manufactures and Mineral Industries. Statistics based on these studies appear in the sections on manufacturing and mineral industries in this *Abstract*.

Over-all statistics on water as an actual and potential source of power are compiled by the Federal Power Commission and are shown in table 605.

The Bureau of the Census in the Census of Electrical Industries compiled at five-year intervals beginning in 1902 a report on the Electric Light and Power Industry. The last survey made was for the year 1937. Summary statistics from this report are shown in table 593.

Data in this section relate to continental United States except as indicated.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series G 159-170") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

Note.—This section presents data for the most recent year or period available on April 22, 1953, when the material was organized and sent to the printer.

FIG. XXXVI.—INSTALLED CAPACITY OF ELECTRIC UTILITY GENERATING PLANTS: 1920 TO 1952

[See table 500]

Source: Federal Power Commission.

Vo. 588.—ENERGY FROM MINERAL FUELS AND WATER POWER—ANNUAL SUPPLY: 1889 to 1951

In trillions of British thermal units. Unit heat values employed are: Anthracite, 12,700 B. t. u. per pound; bituminous coal and lignite, 13,100 B. t. u. per pound; petroleum, 5,800,000 B. t. u. per barrel; natural gas, 1,075 B. t. u. per cubic foot. Water power includes installations owned by manufacturing plants and mines, as well as Government- and privately-owned public utilities. Fuel equivalent of water power calculated from kilowatt-hours of power produced wherever available, as is true of all public-utility plants since 1919. Otherwise, fuel equivalent calculated from reported horsepower of installed water wheels, assuming capacity factor of 20 percent for factories and mines and of 40 percent for public utilities. See also *Historical Statistics*, series G 159-170]

YEAR	Total energy	Water power ¹	MINERAL FUELS

Internal combustion					641	630	770	843
Hydro as percent of total					7.7	7.5	7.2	7.0

¹ Industrial classification comprises production and capacity of approximately 3,338 industrial electric power plants of 100 kilowatts and over in 1951, including amounts for stationary electric power plants of railroads and railways.

² Each prime mover type in combination plants counted separately.

³ Based on capacity in service at end of year.

No. 593.—ELECTRIC LIGHT AND POWER INDUSTRY—SUMMARY: 1902 TO 1937

[Figures cover all establishments engaged either in generation and distribution of electric energy, or distribution or transmission of electric energy, to public or private consumers. Excludes establishments which consume all current generated, such as manufacturing and mining companies, railroads, railways, hotels, and other enterprises not in nature of public utilities, unless a portion of generated output was sold commercially. Plants operated by Federal Government or by States excluded unless energy sold commercially.]

ITEM	1902	1912	1917	1922	1927	1932	1937
Number of reporting establishments, ¹ total	3,620	5,221	6,542	6,355	4,335	3,429	3,501
Generating all or part of current	(2)	4,646	5,124	4,389	2,331	1,788	1,812
Distributing or transmitting only	(2)	575	1,418	1,966	2,004	1,641	1,689
Number of separate generating stations	(2)	(2)	5,952	5,444	4,801	4,339	4,027
Prime movers, hp. (thousands)	1,845	7,530	12,937	19,851	35,710	47,967	50,220
Steam engines	1,394	1,895	1,702	1,371	994	649	712
Steam turbines		3,054	6,747	12,355	24,323	32,904	33,177
Internal-combustion engines	12	111	210	303	548	881	1,101
Hydroturbines and water wheels	439	2,469	4,277	5,822	9,844	13,532	15,230
Generators, rated kilowatt capacity (thousands)	1,212	5,165	8,994	14,313	25,811	34,623	36,481
Output, ⁴ kilowatt-hours (millions)	14,183	31,044	50,274	96,829	111,716	168,300	168,300
Reported as generated	2,507	11,569	25,438	40,292	74,686	79,057	121,097
Reported as purchased or received from other sources	(2)	2,614	5,606	9,983	22,142	32,058	47,202
Number of customers (thousands)	(2)	3,838	7,179	12,710	21,790	23,802	27,219
Revenue from elec. service (\$1,000)	\$84,187	\$287,139	\$502,060	\$1,020,439	\$1,802,655	\$1,075,304	\$2,356,513
Sales, kilowatt-hours (millions)	(2)	(2)	25,752	41,965	79,011	88,265	132,930
Distribution for other purposes (non-revenue), kilowatt-hours (millions)	(2)	(2)	(2)	(2)	17,817	23,451	35,370
Operating expenses, (\$1,000)	(2)	(2)	(2)	553,068	750,484	803,100	1,042,193
Value of electric utility plant (\$1,000,000)	505	2,176	3,060	4,465	9,297	12,664	12,941
Employees, number	30,326	79,335	103,541	150,762	251,020	244,573	281,335
Salaries and wages (\$1,000)	20,647	61,162	95,242	212,433	307,632	323,880	470,353

¹ The term "establishment" as here used may represent a single electric station (either generating or distributing or both) or a number of such stations operated under the same ownership. ² Not available.

³ Comprises 1,112 stations operated by steam; 1,283 by internal-combustion; 1,426 by water; and 206 composite (stations having more than 1 type of prime mover).

⁴ Comprises generated output and energy purchased and received from other sources. Since the energy "Received from other sources" was, in a large part, purchased from other electric light and power companies, a considerable duplication is involved, as such energy would also be included in the "Generated."

⁵ Includes "Estimated value of free service."

⁶ Includes cost of fuel purchased and interchanged power, maintenance and other operating expenses.

⁷ Reported by commercial establishments only. No data for municipal establishments.

⁸ Includes value of plant and equipment, \$902,000,000, owned by companies engaged in the operation of electric light and power plants and other public utilities, not distributed among the several utilities.

⁹ Not comparable with other years; includes only salaries and wages chargeable to electric operating service.

Source: Department of Commerce, Bureau of the Census; Census of Electrical Industries, report on Electric Light and Power Industry. Survey discontinued.

No. 594.—ELECTRIC LIGHT AND POWER INDUSTRY—ENERGY GENERATED, SALES, REVENUE, AND CUSTOMERS: 1930 TO 1952

[Figures for energy generated obtained by Edison Electric Institute from Federal Power Commission. Figures for sales, revenue, and customers for 1930 and 1935 not strictly comparable with those for 1940 and subsequent years due to change in classification of sales. See also *Historical Statistics*, series G 225-233.]

Revenue per kilowatt-hour (cents)	1.66	1.95	2.09	1.79	1.91	1.72	1.79

¹ Beginning 1950, data reflect change in Census definition of farm, which tends to decrease number of farms.² Census figures; relate to Apr. 1 for 1930, 1940, and 1950 and Jan. 1 for 1952.³ Represents cooperatives only and excludes customers of all other agencies (companies and municipals) financed in whole or in part by REA.⁴ Customers served by municipal systems and various power districts not financed by REA.⁵ "Eastern farms" are those located in the area not affected by heavy irrigation pumping and their statistics are a measure of use of electricity on the average farm. "Western farms" are those where irrigation may be involved. Possibly less than one-fifth of farms in irrigation States do actual pumping, but statistics are not available to make a more accurate separation. Figures for "Western farms," therefore, are more a reflection of fluctuation in the energy used than they are of the conventional farm requirements.

for gas production	58	34	58	113	147	172	185	192	227

Includes fuel used in production of manufactured gas during periods of peak demand or emergency only, for in systems regularly distributing natural gas.

Oven and retort charge.

Less than 500 tons.

Includes 10,000 tons used as oven and retort charge in 1947, 7,000 tons in 1948, 5,000 tons in 1949, 7,000 tons in 1950, and 4,000 tons in 1951.

Includes 500,000 gallons used as bench and producer fuel.

20. Roads and Motor Vehicles

Public roads.—Federal Government statistics on public roads are compiled and published by the Bureau of Public Roads of the Department of Commerce. Since 1945, such data have been published annually in *Highway Statistics*. For statistics prior to 1945, the same Bureau's publication, *Highway Statistics, Summary to 1945*, shows available public roads data carried back over periods ranging from 20 to 50 years.

The first road mileage survey was made in 1904. Other road mileage surveys were made in 1909, 1914, and 1921. Data for these surveys appear in Department of Agriculture, Bulletin 1279, *Rural Highway Mileage, Income, and Expenditures, 1921-1922*.

The term "rural" as used here may be roughly defined as the area which lies outside of communities having 2,500 inhabitants or more. The data shown here, which are compiled on the basis of individual reports from the different States, are largely consistent with this definition of "rural." "Urban extensions" are continuations of designated State-system roads in or through cities or towns of 2,500 inhabitants or more. "County and other local roads" are rural roads over which the State exercises no direct control.

Motor vehicles and fuel.—Motor-vehicle production data are compiled by the Automobile Manufacturers Association and published in the annual report, *Automobile Facts and Figures*. The Bureau of the Census compiles and publishes statistics on the motor-vehicles and equipment industry which are published in the Census of Manufactures reports and are also included in section 30, Manufactures, in this volume.

Motor-vehicle registration figures are based on reports and records of State motor-vehicle registration departments. The statistics are compiled and published by the Bureau of Public Roads in the annual report, *Highway Statistics*. The same report also includes statistics on motor fuel consumption.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series K 177-181") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

Note.—This section presents data for the most recent year or period available on April 22, 1953, when the material was organized and sent to the printer.

No. 606.—RURAL ROADS IN THE UNITED STATES—APPROXIMATE MILEAGE: 1921 to 1951

[In thousands of miles. Rural roads include roads outside of incorporated areas and certain of the more populous unincorporated areas. Figures cover continental U. S. and refer to existing mileage at end of calendar year. See also *Historical Statistics*, series K 177-181]

¹ type includes soil surfaced; slag, gravel, or stone; bituminous surfaced treated; and mixed bituminous bituminous penetration (nonrigid base). High type includes mixed bituminous and bituminous penetration base; bituminous concrete and sheet asphalt; Portland cement concrete; brick; and block.

includes only mileage of roads not forming a part of State or local highway systems.

includes 8,217 miles of State park, forest, institutional, and other roads, rural and urban, that are not part of or local highway systems.

includes county roads under State control in Alabama (3 counties), Delaware, North Carolina, Virginia (all counties), and West Virginia. Also in Virginia, includes mileage maintained by State in incorporated of less than 3,500 population.

1 No segregation of secondary State highways from primary systems in 1930; figures shown include an undetermined amount of municipal street mileage on State systems or connecting these systems. Not strictly comparable with subsequent years, since county road mileage had not yet been taken over by State highway departments.

2 Not available.

3 Mileage formerly shown as "Connecting streets not under State control," now included with "Urban extensions of State highway systems," with exception of mileage in Kentucky, Maryland, Mississippi, and District of Columbia. These mileages reclassified as local city streets.

4 Low type includes soil-surfaced; slag, gravel, or stone; bituminous surface-treated; and mixed bituminous surfaces. High type includes bituminous penetration; bituminous concrete and sheet asphalt; Portland cement concrete; brick; and block.

5 Beginning 1950, mixed bituminous and bituminous penetration on "nonrigid base" shown as low type and surfacing on "rigid base" included as high-type mileage.

6 Mileage of State park, forest, institutional, toll, and other roads under State control not previously included.

7 Prior to 1940, represents State-controlled only.

8 Includes funds transferred to or from local units and proceeds of highway-user imposts allotted by the State treasurer for (1) county and other local roads and streets, and for (2) nonhighway purposes.

9 Available funds include accumulated reserves.

10 Includes estimated highway transactions of Port of New York Authority.

No. 610.—DISBURSEMENTS OF STATE-HIGHWAY FUNDS, BY STATES: 1921 TO 1951

[Includes disbursements, whether from current revenues or proceeds of loans, for construction, maintenance, interest and principal payments on highway bonds, transfers to local units, and miscellaneous disbursements. Beginning 1935 covers calendar years; figures for earlier years for many States represent fiscal years. Revised to include proceeds of highway-user imposts allotted, without passing through State highway departments, by State treasurer for (1) county and other local roads and streets and for (2) nonhighway purposes for all years]

[In thousands of dollars]

¹ Balances from 1950, totaling \$1,513,886,000, and miscellaneous revenues, totaling \$235,426,000.

² Includes disbursements not shown separately and not elsewhere included: For collection and administration of highway-user revenues, \$111,711,000; for nonhighway purposes, \$274,067,000.

³ Includes some administration, engineering, and miscellaneous disbursements.

⁴ Disbursements for administration, engineering, and miscellaneous: State highway police and safety; bond interest; and bond retirement.

⁵ Includes estimated highway transactions of Port of New York Authority.

⁶ Expenditures on county roads under State control included with those for State-administered highways.

¹ Includes buses. A substantial part of the trucks and buses reported comprises chassis without body; hence value of bodies for these chassis not included. ² Includes military trucks; total sales for the period Sept. 1, 1939, through 1946, amounted to 2,575,000, valued at \$5,257,588,000. ³ Production for the period Jan. 1, 1940, through 1946 was 2,601,000. ⁴ Beginning 1937, represents standard equipment.

⁵ Prior to 1925, buses included with passenger cars.

⁶ Less than 500.

21. Transportation, Air and Land

Steam railways.—Because of the long period in which it has been subject to close Federal regulation and the degree of its consolidation, there is an extensive coverage of important statistical items relating to the railway industry. The *Statistics of Railways in the United States*, published annually by the Interstate Commerce Commission since 1888, is the most important source for steam railway statistics. Various other periodical reports are also issued by the Interstate Commerce Commission. The Association of American Railroads supplements official railway statistics with various releases.

The term "steam railways" as used in this section includes electrified divisions operated by such carriers. The total steam railroad mileage of the United States comprises: (a) Regular interstate carriers (and their nonoperating subsidiaries) reporting to the Interstate Commerce Commission; (b) switching and terminal railroads, also reporting to the Commission; and (c) private railroads (defined by the Commission as "circular" because they report on brief circulars and as "unofficial"). Except in certain mileage data the circular and unofficial companies are not included in any of the statistics. The switching and terminal roads were formerly included with operating railways, but are now separated, and data for them do not appear in most of the tables.

Nonoperating subsidiaries include proprietary companies, which are covered by the reports of operating carriers, and lessor companies which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railways are divided into three classes, according to the amount of their annual operating revenues, class I, having more than \$1,000,000 of such revenue; class II, from \$100,000 to \$1,000,000; and class III, less than \$100,000. During recent years more detailed reports are required from class I carriers than from smaller companies. The basis of the figures in each table is indicated by notes. Omission of class II and class III railroads affects very little the comparability of statistics with those of earlier years as regards most items, since the bulk of the business is done by class I.

The Interstate Commerce Commission divides railroads geographically into three districts and eight subsidiary regions. Each railroad is treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern district includes territory east of Chicago and north of the Ohio and Potomac Rivers; southern district, territory east of the Mississippi River and south of the Ohio and Potomac Rivers; and western district, the remainder of the country.

Electric railways.—The Interstate Commerce Commission issues annually an abstract of the annual reports of electric railways, chiefly interurban, which report to it. The American Transit Association publishes street railway statistics in its annual *Transit Fact Book*. The Bureau of the Census has published a quinquennial report on electric railways from 1902 to 1937. In the more recent years the report also covered affiliated trolley-bus and motor-bus operations. The last Census of Electrical Industries was for the year 1937.

Motor carriers.—Statistics of class I for-hire carriers (those with \$100,000 or more of gross annual operating revenues) are compiled by the Interstate Commerce Commission from annual and quarterly reports submitted to it by these carriers. Beginning with reports for the year 1950, the class I minimum became \$200,000. This series begins with 1939 data.

The annual review and statistical number of *Bus Transportation*, a McGraw-Hill publication, summarizes operations of common carriers and school busses.

Civil aeronautics.—Federal promotion and regulation of civil aviation are carried out by two bodies—the Civil Aeronautics Administration and the Civil Aeronautics Board. The Civil Aeronautics Board is an independent agency concerned primarily with the issuance of certificates of public necessity, economic regulation, the formula-

Note.—This section presents data for the most recent year or period available on April 22, 1953, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

tion of safety regulations and the investigation of accidents to civil aircraft. The Civil Aeronautics Administration is an operating agency of the Department of Commerce. Its principal activities are the building and operation of air navigation aids, the enforcement of safety regulations and promotion of a national airport system.

The *Statistical Handbook of Civil Aviation* is published by the Civil Aeronautics Administration. This *Handbook* brings together all official statistical data on the development of civil aviation in the United States, including summaries of statistics published by the Civil Aeronautics Board. The Civil Aeronautics Administration has also published a detailed historical record of America's aircraft production during the recent war. This publication is entitled *U. S. Military Aircraft Acceptances, 1940-45—Aircraft, Engine, and Propeller Production*.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series K 28-33") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

¹ Includes circular and unofficial companies. ² Includes lessors, proprietary, circular, and unofficial companies.

³ For railways reporting track by class. Excludes circular and unofficial, figures for which cover road, first track only.

⁴ Includes switching and terminal companies except as noted.

⁵ Since 1916 represents steam locomotives and freight cars of class I railways, excluding switching and terminal companies.

⁶ Increase in investment over a period of years cannot be obtained accurately by subtraction of 1 year's investment from that of another owing to reorganization, sale, or abandonment reclassification, etc. Includes lessor companies since 1921; for 1925 and subsequent years, also includes proprietary companies except those which are part of systems filing consolidated annual reports.

⁷ Includes depreciation on "Miscellaneous physical property" for years prior to 1920. Amortization of defense projects included subsequent to 1940.

⁸ Includes actually outstanding, nominally issued, and nominally outstanding securities, and equipment obligations. ⁹ Average for 1908-1910. ¹⁰ Average for 1899 and 1900.

¹ Includes proprietary companies. Increase in investment over a period of years cannot be obtained accurately by subtraction of 1 year's investment from that of another owing to reorganization, sale or abandonment, reclassification, etc.

² Amortization of defense projects included subsequent to 1940.

³ Excludes returns for lessor companies.

⁴ Investment originally published is increased by \$170,000,000, estimated reserve for accrued depreciation, to make figures comparable with those of other years.

⁵ Figure not comparable on account of Federal control accounting requirements.

⁶ Excludes returns for class II and class III companies.

No. 644.—STEAM-RAILWAY ACCIDENTS—NUMBER OF PERSONS KILLED AND INJURED, BY STATUS: 1891 TO 1951

[For various reasons, including fact that returns were required under different acts, statistics are not strictly comparable. Prior to 1921, train accidents were those causing damage to railway property in excess of \$150 or any damage and a resulting casualty. From 1921 to 1947 they were considered as such when damage exceeded \$150 with or without a casualty; for 1948, accidents causing damages in excess of \$250, with or without a casualty, were classified as train accidents; for 1949 to 1950, train accidents were those causing damage of \$275 or more; for 1951, the damage limit was \$300. Where damage was less than the amounts specified and there was a reportable casualty it was classified as a train-service accident. Figures for years 1911-15 include industrial and other nontrain accidents to employees only, and for years 1908-10 exclude switching and terminal roads. Otherwise, data cover all reportable accidents, including those due to suicide, mental derangement, and attempting to escape custody. See also *Historical Statistics*, series K 84-93]

No. 647.—ELECTRIC RAILWAYS—SUMMARY: 1890 TO 1937

[The census of street railways, which was first taken in 1890, and which has been taken at quinquennial intervals through 1937 beginning with the inquiry for 1902, covers (1) all street railways, without regard to kind of motive power, and (2) all interurban railways using other than steam as motive power. The nonelectric railroads included are those operated principally by cable and gasoline engines. Operations of electrified divisions of steam-railway companies are not included. Figures in this table do not include data for motorbus and trolley-bus operations of electric street railways. (For motorbus and trolley-bus statistics from census reports, see source)]

ITEM	1890	1902	1912	1922	1927	1932	¹ 1937
Number of companies.....	789	987	1, 280	² 1, 200	³ 963	⁴ 706	⁵ 478

Operating ratio (percent).....	68. 4	57. 5	68. 7	71. 6	74. 9	78. 2	79. 1

¹ Excludes data for 22 companies, operating on a part-year basis. These companies reported 36,810,221 passengers; 9,108,009 car-miles; 1,042,866 car-hours; \$2,388,265, operating revenue; and \$2,412,010, operating expense.

² Includes certain companies in Pennsylvania which maintained separate organizations, though controlled through stock ownership by other companies. For 1912 these companies were treated as merged and not included in the number reported.

³ Includes small mileage of track lying outside United States.

⁴ Data incomplete. Some of the companies engaged in both light-and-power and electric-railway operations were unable to report separately the values of plant and equipment assignable to their railway activities.

⁵ Number reported as of June 30, for 1890, 1923, 1927, and 1932; for 1902, average for the year; for 1912, as of Sept. 16. Figures for 1937 represent an average of numbers reported on June 30 and Dec. 31.

⁶ Includes 334 trolley-bus operators.

⁷ Includes 29,721,000 trolley-bus passengers.

⁸ Includes auxiliary operating revenues of \$8,905,000 for 1927 and \$91,242,000 for 1922; auxiliary expenses, \$7,822,000 for 1927, and \$49,232,000 for 1922. Data for operating revenues and operating expenses of auxiliary operations excluded so far as possible for earlier years.

Source: Department of Commerce, Bureau of the Census; Census of Electrical Industries, report on Street Railways and Trolley-Bus and Motorbus Operations. Survey discontinued.

No. 650.—TRANSIT INDUSTRY—SUMMARY: 1930 TO 1951

[Represents entire transit industry comprising all organized local passenger transportation agencies except taxicabs and suburban railroads. Based on financial and statistical reports received by American Transit Association from transit companies representing 85 to 95 percent of the industry]

ITEM	1930	1935	1940	1945	1948	1949	1950	1951
Miles of route operated (Dec. 31):								
Electric railway—miles of single track	35,400	26,700	19,602	17,702	12,964	11,931	10,813	9,457
Surface	34,320	25,470	18,360	16,480	11,740	10,700	9,560	8,260
Subway and elevated	1,080	1,230	1,242	1,222	1,224	1,231	1,253	1,217
Trolley coach—miles of negative overhead wire	146	548	1,925	2,313	2,905	3,318	3,482	3,647
Motorbus—miles of route round trip	60,900	58,100	78,000	90,400	96,500	96,400	98,000	99,700
Passenger vehicles owned (Dec. 31), total	86,263	74,844	75,464	89,758	90,507	88,129	86,310	85,338
Electric railway cars	64,790	50,466	37,662	36,377	26,270	24,728	22,966	20,604
Surface	55,150	40,050	26,630	26,160	16,824	14,859	13,228	10,960
Subway and elevated	9,640	10,416	11,032	10,217	9,456	9,869	9,758	9,644
Trolley coaches	173	578	2,802	3,711	5,687	6,366	6,504	7,074
Motorbuses	21,300	23,800	35,000	49,670	58,540	57,035	56,820	57,660
Investment (Dec. 31), total (millions)	(¹)	(¹)	\$4,096	\$4,262	\$3,900	\$3,940	\$3,918	\$3,899
Electric railway	(¹)	(¹)	3,598	3,620	3,111	3,110	3,060	2,997
Surface	(¹)	(¹)	1,574	1,670	1,080	998	913	811
Subway and elevated	(¹)	(¹)	2,014	2,050	2,051	2,112	2,147	2,186
Trolley coach	(¹)	(¹)	88	76	118	137	144	162
Motorbus	(¹)	(¹)	480	566	671	693	714	740
Operating revenues, total (millions)	\$963	\$981	\$737	\$1,380	\$1,489	\$1,491	\$1,452	\$1,473
Electric railway	808	520	456	709	666	621	578	534
Surface	649	388	328	560	474	403	362	319

Compensation	25,475	31,672	28,023	31,550	35,546
Operating statistics and averages:					
Owned revenue vehicles, total	112,300	127,912	151,027	160,460	191,243
Trucks	20,727	22,233	25,232	28,038	28,990
Truck-tractors	36,308	41,582	48,935	54,202	61,060
Semitrailers	52,274	60,804	72,764	82,732	96,339
Full trailers	2,991	3,293	4,090	4,497	4,654
Intercity vehicle-miles (millions)	2,407	3,059	3,810	4,338	5,352
Tons of intercity revenue freight carried ⁷ (thousands)	112,268	135,426	165,828	176,452	212,997
Miles per owned vehicle	46,147	47,461	46,863	48,058	53,833
Revenue per vehicle-mile (intercity)	\$0.359	\$0.393	\$0.426	\$0.426	\$0.434
Expense per vehicle-mile (intercity) ⁸	\$0.354	\$0.384	\$0.408	\$0.414	\$0.414

¹ Amortization represents a very small part of this total.

² Does not include Federal or State income taxes.

³ Withdrawals of sole proprietors and partners.

⁴ Beginning 1948, excludes employees of Common Carriers of other than general freight and contract carriers as follows: 1948, 40,000; compensation \$138,759,000; 1949, 45,603; compensation \$165,600,000; 1950, 49,025; compensation \$195,966,000.

⁵ Does not include drivers of equipment engaged by these carriers to perform "purchased transportation."

⁶ Includes collection and delivery employees (subsequently included with drivers, etc.) as follows: 1946, 24,630; compensation, \$63,353,000; 1947, 29,090; compensation, \$83,370,000.

⁷ Includes duplications on account of tonnage received from connecting motor carriers.

⁸ Basic figures include expenses of operating vehicles in local services not available separately.

No. 653.—CLASS I INTERCITY MOTOR CARRIERS OF PASSENGERS—SUMMARY OF FINANCIAL AND OPERATING STATISTICS: 1946 TO 1950

[All money figures, except average fare and average revenue and expense per vehicle-mile, in thousands of dollars. Covers carriers with average annual operating revenues of \$200,000 or more in 1950, and for prior years \$100,000 or more, engaged wholly or preponderantly in intercity service subject to jurisdiction of Interstate Commerce Commission. This table does not include carriers subject to the Commission's jurisdiction engaged wholly or preponderantly in local or suburban service or carriers engaged in transportation of both property and passengers]

Special, charter, and sightseeing service (thousands).....	17,620	22,274	27,987	29,110	28,870
Local and suburban service ⁷ (thousands).....	60,708	55,732	50,760	48,760	41,936
Number of revenue passengers carried:					
Regular route intercity service (thousands).....	433,730	412,332	420,758	367,074	304,348
Special, charter, and sightseeing service (thousands).....	7,216	8,667	9,716	9,634	7,996
Local service (thousands).....	121,014	108,464	106,293	92,714	77,554
Miles per vehicle ⁸	77,677	76,655	72,533	66,088	65,411
Average fare per passenger, per carrier, intercity service.....	\$0.708	\$0.802	\$0.852	\$0.912	\$1.010
Passenger revenue per vehicle-mile:					
Regular route intercity.....	.359	.338	.341	.339	.346
Special, charter, and sightseeing services.....	.377	.377	.382	.390	.405
Local service.....	.315	.323	.376	.399	.406
Expense per vehicle-mile.....	.287	.296	.310	.324	.328

¹ Regular route intercity and local revenue.

² Amortization represents a very small part of this total.

³ Excludes Federal or State income taxes.

⁴ Withdrawals, small in amount, of sole proprietors and partners.

⁵ Total vehicles owned at close of year.

⁶ Includes bus-miles of vehicles operated under "purchased transportation arrangements."

⁷ Includes only service on local and suburban runs of preponderantly intercity carriers.

⁸ Averages for owned and leased vehicles.

**No. 655.—MOTORBUS LINES—SUMMARY OF OPERATIONS OF COMMON CARRIERS
AND SCHOOL BUSES: 1949 TO 1952**

ITEM	1949	1950	1951	1952 (prel.)
COMMON CARRIER BUS OPERATIONS				
Number of operating companies (Dec. 31):				
City and city suburban	1,740	1,638	1,676	1,638
Inter-city	2,080	2,388	2,924	2,947
Number of buses (Dec. 31):				
City and city suburban	57,800	57,570	58,304	58,495
Inter-city	30,280	28,711	29,205	28,863
Miles of highway covered (Dec. 31): ¹				
City and city suburban	54,000	53,310	59,690	54,220
Inter-city	416,500	400,264	438,447	420,436
Total bus miles (1,000):				
City and city suburban	1,786,611	1,861,843	1,781,714	1,749,943
Inter-city	1,598,033	1,300,420	1,437,549	1,444,183
Revenue passengers, line service (1,000):				
City and city suburban ²	8,502,055	7,750,000	7,580,000	7,485,453
Inter-city	854,981	815,172	907,913	899,844
Operating revenue (\$1,000):				
City and city suburban	786,351	798,988	810,787	809,404
Inter-city	537,575	510,815	541,853	565,705
Taxes assignable to operations (\$1,000): ³				
City and city suburban	56,555	62,025	58,914	60,655
Inter-city	42,880	42,508	48,578	45,389
Net operating revenue (\$1,000):				
City and city suburban	-5,908	8,540	22,829	20,355
Inter-city	39,912	37,982	41,400	38,878
Number of employees (Dec. 31): ⁴				
City and city suburban	125,096	129,043	126,850	118,617
Inter-city	66,749	66,570	62,676	64,709
SCHOOL BUS OPERATIONS				
Number of schools using buses	45,300	43,813	43,649	41,308
Number of buses	97,600	104,179	105,594	110,947
Total bus-miles (1,000)				
Children carried daily (1,000)	5,720	6,264	6,410	7,064
Cost of service annually (\$1,000)	177,532	180,183	207,718	209,385

¹ Includes duplication between carriers. ² Includes revenue transfer passengers. ³ Excludes income taxes.

⁴ Operating companies only.

**No. 656.—TROLLEY BUS AND STREET CAR LINES—SUMMARY OF OPERATIONS:
1949 TO 1952**

ITEM	1949	1950	1951	1952 (prel.)
TROLLEY BUS LINES				
Number of operating companies (Dec. 31)	42	42	43	41
Number of buses owned (Dec. 31)	6,355	6,497	7,069	7,183
Miles of highway covered (Dec. 31)	1,425	1,487	1,498	1,487
Total bus-miles (millions)	176	192	206	210
Revenue passengers (millions) ¹	1,149	1,198	1,226	1,208
Operating revenue (\$1,000)	102,724	121,900	131,850	141,739
Taxes assignable to operations (\$1,000) ²	4,581	4,912	5,343	7,090
Net operating revenue (\$1,000)	11,372	16,988	16,508	16,407
Number of employees on payroll	18,570	18,650	18,350	16,742
STREETCAR LINES				
Number of operating companies	101	88	81	74
Number of cars owned	15,505	13,228	10,900	10,000
Miles of single track	10,700	9,560	8,240	7,800
Miles of first main track	5,707	5,110	4,407	4,000
Operating revenue (\$1,000)	410,500	361,700	318,900	290,000
Number of passengers (millions)	3,480	2,790	2,171	1,790
Revenue-miles operated (millions)	555	463	387	334

¹ Includes revenue transfer passengers. ² Does not include income taxes.

¹ Sub I facilities are those which do not come up to Class I standards.² Airport type definitions: Municipal—public use, aircraft services generally available, public ownership and/or control. Commercial—public use, aircraft services generally available, nonpublic ownership and/or control. Limited—intended for private use but public not prohibited, aircraft services limited or not available, public or nonpublic ownership and/or control. Military—some civil use, military ownership and/or control. Private—authorized use only, public or nonpublic ownership and/or control.Source: Department of Commerce, Civil Aeronautics Administration; *Statistical Handbook of Civil Aviation*.

22. Waterways, Water Traffic, and Shipping

Data in this section vary as to area coverage, the variation depending upon the source of compilation. The data from Corps of Engineers, Department of Army, are for continental United States and Territories, possessions, etc.; data from Bureau of Census, and Bureau of Customs are for United States customs area which includes Alaska, Hawaii, and Puerto Rico and from 1935 through 1939, Virgin Islands; data from Maritime Administration and War Shipping Administration are for continental United States.

Units of measurement.—"Cargo tonnage" represents weight of cargo in long tons (2,240 pounds) or short tons (2,000 pounds). All other tonnage figures refer to capacity of vessels. The terms gross and net tonnage refer to space measurement, 100 cubic feet being called 1 ton. Gross tonnage is the capacity of the entire space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers or crew, with certain minor exemptions. Net or registered tonnage is what remains after deducting from the gross tonnage the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship recorded as "entered with cargo" may bear little relation to actual weight of cargo. Dead weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is therefore the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety. Displacement tonnage (naval vessels) has reference to weight of the vessel itself with its normal equipment, fuel, etc.

Types of vessel shipments.—Shipments by dry cargo vessels include shipments on all types of watercraft except tanker vessels, and shipments by tanker vessels include all types of cargo both liquid and dry carried by tanker vessels.

Vessel entrances and clearances.—The tables on vessel entrances and clearances show the number and net registered tonnage of American and foreign dry cargo and tanker vessels with cargo and in ballast entering and clearing the United States customs area in the foreign trade and indicate the customs districts at which these vessels first entered and from which they last cleared. With minor exceptions, all types of watercraft engaged in the foreign trade which are required to make formal entrance and clearance under United States customs regulations are included in the statistics. Army and Navy vessels entering or clearing without commercial cargo are not included in the figures. The tons shown in tables 679-682 are net tons of 100 cubic feet carrying capacity of the vessels (as defined in Part 16 of Title 46, "Code of Federal Regulations, Measurements of Vessels") and do not represent the actual weight of cargo carried.

A vessel is reported as entered at the first port in the United States at which entry is made, regardless of whether any cargo is unladen at that port. A vessel is reported as cleared from the last port where outward cargo is completed or where the vessel cleared in ballast.

Vessels touching at a United States port in distress, or for other temporary causes without discharging cargo are not included in the figures.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series K 132-145") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

Note.—This section presents data for the most recent year or period available on April 22, 1953, when the material was organized and sent to the printer.

No. 664.—WATER-BORNE COMMERCE OF THE UNITED STATES—CARGO TONNAGE, FOREIGN AND DOMESTIC: 1946 TO 1951

[In thousands of short tons of 2,000 pounds. See also *Historical Statistics*, series K 132-145]

Approximate net total, domestic	⁷ 468,155	578,561	630,229	575,363	651,359	691,987

¹ Figures are net for each type of traffic; no adjustments required to arrive at net totals.

² Represents traffic local to seaports, Great Lakes ports, and communities on inland waterways.

³ Represents traffic among ports and communities utilizing inland waterways exclusively.

⁴ Included in other types of domestic traffic prior to 1950.

⁵ Excluding St. Marys Falls Canal traffic and additional Detroit River traffic, data for which are already included in figures for Great Lakes traffic; also excluding duplications relating to rivers and canals themselves.

⁶ Principally coastwise and lake traffic passing through canals and connecting channels other than the St. Marys Falls Canal and Detroit River.

⁷ Estimated from figures in this table on assumption that all deductions represent duplications in domestic traffic; includes some minor duplications in figures for foreign traffic.

NO. 669.—COMMERCE OF PRINCIPAL UNITED STATES OCEAN PORTS: 1951

[In thousands of short tons of 2,000 pounds. In addition to commerce here shown, many ports have (1) commerce with ports on internal rivers and canals; (2) purely local port traffic, including, for New York and San Francisco, what is called intraport traffic between parts of a harbor for which separate statistics are maintained. These forms of traffic, although aggregate tonnage is large, are of much less economic importance than foreign and coastwise traffic]

¹ Adjusted for overcharges and undercollections.² Italics denote deficit.³ After deduction of canal earnings repaid to appropriations.⁴ No interest charge against the Canal is actually made by the Treasury. In order to present the net results of operation of the Canal, interest on capital invested is computed at a rate considered reasonable for Government borrowings over an indefinite period. Computed interest prior to July 12, 1920, is included in capital investment account.⁵ Includes adjustment of \$15,000 in postal surplus.⁶ Includes adjustment of \$44,000 in postal surplus.⁷ Actual business profits of \$877,000 adjusted by \$669,000 for write-off of reimbursable capital expenditures, public works, Republic of Panama.⁸ Includes \$23,000 for prior fiscal years.⁹ Includes \$292,000 for judgments rendered by Court of Claims for overtime compensation in prior years.¹⁰ Adjusted by a net reduction of \$162,000 for prior fiscal years.¹¹ Actual business profits of \$638,000 have been adjusted by a net decrease in the amount of \$6,536,000 representing surplus adjustments applicable to prior fiscal years.Source: The Panama Canal, *Annual Report of the Governor*.

No. 674.—COMMERCIAL TRAFFIC THROUGH THE PANAMA CANAL, TOTAL, 1915 TO 1951, AND BY NATIONALITY OF VESSEL, 1951

[See general note, p. 568. Figures cover ocean-going commercial traffic which includes only toll-paying vessels of 300 net tons and over, Panama Canal measurement, and vessels paying tolls on displacement tons of 500 displacement tons and over. Foreign naval vessels such as colliers, transports, supply ships, etc., with a measurement of 300 net tons or more and foreign naval vessels such as battleships, cruisers, destroyers, submarines, etc., with a displacement of 500 tons or more, classified as ocean-going commercial vessels]

¹ Canal boats and barges included with sailing prior to 1898.

² Includes iron, steel, composite, and concrete.

³ Includes whale fisheries and ood and mackerel fisheries. Beginning 1939, figures exclude mackerel.

⁴ Decrease of tonnage arises principally from registered tonnage having been corrected in 1818, 1829, and 1830 by omitting all vessels with registers granted prior to 1815, which were presumed to have been lost at sea, captured, etc.

⁵ Not available.

⁶ Including Puerto Rico and Virgin Islands.

⁷ Including Hawaii and Alaska.

23. Irrigation, Drainage, and Soil Conservation

Irrigation.—The 17 Western States and Arkansas, Louisiana, and Florida are the States in which most of the irrigated land in the Nation is located. In these States a special census of irrigation was made as part of the 1950 Census of Agriculture conducted by the Bureau of the Census. Information on acres irrigated, irrigation works, capital investment, and a number of other items was obtained from the irrigation companies, districts, and other organizations, and from farms that operate their own irrigation supply works. For the remaining eastern, midwestern, and southern States information on irrigation was limited to that reported in the farm census.

The definition of irrigated land in the 1950 Census was the net acreage of farm land to which irrigation water was actually applied during 1949. It did not include land that could be irrigated or that usually is irrigated, but that was not irrigated during 1949. Land in irrigated farms that was used for purposes such as roads and farmsteads, to which irrigation water was not applied, was excluded. Also excluded was irrigated land used for purposes other than farming, such as that in rural residential areas, cemeteries, parks, and golf courses.

The Bureau of Reclamation has operated since 1902 as the principal Federal agency engaged in the development of irrigation projects. By Congressional directive its activities are confined to the 17 Western States and Alaska. However, Kansas does not appear in any of the Reclamation tables because work on developments in that State has not yet progressed to a point to warrant its inclusion. Actual operation of irrigation works is transferred to water users organizations as soon as the projects are fully developed and these organizations are willing and able to assume the responsibility of operating the works.

Reclamation crop data, compiled since 1906, are obtained from the annual crop census conducted by the Bureau. Information on reclamation project charges and rentals are obtained from the financial records of the Bureau. Data on reclamation hydroelectric plants have been compiled semi-annually by the Bureau since July 1944.

Drainage.—Drainage works for farm lands are constructed primarily for three purposes, namely, (1) the reclamation or improvement of the land, (2) protection of the land against overflow, and (3) to rid the land of seepage from irrigation ditches or for control or prevention of alkali formation. Ninety percent of all drainage enterprises were organized for reclamation and improvement of land.

The farmers in the Eastern United States need drainage to take surplus rainfall off some of their lands. Most of this is gravity drainage, although pumps are sometimes used. In the Western States drainage is mainly for the purpose of taking seepage water off irrigated lands and to carry off alkali salts.

In the 1950 National Census of Drainage, in general, only those organized enterprises with 500 acres or more of drained farm land were included in the enumeration. A few irrigation enterprises of smaller size which had their own drainage works were also included. In previous Censuses (1910-1940) all organized enterprises draining farm lands were included in the enumeration regardless of size. Privately drained lands of less than 500 acres have not been enumerated in any of the four Drainage Censuses. The change in census procedure for 1950 materially reduced the number of enterprises enumerated, but affected very little the amount of drained land enumerated.

In taking the 1950 Census, differences in form of organization and management of drainage enterprises made it necessary for the Bureau of the Census to divide somewhat arbitrarily the 40 States with drainage enterprises into two groups: the 10 "county-drain" States and the 30 "drainage-district" States. The eight States with no drainage enterprises are the six New England States, Pennsylvania, and West Virginia. In the 10 "county-drain" States (Delaware, Indiana, Iowa, Kentucky, Michigan, Minnesota, North Dakota, Ohio, Oklahoma, South Dakota), statistics were gathered for the county as a unit, rather than for each separate enterprise as for the 30 "drainage-district" States. In most of the "county-drain" States, the management of drainage enterprises is under the county government. Generally, the maintenance work on existing ditches has been done by reorganizing the land of an earlier enterprise into a new project. Since the number of enterprises for "county-drain" States would be meaningless, the number was not obtained for these 10 States.

Note.—This section presents data for the most recent year or period available on April 22, 1953, when the material was organized and sent to the printer.

In the Western States most of the drained land is located in irrigation enterprises which were chartered to do both irrigation and drainage work under one organization. In the case of irrigation enterprises having their own drainage, the cost of construction and operation and maintenance of the irrigation works is usually far greater than that for drainage. Separate records are seldom kept for expenditures for drainage and irrigation. Data were not included in the 1950 Census of Drainage for cost, collections, and indebtedness of irrigation enterprises having their own drainage. Therefore, the data for 1950 are not fully comparable with those for earlier years.

Soil conservation.—Basic soil conservation district legislation has now been enacted in all of the 48 States and 4 of the Territories and possessions. Each of these laws contains an effective date after which soil conservation districts could be organized by local farmers and operators. A soil conservation district is a political subdivision of a State which is determined by petition and referendum of farmers residing in the area, and approved by the State Soil Conservation Committee. Districts, in most cases, have authority to solicit Federal, State, county, and private assistance in carrying on their soil and water conservation program within the area. On request of the local governing body of each soil conservation district, the Department of Agriculture provides technical and other assistance to districts, through its several agencies. These memorandums of understanding form the basis on which any departmental assistance is provided to a district for use on the farms and ranches within the district. After the basic memorandum with the Department has been signed, the Soil Conservation Service signs a supplemental memorandum with each district governing body requesting assistance, to cover activities which the Soil Conservation Service will help each district to carry out.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series F 56-59") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 692.—IRRIGATION ENTERPRISES—SUMMARY: 1910 TO 1950

[Data are for the 17 Western States, Arkansas, Louisiana, and, for 1940 and 1950, Florida. Tables 692, 694 and 695 relate to irrigation enterprises of all types, including those operated by individual farmers. They are based on reports of management of enterprises. An enterprise is defined as "an independent irrigation establishment owning or operating works for supplying water to agricultural land." See also *Historical Statistics*, series F 56-59.]

¹ Including irrigation enterprises having their own drainage. An interstate enterprise is counted in each State in which a part is located, but is counted only once in the total.

² Data for irrigation enterprises not included in 1950.

³ Not available.

⁴ Largely States with organized drainage districts and other corporate and private enterprises.

⁵ Largely county-drain States. See text, p. 589.

¹ Warren Act contracts are those which provide for sale of excess water to irrigation districts, i. e., water over and above project requirements. Lands served are usually located outside project proper. The act also provides for joint construction and financing of irrigation works by Federal Government and irrigation districts.

¹ Area for which Bureau is prepared to supply water.² Includes acreage provided either a full or supplemental irrigation water supply under the Warren Act and other special service contracts.³ Excludes 110,572 acres of temporarily suspended, other leased and water rental lands (crop value \$11,800,000).⁴ Although there are 178,003 acres that can be irrigated within project limits, area for which there is considered to be a safe and reliable water supply is 155,000 acres.

Washington: Yakima-Kennewick	Little Porcupine	1955		18,000
Wyoming: Kendrick	Chandler	1955		12,000
	Alcova	1954		36,000
Under construction by Army Engineers, total ¹⁴				1,245,000
North Dakota: Missouri River Basin	Garrison	1955		400,000
South Dakota: Missouri River Basin	Ft. Randall	1953		320,000
	Gavins Point	1956		100,000
	Onhe	1960		425,000

¹ Includes 1,041,800 kilowatt capacity of 26 additional plants authorized but not under construction.

² Power plant units operated by power allottees under agency contract.

³ 27,000 kilowatts; space provided in plant for third unit.

⁴ Power marketed by Bonneville Power Administration.

⁵ Main units with a nameplate rating at 108,000 kilowatts have continuous operating capacity of 120,000 kilowatts.

⁶ Prosser will be removed when Chandler is constructed.

⁷ Power plant constructed by Bureau of Reclamation with Salt River Valley Water Users' Association funds.

⁸ Unit No. 3 installed in Pacific Power and Light Company's Cove No. 2 plant.

⁹ Three plants: (a) Spanish Fork (upper); (b) Spanish Fork (lower); (c) Payson.

¹⁰ Salt River Valley Water Users' Association's plant. ¹¹ Imperial Irrigation District's plant.

¹² Enterprise Irrigation District's plant. ¹³ Power to be marketed by Bureau of Reclamation.

¹ For specific procedure on organization of soil conservation districts, see respective State soil conservation district law. By provision of most State district laws, State soil conservation committee has responsibility for organization of districts. Local district governing bodies administer affairs of each individual district.

² Soil Conservation Service furnishes technical and other assistance to practically all districts that have entered into memorandums of understanding with Department of Agriculture.

³ Includes all farmer-district cooperative agreements for initial, advanced and basic conservation plans (formerly shown as active conservation plans only, not including initial and advanced agreements). Cancellations caused by death, change in ownership, or mutual consent have been deducted. Data on plans and treated areas included only work done through farmer-district cooperative agreements since Aug. 1937 with assistance of Soil Conservation Service.

⁴ Includes Imperial Irrigation District.

⁵ Includes 23 State cooperative grazing districts.

⁶ Includes 5 wind-erosion districts.

24. Agriculture—General Statistics

Statistics on agriculture are for the most part prepared by the Bureau of the Census, Department of Commerce, which conducts the Federal Census of Agriculture, and by the Department of Agriculture which prepares current annual estimates.

Beginning with 1840 a Census of Agriculture has been taken every 10 years in conjunction with the Decennial Census of Population. In 1925, 1935, and 1945 a mid-decennial Census of Agriculture has also been taken. Information at each census has been obtained by a personal canvass of individual farms by census enumerators. The first Census of Agriculture was limited in scope. It included such items as an inventory of the principal classes of domestic animals, the production of wool, the value of poultry, the value of products of the dairy, and the production of the principal crops. The number of farms and the acreage and value of farm land were first included in the Census of 1850. In 1880 information was first secured as to the tenure under which the farms were operated. A detailed classification of farm land according to use was first obtained in 1925; in earlier censuses, farm land was classified only as improved land, woodland, and other unimproved land.

A farm as defined by the Bureau of the Census is all the land on which some agricultural operations are performed by a person, either by his own labor alone or with the assistance of members of his household, or hired employees. In 1950, places of 3 or more acres were counted as farms only if agricultural products, exclusive of a home garden, with a value of \$150 or more were produced in 1949. Also, in 1950, places of less than 3 acres were counted as farms only if the value of agricultural products sold in 1949 amounted to \$150 or more. In each census from 1925 to 1945, places of 3 or more acres were counted as farms if any agricultural products, other than a small home garden, were produced during the preceding year while places of less than 3 acres were counted as farms if the agricultural production was valued at \$250 or more. (For definitions used in earlier censuses, see *U. S. Census of Agriculture: 1950*, Vol. II, Introduction.)

Agricultural operations consist of the production of crops or plants, vines or trees (excluding forestry operations), or of the keeping, grazing, or feeding of livestock for animal products, animal increase, or value enhancement. Included as farms are such agricultural enterprises as nurseries, greenhouses, hothouses, fur farms, mushroom houses, apiaries, and cranberry bogs. Excluded are fish farms, fish hatcheries, oyster farms, frog farms, kennels, game preserves, parks, and the like. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a farm for census purposes. Thus, for a plantation, each cropper and tenant operation is considered a separate farm even though the entire plantation may be handled essentially as a single farm enterprise.

The land in farms includes considerable areas of land not actually under cultivation or used for pasture or grazing, but all such land must have been under the control of the operator and considered a part of his farm. Land used for grazing or pasture that was neither owned nor leased by the farm operator generally was not included under land in farms. Rent-free lands were included in an operator's farm only if he had sole use of such lands. Thus vast acreages of land used for grazing, such as national forests, Taylor grazing land, State lands, or other public lands, and some railroad and other privately owned lands, are not included as land in farms even though used for agricultural purposes.

Note.—This section presents data for the most recent year or period available on April 22, 1963, when the material was organized and sent to the printer.

Information on prices received by farmers for products they sell and prices paid for articles they buy for production and family living are obtained by the Bureau of Agricultural Economics from about 33,000 voluntary reporters, which include farmers, local merchants, and handlers of agricultural products. Season average prices received by farmers are calculated by weighting midmonth prices by monthly sales during the crop marketing season, beginning with the first month when a particular crop harvest begins.

The index numbers of prices received and of prices paid by farmers (see tables 726 and 727) are based on current midmonth prices for these commodities. For information concerning methods of construction of the indexes, see Supplement No. 1 to the January 1950 issue of *Agricultural Prices*, issued by the Bureau of Agricultural Economics. The ratio of the index of prices received to the index of prices paid by farmers measures the monthly variation in the average per unit exchange value of farm products in terms of commodities and services bought by farmers.

Cash income is the cash receipts from farm marketings and represents the quantities of crops, livestock, and livestock products sold by farmers multiplied by the prices received per unit of production at the local market. Gross farm income includes Government payments, value of farm products consumed on the farm, and rental value of farm homes, as well as cash receipts from farm marketings.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series E 1-16") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

NO. 707.—NATIONAL FARM PRODUCT IN CURRENT DOLLARS: 1910 TO 1950

[Millions of dollars. Gross national farm product differs in content and movement from measures of the total output of farm products. As a value-added concept, the gross farm product measures only production actually occurring on farms, without duplications. That is, the value of materials used up by farmers in the production process, such as feed, fertilizer, and motor fuel, is deducted from the value of total farm output to arrive at the gross farm product. It is termed "gross" only because depreciation and other capital consumption allowances are not deducted. Value of materials used up in production, technically known as "intermediate products," has risen greatly in recent decades relative to the value of total farm output. Thus, gross farm product has risen significantly less than total farm output over the period 1910-50]

¹ Includes imputed value of food and firewood consumed on farm where produced.

² Adjustment necessary to convert sales figures to a commodity output basis.

³ Includes current expenses for feed and livestock, seed, fertilizer, operation of motor vehicles, irrigation, and other purchased items. Some intermediate products are direct purchases by one farmer from another. Bulk of purchased materials represents production, or value added, by nonfarm industries.

⁴ Counted as an expense to farmers, since only the rental value of farm-owned property is considered to originate in farm sector.

Pasture ¹	883	818	625	600	502	437	382	290
Forest land capable of producing timber of commercial quantity and quality	368	344	318	301	319	349	325	311

¹ Cropland used for pasture only. Not comparable to previous estimates of plowable pasture.

² Includes 34,000,000 acres of arid woodland and brush land.

³ Estimated. ⁴ Includes idle grassland in first decades and arid woodland (pinon, juniper, chaparral).

⁵ Includes about 90,000,000 acres of arid woodland and brush land used for grazing.

⁶ Largely commercial forest land. Includes approximately 110,000,000 acres used to some extent for grazing.

1950	⁴ 75,290,606	(⁴)	(⁴)	(⁴)	(⁴)	(⁴)

¹ For 1910, standing renters (renters paying a fixed quantity of products) were included with "Cash tenants" for all States; for 1920, those for northern and western States were included with "Cash tenants," and those for the South with "Other tenants."

² Of these acreages, operator owned 120,748,000 in 1930, 144,630,000 in 1940, and 192,259,000 in 1945.

³ Of these values, part owners owned property valued at \$3,564,202,000 in 1940 and \$5,898,871,000 in 1945.

⁴ Based on reports for only a sample of farms.

⁵ Averages only available. See table 719.

1 Not available.

2 Acres, value, and debt for part-owner farms are for owned portion only; rented portion included with data for tenants and managers.

3 Average per farm not shown because acres and value include rented portion of part-owner farms.

Surplus and reserves, end of year (thousand dollars).....	-----	-----	33,656	45,474	70,644	108,033	120,003	147,300

¹ Preliminary.

² Beginning 1945 includes taxes on gasoline used in farm tractors.

³ For 1925-30 includes companies with more than 65 percent of their insurance on farm property; for later years, 50 percent. About 88 percent of their total insurance is on farm property, for both periods.

⁴ Number of companies for which data were obtained; perhaps not entirely complete for any year.

⁵ Estimate based on sample of companies.

⁶ Excess of assets over liabilities. Most of farmers' mutuals are assessment companies and as such are not required to set up unearned premium reserves. Data not compiled prior to 1935.

¹ Many expense items excluded such as fertilizer and lime, maintenance of buildings, taxes, mortgage interest, insurance, rents, containers, veterinary fees, and others of varying degrees of importance. Specified expenditures, shown in this table, amounted to approximately 60 percent of all farm production costs for 1949 according to estimates of United States Department of Agriculture.

² For 1924 to 1949, cash payments for farm labor; for 1899 to 1949, housework specifically excluded; for 1939, 1944, and 1949, excludes expenditures for contract construction work, machine hire, or labor included in cost of machine hire; for 1869, 1899, 1909 and 1919, value of board included.

³ Not available.

⁴ Amount spent for repairing (both labor and parts) and amount spent for repair parts and other replacement parts; excludes motortruck and automobile repairs.

Machinery and equipment.....	\$324	\$235	\$377	\$749	\$1,655	\$1,841	\$2,178	(⁵)

¹ Preliminary.² Data represent inventory valuations at beginning of year. Includes family share of automobiles.³ For use in United States from domestic manufacture; from Bureau of Census, *Facts for Industry Series M35A*.⁴ Not available.⁵ Excludes family share of automobiles.

Source: Department of Agriculture, Bureau of Agricultural Economics (except as noted).

No. 734.—FERTILIZER CONSUMPTION: 1880 TO 1951

[In thousands of tons of 2,000 pounds. Based on tag sales, records of Government officials, or estimates. Beginning 1935, figures include tonnage distributed by Agricultural Adjustment Administration and by Tennessee Valley Authority, data for the latter representing fiscal years ending June 30. Data for phosphate rock used in Illinois and Florida, available only since 1939, have been excluded from annual comparisons. In addition to tonnage for consumption, fertilizers and fertilizer materials produced in continental U. S. are exported to island possessions]

¹ Marketing season during which farm products are moved into channels of trade. Marketing seasons overlap.

² For years since about 1935, comprises members, contract members, and shareholders, but excludes patrons not in these categories.

³ Includes value of commodities sold or purchased for patrons and charges for rendering other essential services in marketing or purchasing. Most duplication in value from intra-association transactions eliminated.

⁴ Covers operations of associations whose fiscal years ended during July 1, 1950, through June 30, 1951, with limited exceptions.

⁵ Includes Service Associations.

⁶ Data not comparable with figures for previous years. These are gross figures. Net figures obtained after adjusting for duplication resulting from business done between cooperatives are: Total net business, \$8,103,668,000; marketing, \$6,459,460,000; purchasing, \$1,644,208,000.

No. 740.—FARMS—NUMBER AND PERCENT DISTRIBUTION, BY TYPE: 1950

[Based on reports for only a sample of farms. Type of farm determined on basis of relationship of value of sales, from a particular source to total value of products sold for each farm. In general, value of sales from a particular source was 50% or more of total sales when a farm was classified as that type. Part-time farms include those with a value of products sold of \$250-\$1,199 and with operator either reporting 100 days or more of off-farm work or other income exceeding value of farm products sold. Residential farms include those with a value of farm products sold of less than \$250. Abnormal farms include public and private institutional farms, experiment stations, community projects, etc.]

25. Agriculture—Production and Related Subjects

The data in this section are, for the most part, from the Bureau of the Census, Department of Commerce, and from various bureaus in the United States Department of Agriculture. In general, statistics for agriculture census years are from the Bureau of the Census. Estimates for intervening years, and adjustments, where necessary, to a January 1 basis are from the Bureau of Agricultural Economics, United States Department of Agriculture.

Annual agricultural statistics of a wide variety have been issued currently by the United States Department of Agriculture for 90 years—the first being as of May 1, 1863. The 41 field offices design the samples and collect data from voluntary reporters. State estimates and other information are sent to the Crop Reporting Board of the Bureau of Agricultural Economics in Washington, where, after review, reports are issued containing State, Regional, and United States data.

Statistics compiled by the Bureau of Agricultural Economics on crops, livestock, and livestock products, agricultural prices, farm employment, and other related subjects are based mainly on data obtained through mail questionnaires. The basic information is obtained from nearly three-quarters of a million reporters, located in every agricultural county in the United States, who report on one or more items during a year. These reporters, mostly farmers, report for their own and nearby farms on some 80 crops and scores of other items pertaining to agricultural production and farm family living.

The most extensive of the current survey data are gathered by the Bureau of Agricultural Economics from questionnaires handled in cooperation with the Post Office Department through its rural mail carriers. These surveys obtain livestock data in June and December and crop acreage data in October. For each survey the rural carrier distributes 10 to 20 cards to farmers on his route. The farmer is asked to complete his questionnaire for his own farm and return the card to his mail box.

In the data prepared by the Bureau of Agricultural Economics, estimates of crop acreage and production for the census years are set up currently on available information. Later, if necessary, these data are revised to a level based largely on the census enumerations. The estimates for intercensal years are based on sample data obtained each year from individual reporters. This information is supplemented by other data, such as State assessors' enumerations of agricultural information, crop meter frontage measurements, reports of carlot shipments, warehouse receipts, local surveys, personal observations by field statisticians as well as reports from other sources having a knowledge of farming, agricultural production, and processing. Cotton acreage and production are also based on sample data and, in large measure, on ginning information gathered by the Bureau of the Census. Usually, all known sources of information pertaining to agriculture in general, from the farm to the consumer's household are tapped for basic facts used in compiling current statistics on agriculture.

For each decade from 1840 through 1900, the Census of Agriculture was taken as of June 1. The five decennial censuses since then have been taken as of April 15, 1910; January 1, 1920; and April 1, 1930, 1940, and 1950. The 1925, 1935, and 1945 quinquennial Censuses of Agriculture were taken as of January 1. Comparison of inventory numbers of livestock from census to census is seriously affected by a change in the date of enumeration. From January to April there are material changes in num-

Note.—This section presents data for the most recent year or period available on May 20, 1953, when the material was organized and sent to the printer.

bers on hand in most parts of the country due to births, marketings, farm slaughter, etc. In an effort to obtain as much comparability as possible the censuses taken in April either excluded recently born animals from the enumeration or provided for their enumeration in a separate age group. Volume II of the 1950 Census of Agriculture Reports shows a complete history of the enumeration of livestock and presents a discussion of the comparability from census to census.

For most kinds of domestic livestock, there are comparatively short, cyclic fluctuations in numbers, even though the trend over a long period of time may be definitely in one direction. A single census may be taken at a time when such a cycle is at the peak or at the trough of numbers and hence gives no true indication of the long-time trend.

Annual inventory numbers of livestock on farms prepared by the Department of Agriculture together with estimates of livestock, dairy, and poultry production are based on information furnished by individual farmers, supplemented by State assessors' data in a number of States, and by such records as brand inspections, rail and truck shipments, and inspected slaughter. The level for these inventories is based in large part on census enumerations for years when census data are available.

Data on imports and exports are now compiled by the Department of Commerce, Bureau of the Census, and are published in the annual report, *Foreign Commerce and Navigation of the United States*. (See also section 32, Foreign Commerce.) The official trade statistics based on the fiscal year are usually preferable to data presented on a calendar year basis, for use in comparing imports and exports with crop production since, for most crops, they coincide more nearly with the crop year.

For a historical summation of raw materials production, imports, exports, and consumption, which includes figures for agricultural materials, see table 1056.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series E 72-75") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

¹ Measures calendar-year production of all crops and pasture consumed by all livestock, and the product added in conversion of feed and pasture into livestock and livestock products for human use and into farm-produced horse and mule power.

² Estimated value, at 1935-39 average prices, of all feed (including commercial feeds) and pasture consumed by each class of livestock subtracted from total value, at 1935-39 average prices, of livestock and livestock products.

³ Includes miscellaneous crops not included in groups shown.

⁴ Volume of sales and home consumption during calendar year.

⁵ Total crop production minus quantities retained for feed or seed and quantities not harvested or lost.

¹ Excludes distilled liquor.

² Beginning Jan. 1, 1942, includes food exported for relief or charity; beginning Jan. 1, 1947, also includes exports under Army Civilian Supply Program.

³ Based on total exports of domestic merchandise.

⁴ Imports for consumption beginning 1934; general imports prior thereto.

⁵ Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 96 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

⁶ A value not computed; data not available prior to 1929.

Source: Department of Agriculture, Office of Foreign Agricultural Relations, from official records of Bureau of the Census and U. S. Tariff Commission. Published in annual report, *Agricultural Statistics*.

¹ For Census of 1920, cropland harvested was obtained by adding the acres of individual crops harvested. See note 6.

² Not available.

³ Total acreage of crops harvested for which figures are available. Includes any acreage of alfalfa seed and clover and grass seeds enumerated, some of which was harvested from land also cut for hay.

⁴ Total for specified crops.

⁵ Irish and sweet potatoes included with "Field crops," not with "Vegetables."

⁶ Excludes corn cut for fodder (acreage, 14,503,000; value, \$206,935,000) probably duplicated in acreage of corn harvested for grain.

⁷ Only strawberries included in small fruits; other small fruits included in field crops.

⁸ Acreage represents vegetables harvested for sale only; acreage in farm gardens not available. Value includes both vegetables for home use and for sale, except as noted.

⁹ Vegetables harvested for sale.

¹⁰ Available data not comparable.

¹¹ Farm garden vegetables for home use only.

¹² Acreage in fruit orchards, vineyards, and planted nut trees not secured prior to 1930 Census.

¹³ Acreage of horticultural specialties not included.

¹⁴ Excludes acreage on farms reporting less than one-half acre in orchards, vineyards, and planted nut trees.

¹ Total acreage of crops harvested for which figures are available. Includes any acreage of alfalfa seed and clover and grass seeds enumerated, some of which was harvested from land also cut for hay.

² Excludes crops for which data were not obtained in 1944.

³ Value of vegetables grown for home use not obtained in 1949.

⁴ Irish and sweetpotatoes included with "Field crops," not with "Vegetables."

⁵ Excludes sweet corn, popcorn, "Egyptian corn," kafir, and milo maize.

⁶ Totals are for States for which data are available.

⁷ Excludes flax and wheat mixtures.

⁸ Totals are for 8 States having separate inquiry on questionnaire.

⁹ Includes wild hay and lespedeza in those States where separate inquiries were not on the questionnaire.

¹⁰ Silage crops other than corn and sorghums.

¹¹ Does not include sorghum for sirup.

¹² Does not include acreage for farms with less than 15 bushels harvested.

¹³ Excludes acreage on farms with less than ½ acre of fruit orchards, groves, vineyards, and planted nut trees.

¹⁴ Acreage for horticultural specialties not included.

Source: Department of Commerce, Bureau of the Census; U. S. Census of Agriculture: 1950, Vol. II.

No. 755.—PRINCIPAL CROPS—ACREAGE, PRODUCTION, AND VALUE: 1866 TO 1952

[Tons are of 2,000 pounds. For weights of units of measurement for principal products, see Appendix II. Approximate weights of units of measurement for other products are as follows: Number of pounds to a bushel—sweetpotatoes, 55; sorghums for grain, 56; clover seed, 60. Number of pounds to a barrel of cranberries, 100. Prices and yields for periods are weighted averages except for cotton and cottonseed, which are simple averages of prices and yields for individual years. Acreage, production, and yield of all crops revised to census data. See also *Historical Statistics*, series E 181-230, for acreage harvested, production, and price data for corn, wheat, oats, barley, flaxseed, potatoes, sweetpotatoes, cotton, cottonseed, soybeans, and hay]

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.

² Received by farmers. Beginning 1908, prices are season average prices for the crop-marketing season; prior thereto, Dec. 1 prices. Prices for certain years include an allowance for unredeemed loan and purchase agreement deliveries.

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.

² Received by farmers. Prices are season average prices as follows: Barley, buckwheat, and flaxseed, beginning 1908; rice, beginning 1909. Prices for prior years are as of Dec. 1. Prices for certain years for barley, rice, and flaxseed include an allowance for unredeemed loans and purchase agreement deliveries.

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.

² Received by farmers. Beginning with 1908 for potatoes and cotton, 1909 for sweetpotatoes, and cottonseed, prices are season average prices. Figures for prior years are Dec. 1 prices. Prices for certain years for cotton and cottonseed include an allowance for unredeemed loans and purchase agreement deliveries.

³ Average for 8 years. ⁴ Average for 6 years. ⁵ Average for 7 years. ⁶ Average for 4 years.

⁷ Includes following quantities of commercial early potatoes not marketed and excluded in computing value (1,000 bushels): 1928, 7,462; 1931, 66; 1932, 2,175; 1939, 1,240; 1943, 440; 1950, 1,235; 1951, 1,093.

⁸ Includes 1,504,000 bushels unharvested but purchased by the Government under price-support program.

⁹ State production figures, which conform with census annual ginning enumeration, with allowance for cross State ginnings, rounded to thousands and added for United States totals. Cotton grown in Baja, California, ginned in California from 1913 to 1924, has been excluded.

¹⁰ Production is in running bales prior to 1899; 500-pound gross weight bales thereafter.

¹¹ Data for 1900 and 1910.

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.

¹⁴ Received by farmers. Prices for certain years for grain sorghums, peanuts, dry edible beans, soybeans, and red clover seed include an allowance for unredeemed loans and purchase agreement deliveries. See also notes on prices for each crop.

¹⁵ Based on the reported price of grain sorghums.

¹⁶ Equivalent solid acreage.

¹⁷ Prices are season average prices, prices of beans being for cleaned beans.

¹⁸ Bags of 100 pounds (uncleaned).

¹⁹ Farm value of dry edible beans equals the price of cleaned beans applied to the production of cleaned beans rather than to the total production. ²⁰ A average for 1924 and 1925.

²¹ Beginning 1939, clean seed; prior years, threshed-run seed.

²² A average for 1919 and 1920.

²³ Dec. 1 prices, 1916 to 1931; beginning 1932, season average prices.

²⁴ Includes 5,436,000 pounds in 1935, 4,365,000 pounds in 1937, 3,140,000 pounds in 1938, 2,813,000 pounds in 1939, not available for marketing because of economic conditions and the marketing agreement allotments. Saleable allotments under marketing agreement were 39,000,000 pounds in 1949, 50,000,000 pounds in 1950, 46,500,000 pounds in 1951, and 39,200,000 pounds in 1952. Prices and values are computed on the marketed crop.

¹ Value based on season average or Dec. 1 prices. See notes on "Price" column.

^{2a} Received by farmers. Prices as of Dec. 1 except as noted.

^{2b} Tame hay only, prior to 1911.

^{2c} Prices are season average prices beginning 1911; Dec. 1 prices theretofore. Beginning 1939, prices are for hay sold baled; prior years, for hay sold loose. Price for hay sold loose in 1948 was \$18.90 per ton.

^{2d} Prices are season average prices beginning 1919; Dec. 1 prices theretofore.

^{2e} Prior to 1942, data are for 7 States. Production figures include fruit consumed on farms, sold locally, and used for manufacturing, as well as that shipped; they exclude fruit which ripened on trees but was destroyed prior to picking. Figures relate to crop produced from bloom of year shown. In California, picking season usually extends from about Oct. 1 to Dec. 31 of following year. In other States, season begins about Oct. 1 and ends in early summer.

^{2f} Prior to 1942, price of sweet sorghums for forage and hay.

^{2g} Net content of boxes varies. In California and Arizona, approximate average is 77 lbs.; in other States, 90 lbs. Production includes following quantities donated to charity, unharvested, and/or eliminated on account of economic conditions (1,000 boxes): 1933, 977; 1934, 1,395; 1935, 614; 1936, 1,023; 1937, 1,204; 1938, 2,949; 1939, 1,236; 1940, 1,322; 1941, 762; 1942, 654; 1943, 830; 1944, 1,771; 1945, 731; 1946, 2,639; 1947, 1,563; 1948, 881; 1949, 894; 1950, 799; 1951, 1063. Price and value are computed on remaining crop.

^{2h} Season average returns to growers. Price and value apply to entire crop exclusive of that portion donated to charity, unharvested, and/or eliminated on account of market conditions. (See note 32.) Prices are equivalent packing-house-door returns for all methods of sale and are weighted by production to obtain U. S. averages.

²ⁱ Average for 1929 and 1930.

¹ Season average price; for 1952, to Dec. 1 only.

² Based on 1947-51 average ratio of lint to cottonseed.

³ For cotton crop, and 1949-52 for cottonseed, season average prices include an allowance for unredeemed loans.

664 AGRICULTURE—PRODUCTION AND RELATED SUBJECTS

No. 768.—COTTON (EXCLUDING LINTERS)—PRODUCTION, CONSUMPTION, EXPORTS, IMPORTS, PRICES, AND CARRY-OVER: 1916 TO 1952

[All figures, except average price, in thousands of bales. Production figures relate to crop of preceding calendar year and are compiled from reports of individual ginneries. Price per pound is average price received by growers. For data prior to 1916, see 1949 and earlier editions of the *Statistical Abstract*.]

YEARLY AVERAGE OR YEAR ENDING JULY 31	PRODUCTION		Average price per pound upland cotton (cents)	Con- sumption (running bales)	Exports of do- mestic cotton (running bales)	Imports (equiva- lent 500- pound bales)	Carry- over (running bales)
	Running bales, counting round as half bales	Equivalent 500-pound bales, gross weight

NO. 774.—TRUCK CROPS, COMMERCIAL—ACREAGE, PRODUCTION, AND VALUE, BY KIND, 1951 AND 1952, AND LEADING STATES, 1952

[Production in equivalent tons of 2,000 pounds. Estimates relate to commercial production for fresh market and processing combined and include production in market-garden areas. Production for home use in farm and nonfarm gardens is not included. Value based on season-average prices received by growers. Value is for season or crop year and should not be confused with calendar year income]

¹ Acreage of crops for harvest for fresh market, including any partially harvested or not harvested because of low prices or other economic factors, plus acreage harvested for processing.

² Processing production shelled basis plus fresh market production in the shell. Equivalent shelled production: 1951, 107,600 tons; 1952, 102,000 tons.

³ Includes some quantities not marketed and excluded in computing value.

⁴ Includes quantities for dehydration.

⁵ Peppermint and spearmint.
⁶ Processing production shelled basis plus fresh market production in the shell. Equivalent shelled basis: 1951, 524,780 tons; 1952, 416,890 tons.

⁷ Georgia, plus crop contracted in other States by Georgia processors.

1952 (prel.)	331.0	21.5	7,132	6.83	48,721	557	521	166	(⁷)	49,500

¹ Growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually ends by December or early January in Louisiana and in Florida by March following season of growth.

² Prices exclude Government payments under the Sugar Act. Price support payments for 1943-45 included.

³ Raw value equals 96° raw sugar as defined in Sugar Act of 1948; prior to 1929, calculated by the Agricultural Adjustment Administration Method. (S. R. Series 1, No. 1.)

⁴ Calculated on basis that 100 pounds of raw sugar required to produce 93.46 pounds of refined sugar.

⁵ Converted to 80° Brix beginning with 1934. Data for previous years as reported.

⁶ Syrup production excluded. See table 778. ⁷ Not available.

1944	216,072	109,522	7,832	72	875	818	223	10.44
1945	211,331	103,173	7,371	71	821	768	223	10.41
1946	208,376	84,379	6,002	71	680	636	227	10.59
1947	211,624	113,020	7,942	70	872	815	220	10.26
1948	206,550	100,042	7,543	75	835	780	221	10.35
1949	213,354	108,794	8,046	74	956	893	238	11.10
1950	220,383	109,405	8,175	75	961	898	235	10.99
1951	221,212	109,494	8,477	77	996	931	235	10.98
1952	221,990	108,089	8,694	80	1,020	953	235	10.96

¹ Age of cane equals 18 to 24 months of growth. ² See note 3, table 779.

³ One ton of raw sugar 96° test is assumed to be equivalent to 0.9346 ton of refined.

⁴ Based on tonnage of cane used.

¹ Excludes Cuba. Includes Puerto Rico, Hawaii, Phil. Isls., and beginning 1910, Virgin Islands not shown separately.

² Beet sugar not converted to raw prior to 1909. Refined reduced to raw basis by multiplying by 1.07.

³ For 1900 to 1906, shipments to United States.

⁴ Statistics for 1874 to 1880 represents exports. Normal grinding season begins Oct. 1. In 1933, production was from grindings of Oct. 1, 1933, to Dec. 31, 1934; beginning 1934, from grindings of the next calendar year.

⁵ Exports 1871 to 1911, production 1912 and subsequently. Includes production of muscovado and panocha, low grades of sugar mostly for domestic consumption.

⁶ Less than 500 tons.

⁷ One year only.

⁸ Not available.

⁹ Louisiana and Texas 1909 to 1923; Louisiana only 1924 to 1927; Louisiana and Florida beginning 1928.

¹⁰ Beginning 1930, includes centrifugal only.

¹¹ Production for 1940; not available for 1941-44.

Source: Department of Agriculture, Bureau of Agricultural Economics (from official sources and International Institute of Agriculture), annual report, *Agricultural Statistics*, and *The World Sugar Situation*.

¹ Fiscal years through 1915; calendar years thereafter.

² General imports through 1932; imports for consumption thereafter.

³ Includes artificial silk prior to 1911.

⁴ Include shipments under foreign aid programs such as UNRRA, Interim Aid, ECA, and MDAP (MSA); Civilian Supply shipments are included in 1948 and subsequent years only.

⁵ Raw silk.

No. 787.—ANIMAL AND VEGETABLE FATS AND OILS—PRODUCTION, CONSUMPTION, AND STOCKS: 1951 AND 1952

[Data cover factory operations only, and therefore exclude considerable quantities of lard, tallow, and grease produced on farms and by local butcheries and small renderers, and quantities consumed and held in homes, hotels, restaurants, bakeries, and quantities consumed and held by painters, building contractors, garages, etc. Stocks include amounts held by and in transit to producers, factory consumers, and public storages, but exclude amounts held in private storages by retailers, wholesalers, and jobbers. Additional data on consumption and stocks of raw materials, such as cottonseed, copra, corn germs, flaxseed, soybeans, etc., and consumption data by process and end-use are contained in Facts for Industry Series M 17-1 and M 17-2]

[In thousands of pounds]

¹ Data for production and stocks held at crude oil mill locations collected by U. S. Department of Agriculture, October through December 1952.

² Included in "Other vegetable oils" to avoid disclosure of individual operations.

³ Data are on a commercial stocks basis and do not include figures for stockpiles of strategic oils.

⁴ Data on production collected by U. S. Department of Agriculture.

⁵ Excludes quantities used in refining.

⁶ Data not available.

⁷ Held by wool scourers.

⁸ Data from fish oil producers were collected by Fish and Wildlife Service, U. S. Department of the Interior.

⁹ Included in "sperm oil."

¹⁰ Not shown to avoid disclosure of individual operations.

¹¹ Winterized-deodorized oil, hydrogenated-deodorized oil and cooking and salad oil not included.

¹² Data prior to September 1951 for hydrogenated edible animal fats and oils included with other vegetable hydrogenated edible oils and fats.

¹³ Includes data for synthetic glycerin.

¹ Includes inspected, noninspected, retail, and farm slaughter.

² Prices are for beef steers, all grades, excluding western.

³ Excludes animals slaughtered under government account.

⁴ Includes slaughter under Emergency Government Relief Purchase Program in 1934-1935.

⁵ Prices are for lambs only; (sheep represent smaller part of animals slaughtered).

No. 794.—MEATS AND LARD—PRODUCTION, FOREIGN TRADE, AND CONSUMPTION BY KIND: 1943 TO 1951

[All quantities, except per capita, in millions of pounds of carcass weight equivalent. Edible byproducts are excluded. Production of pork excluding lard comprises weight of dressed hog carcass less head bones and less all carcass fat rendered into lard. Lard production represents rendered weight of lard, and lard exports represent rendered lard, including neutral lard. Federally inspected production omits production in Hawaii and Virgin Islands. Uninspected production is made up of farm and retail slaughter and all wholesale slaughter that is not Federally inspected. Commercial exports include commercial shipments to territories; they do not include USDA exports and shipments for Lend-Lease, UNRRA or other claimants, nor do they include shipments for military civilian feeding or voluntary relief feeding. Civilian consumption is calculated from production and foreign trade, with an allowance for changes in stocks, and with deduction of military takings, and of deliveries to USDA through 1947. See also *Historical Statistics*, series E 138, 142, 146, and 150 for total production of beef, veal, lamb and mutton, and pork.]

¹ Price received by farmers. Weighted season average 1946 to date, weighted calendar average earlier years. Season April-March.

² Imports for consumption beginning 1934, general imports prior thereto. Apparel wool for all years includes item "not finer than 40's" both free and dutiable. Carpet wool includes only Domskol, Smyrna, East Indian, Chinese, and similar wool without merino or English blood.

³ For the years 1930-35 the item "not finer than 40's" has been deducted from carpet wool totals reported by Department of Commerce and added to apparel wool, thus making entire series comparable.

⁴ Excludes 222,222,220 lbs. in 1942; 275,476,308 lbs. in 1943; 2,725,929 lbs. in 1944; 5,372,696 lbs. in 1945; and 14,840 lbs. in 1946, imported free of duty as an act of international courtesy. Wool so imported consisted almost entirely of wool stored in this country for the British Government, and later re-exported. This wool was not available to domestic mills.

⁵ Includes hair of angora goat, alpaca, and other like animals. Includes a small amount of carpet wool beginning 1943.

⁶ Production, minus exports, plus imports; stocks not taken into consideration.

⁷ Preliminary.

⁸ Scoured basis.

Source: Department of Agriculture, Bureau of Agricultural Economics; annual report, *Agricultural Statistics*. Exports and imports from Department of Commerce, Bureau of the Census; annual report, *Foreign Commerce and Navigation of the U. S.*

¹ Scoured wool, plus greasy wool reduced to a scoured basis, assuming average yields varying with class, origin, grade, and whether shorn or pulled.

² Wool regarded as more or less suitable for apparel purposes; formerly "Combing and clothing."

³ Includes raw wool consumed on woollens and worsted systems only. Raw wool consumed on cotton and other systems and by felt and batting manufactures amounted to about 10 million pounds in 1946.

Source: Department of Commerce, Bureau of the Census; monthly data are published in *Facts for Industry*, Series M15H.

26. Forests and Forest Products

The Bureau of the Census, Department of Commerce, and the Forest Service, Department of Agriculture, are the principal Government agencies engaged in the collection and publication of statistics of forest land, forest industries, and forest products. The Forest Service, through its forest survey activities, makes an inventory of the forest resource and measures rates of forest growth and drain. A number of reports for surveyed areas have been published. A report based on a reappraisal of the Nation's forest situation made during 1945 and 1946 was published in 1948. Statistics from this report are shown in tables 809-812. Other publications of the Forest Service include data on stumpage and log prices, lumber consumption and distribution, lumber used in manufacture, and fire statistics. The *Statistical Supplement to the Annual Report of the Chief of the Forest Service* carries statistics of the administration of the national forests.

The Bureau of the Census, Department of Commerce, publishes information on forest industries and products in reports of the Census of Manufactures, in addition to current *Facts for Industry* reports. The Bureau of the Census also publishes statistics of foreign trade in forest products. Information on the domestic movement of forest products is reported by the Interstate Commerce Commission and the Association of American Railways.

The Bureau of Agricultural Economics of the Department of Agriculture publishes annual reports on the production of turpentine and rosin.

The Bureau of Labor Statistics of the Department of Labor publishes statistics of wholesale lumber prices monthly and annually.

A number of forest products trade associations and trade journals collect and publish statistics of forest products, production, markets, shipments, inventories, etc.

The completeness and reliability of published statistics of forests and forest products vary considerably. The data for forest land area and stand are, of course, much more reliable for areas which have been surveyed than for those areas which have not been covered. Forest fire statistics for federal lands are considered much better than for private lands, though too much reliance should not be placed in any estimates of fire damage or causes of fires.

In the field of forest products, data for lumber production and other manufactured products such as veneer and plywood, pulp and paper, cooperage, naval stores, etc., are much more complete than for the primary forest products such as poles and piling, fuelwood, and fence posts. The data for lumber production are subject to certain limitations because of incomplete coverage. Information for pulp and paper, and plywood, on the other hand, is believed to have practically complete coverage. Statistics relating to average value of lumber sawed may be subject to some special limitations due to under representation of small mills.

For a historical summation of raw materials production, imports, exports, and consumption, which includes figures for forest products, see table 1056.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series F 69-73") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

Note.—This section presents data for the most recent year or period available on May 20, 1953, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

¹ In continental U. S.; includes National Forests, Interior, Soil Conservation Service, TVA, Public Domain, etc.

² In continental U. S. and Hawaii. Data reported to Forest Service by its field offices, cooperating agencies, other Government bureaus, and similar sources. Statistics on unprotected areas based on State estimates only.

³ Prior to 1939 forest area included total area needing protection. Beginning with 1939, this area included only forest area needing protection, which accounts for reduction in areas between 1938 and 1939.

No. 823.—LUMBER PRODUCTION, BY KIND OF WOOD, AND AVERAGE MILL VALUE: 1869 TO 1951

[Data not strictly comparable because of incomplete coverage of numerous small mills in the East prior to 1942 and exclusion of mills cutting less than 50 M ft. b. m. for all years prior to 1942 except 1869-1909, and 1919. Exclusion of under 50 M class of mills would affect totals less than 1 percent as reflected by 1942 survey. Data for 1943-46 and for 1949-51 are based on sample surveys and are subject to sampling errors; see source publications for evaluation of sampling reliability. See also *Historical Statistics*, series F 109-111 and F 120-122 for similar but not identical figures from Dept. of Agri. Forest Service]

* Includes 298,000,000 board feet of lumber not reported by kind of wood. * Not available.

* Includes 165,305,000 board feet of softwood lumber and 7,605,000 board feet of hardwood lumber sawed by New England mills from timber salvaged from the hurricane of 1938.

* Not available separately.

* Incense and western red cedars only; data for Port Orford cedar and eastern cedar not available separately.

* Less than 500,000 board feet.

¹ Reported in thousands for 1932 and prior years and converted on basis of 800 shingles to the square.² Included in "All other." ³ Includes figures for cedar lumber.⁴ Data not published to avoid disclosing operations of individual establishments.⁵ Not available. ⁶ Includes figures for birch. ⁷ Includes cottonwood and Douglas fir.

Source: Department of Commerce, Bureau of the Census (in cooperation with Department of Agriculture, Forest Service, and Tennessee Valley Authority); reports of Census of Manufactures and annual report, *Lumber, Lath, and Shingle Production*, Facts for Industry, Series M130.

No. 826.—LATH AND SHINGLES—PRODUCTION: 1899 TO 1952

Lath in thousands and shingles in squares. Shingles reported in thousands prior to 1933 and converted to squares on basis of 800 shingles to square. See headnote, table 823 for explanation of lack of comparability of statistics. Data for shingles reasonably comparable over a period of years, because of complete enumeration of Red Cedar Shingle Industry, this industry's production comprising over 90 percent of total shingle production.

YEAR	Lath	Shingles	YEAR	Lath	Shingles
1899	2,523,968	15,127,521	1943	189,512	¹ 3,736,961

¹ Figures for turpentine and rosin from crude gum, beginning 1929-30, and from wood beginning 1933-34, relate to crop year ended Mar. 31. All other figures relate to calendar years.

² Figures compiled from data reported by establishments in turpentine and rosin industry.

³ Figures compiled from data reported by establishments in Wood-Distillation Industry.

⁴ Not reported.

⁵ Includes, for 1909 and 1914, 366 barrels and 1,848 barrels respectively, of turpentine and, for 1914, 3,596 drums of rosin, reported by establishments engaged in manufacture of lumber and timber products.

⁶ Estimated by J. E. Lockwood; complete data not available. Figures include estimates of rosin produced from reclaimed gum, as follows: 1932-33, 26,720 drums; 1933-34, 28,048; 1934-35, 27,200.

⁷ Includes estimates by J. E. Lockwood for production of turpentine from steam-distilled wood.

⁸ Includes data for rosin produced from reclaimed gum: For 1935-36, 43,350 drums; 1936-37, 34,155; 1937-38, 21,017; 1938-39, 31,983; 1939-40, 31,414; 1940-41, 20,181; 1941-42, 19,765; 1942-43, 11,297; 1943-44, 9,824; 1944-45, 8,066; 1945-46, 8,538; 1946-47, 8,449; 1947-48, 4,345; 1948-49, 4,230; 1949-50, 2,230; 1950-51, 560; 1951-52, amount insignificant.

⁹ Prior to 1951-52, figures do not include data for rosin produced from reclaimed gum. See note 8.

27. Fisheries

The Fish and Wildlife Service, Branch of Commercial Fisheries, in the Department of the Interior, conducts annual surveys for various statistical information on the fishery industries. These data are published in greater detail in publications of the Service and include data on the volume of the catch of individual species of fish and shellfish and their value, employment in the fisheries, quantity of gear operated, the number of fishing and transporting craft employed in the capture and transporting of fishery products, employment in wholesale and manufacturing establishments, and volume and value of the production of manufactured fishery products. In addition to the basic statistics on employment, yield, and the production of manufactured fishery products for individual States and various geographical sections, there are included in reports data on imports and exports of fishery commodities; landings by fishing craft at Boston, Gloucester, New Bedford, and on Cape Cod, Massachusetts; at Maine ports; and Seattle, Washington; shad fisheries of the Hudson and Potomac Rivers; alewife fishery in the Potomac; seed oyster fisheries; a review of the Pacific Coast halibut fishery; a statement on whaling operations by United States firms; data on the sponge fishery; and lists of firms producing various manufactured fishery products. These data are summarized in the *Statistical Abstract*. The more detailed information may be obtained from the Fish and Wildlife Service, Washington 25, D. C.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series F 166-192") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

Note.—This section presents data for the most recent year or period available on May 20, 1953, when the material was organized and sent to the printer.

No. 835.—FISHERIES—SUMMARY OF TOTAL CATCH AND VALUE: 1930 TO 1952

[Includes Alaska beginning with 1941, data partly estimated. See also *Historical Statistics*, series F 155]

28. Mining and Mineral Products

This section summarizes the principal statistics relating to the mineral industries and mineral products. It includes not only crude minerals (such as coal, iron ore), but minerals which have gone through certain stages of preparation (such as refined copper, cement) and minerals such as magnesium whose extraction does not involve mining in the conventional sense. The latter two categories, while part of the mineral-raw-material sector of the economy, include the products of industries which are classified under the Standard Industrial Classification (Bureau of the Budget) as manufacturing.

The tables in this section are arranged in 4 groups which appear in the following sequence:

1. General summary statistics.
2. Fuels.
3. Nonmetals other than fuels.
4. Metals.

Most of the statistics are from the Bureau of Mines and the Bureau of the Census, with additional material from other Government agencies such as the Bureau of Labor Statistics, Bureau of the Mint, and the Interstate Commerce Commission and from non-Government sources such as the *Engineering and Mining Journal*, and *Metal Statistics*.

Mineral statistics, with principal emphasis on commodity detail, have been collected annually or at more frequent intervals by the United States Geological Survey or by the Bureau of Mines since 1880. The principal statistics have been published annually through 1931 in *Mineral Resources of the United States* and thereafter in the *Minerals Yearbook*. Data available from Bureau of Mines publications include quantities and values of minerals produced, sold or used by producers, or shipped; quantities of minerals stocked; crude materials treated and prepared minerals recovered; and consumption of mineral raw materials. The Bureau of Mines also collects and publishes separate data on man-hours, active days, length of shift, and accidents.

Censuses of mineral industries have been taken approximately every 10 years since 1840. The most recent Census taken, however, is for 1939. The statistics are collected and published in the Census volumes in such a manner as to relate the statistics on the production of the various minerals as nearly as possible to data on employment, principal expenses, fuels and power consumed, and other information available only for each establishment as a whole. Each establishment is classified according to its most valuable product. The data are also collected and compiled in a manner to permit integration with other Census statistics such as for manufactures and wholesale and retail trade. Commodity statistics on many of the manufactured mineral products are also collected by the Bureau of the Census at monthly, quarterly, or annual intervals.

To avoid misinterpretation, it should be noted that the Census of Mineral Industries statistics in table 855 relate to operations primarily engaged in extracting minerals and in such primary mineral-preparation activities (crushing, screening, washing,

Note.—This section presents data for the most recent year or period available on May 20, 1953, when the material was organized and sent to the printer.

flotation, etc.) as are needed to render the minerals marketable. Many of the statistics collected by the Bureau of Mines represent products of operations beyond the limits covered by the Census of Mineral Industries. Value totals based on Bureau of Mines publications, as shown in tables 847 to 849, are not wholly comparable with the Census value totals, as shown in table 855. Census values represent crude or prepared minerals f. o. b. the mine, well, or mineral-preparation plant. Bureau of Mines values for most nonferrous metals are based on the recovered value of contained metal rather than the value of the ores and concentrates as such and for certain nonmetals, such as cement, are based on the form in which the mineral is first generally marketed (even if a manufactured form) rather than on the imputed value of the mineral as first extracted.

In general, figures shown in the individual commodity tables include data for Territories and possessions, and may therefore not agree with summary table 849.

Data in other sections.—Data on mining and mineral products will also be found in other sections of this *Abstract*. For example, a historical summation of production and consumption of raw materials appears in section 32, Foreign Commerce (see table 1056); data on iron and steel, aluminum and magnesium, copper products, clay products, and others appear in section 30, Manufactures; financial data on mining corporations appear both in section 14, Federal Government Finances and Employment, and section 17, Business Enterprise; summary data for the Territories and possessions appear in section 33; for specific page references, consult the index.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series G 1-5") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

NO. 847.—VALUE OF MINERAL PRODUCTION IN THE UNITED STATES: 1881 TO 1951

[All figures in millions of dollars. Principal differences between old basis and new basis are as follows: (1) Totals on the new basis represent continental U. S. only; on the old basis, production in Alaska, Hawaii, Philippine Islands (through 1945) and Puerto Rico was included, but no data were collected for other U. S. possessions now shown in table 1090; (2) U. S. totals on the new basis are a better representation than formerly of the production of primary minerals from domestic mines (or concentrating mills); on the old basis, totals include secondary products and mineral products made from foreign materials. However, value on new basis still includes some advanced products, like cement, lime, and natural gas liquids; also, mine value of nonferrous metals is based not on ore, but on value after refining of the recoverable metal content. Revised data for years prior to 1925 on new basis are not available. See also *Historical Statistics*, series G 1-5.]

Undistributed.....		3,579		10,466		6,671		10,337

¹ Includes small quantity of anthracite mined in States other than Pennsylvania.
² Includes sharpening stones, included with "Nonmetallic minerals, undistributed."
³ Weight not reported.
⁴ W. H. and recorded.
⁵ Includes 5,338,000 short tons, \$2,987,000; 1948, 4,352,000 tons, \$4,320,000; 1949, 6,676,000 tons, \$4,573,000; 1950, 7,080,000 tons, \$3,754,000.
⁶ Value included with "Nonmetallic minerals, undistributed."
⁷ Excludes production from Wyoming, value for which is included with "Nonmetallic minerals, undistributed."
⁸ Excludes production from Wyoming, value for which is included with "Nonmetallic minerals, undistributed."
⁹ Excludes lignite stone, bituminous limestone, bituminous sandstone, and ground sandstone, all included elsewhere in table. Also excludes limestone for cement and lime.

¹ Comprises andalusite (1947-49), apatite, brucite, diatomite, dumortierite (1949), opson salts from serpentine stones, and specularite (1948-50), iodine, quartz crystal (1950), sharpening stones, sodium carbonate (W. H. 1948-49), and minerals indicated by footnote 4.
² Value included with "Metals, undistributed."
³ Less than 0.5 ton.
⁴ Comprises magnesium chloride for magnesium metal, zirconium concentrates, and minerals indicated by footnote 6.

No. 855.—MINERAL INDUSTRIES—SUMMARY FOR THE UNITED STATES: 1919, 1929, AND 1939

[Statistics cover producing operations only. In general, those for 1939 cover only those operations (or concerns producing crude petroleum, natural gas, and natural gasoline, and rendering oil- and gas-field services) for which total value of all products, reported principal expenses, cost of buildings, machinery, and equipment during year, or cost of drilling and equipping wells during year amounted to \$2,500 or more. For bituminous coal and lignite an output criterion of 1,000 tons of coal was substituted for value of all products. Statistics for common sand and gravel industry exclude data for operations that produce less than 15,000 tons of sand and gravel unless reported principal expenses or cost of buildings, machinery, and equipment during year amounted to \$15,000 or more. Statistics for 1929 cover, in general, only those "enterprises" for which total value of all products or cost of development work amounted to \$2,500 or more. Bituminous coal and lignite mines that produced less than 1,000 tons of coal and common sand and gravel operations that produced less than 25,000 tons of sand and gravel, were excluded. Statistics for 1919 exclude data for "enterprises" for which value of all products was less than \$500 or cost of development work was less than \$5,000. Noncommercial production of stone and sand and gravel obtained from mines or quarries operated by governmental agencies, public utilities, or by construction companies or contractors producing wholly for their own use or on contract for governmental agencies is excluded for all years. For summary data from 1939 Census of Mineral Industries by type of mineral industry, see 1949 Statistical Abstract, table 854]

ITEM	1939 (all in- dustries)	COMPARATIVE STATISTICS FOR 1939 AND 1929		COMPARATIVE STATISTICS FOR 1939 AND 1919

¹ Excludes statistics for common clay and shale, crude petroleum and natural gas, greensand, natural gasoline, peat, potash, and rock salt industries, for comparability with 1929.

² Excludes common clay and shale, common sand and gravel, glass-sand, foundry-sand, natural sodium compounds, peat, potash, and rock salt industries, and limestone mines and quarries operated in conjunction with cement and lime plants for comparability with 1919.

³ Includes value of crude minerals produced, value added during year by preparation processes, receipts for services performed for other concerns, and value of electric energy generated and sold.

⁴ Represents statistics for skilled and unskilled employees who perform manual labor, use tools, operate machines, handle materials, and care for property. Average numbers of wage earners were derived by adding numbers reported for each month and dividing sums by 12.

⁵ Represents statistics for salaried employees at operations and at central and branch offices, including officers of corporations, managers, superintendents, and other supervisory personnel, responsible professional and technical employees, and clerical employees. Number of salaried employees represents number receiving pay on a representative or normal day or payroll period—for 1939, during normal payroll period ending nearest Oct. 14; for 1929, on Dec. 14 or on nearest representative day; for 1919, on Dec. 15 or on nearest representative day. Salaries represent total amount paid to salaried employees during calendar year.

⁶ Represents statistics for proprietors and firm members at operations and at central and branch offices.

⁷ Census statistics not available.

⁸ For 1939 includes installation costs, which are excluded for 1929.

⁹ Statistics for 1939 and 1929 refer to equipment in use or available for use at end of year.

¹⁰ Includes equipment, with rating of 8,865 horsepower, operated by purchased power other than electric energy.

¹ Data relate to mines having output of 1,000 tons a year or more, including lignite and small output of anthracite produced outside Pennsylvania. Includes Alaska. ² Average number of men working daily.³ Capacity of active mines with existing labor force, derived on basis of average output per day.⁴ Not available.⁵ Beginning 1945, production data include some bootleg coal purchased by anthracite industry for preparation and shipment to market. Data on employment, however, exclude such purchased coal as complete employment data on "bootleg" holes are not available. ⁶ Less than 500 tons. ⁷ For 1911.Source: Department of Interior, Bureau of Mines; *Minerals Yearbook* and annual bulletins.

† Federal Power Commission. Represents consumption by public-utility power plants in power generation, including a small quantity of coke amounting to approximately 100,000 tons annually.

‡ U. S. Bureau of Census.

§ Association of American Railroads. Represents consumption by class I railways for all uses, including locomotive, powerhouse, shop, and station fuel. The I. C. C. reports that in 1951 consumption for all uses by class I line-haul railways, plus purchases for class II and class III railways, plus purchases by all switching terminal companies combined, was 56,196,152 tons of bituminous coal and lignite.

¶ Includes small amount of anthracite.

* Estimates based upon reports collected from a selected list of representative manufacturing plants and retailers.

† Included in "Other industries."

¹ Formerly designated "strikes and lockouts."

² Wages and hours were important issues also in some of these disputes. This is especially true in recent years.

³ Includes some duplication (where same workers were involved in more than 1 stoppage). This is particularly significant in 1949, since over 60,000 anthracite miners and over 300,000 bituminous coal miners were involved in 3 separate stoppages during year.

⁴ Totals include 6 stoppages, involving 500 workers and 2,000 man-days, in which issues were not reported.

No. 867.—NATURAL GAS AND NATURAL GASOLINE—PRODUCTION, BY STATES

[Gas in millions of cubic feet; gasoline in thousands of barrels of 42 gallons. Production figures for gas (except as noted) refer only to that used by the ultimate consumer, in addition to which considerable quantities are used by producers, and large quantities are wasted or lost. Consumption figures by States differ greatly from production figures by reason of interstate transportation]

¹ Excludes bonus payments of Office of Metal Reserve.

² Data are for "general imports," i. e., include copper imported for immediate consumption plus material entering country under bond. Comprises copper in ingots, plates, and bars, ores and concentrates, regulus, blister and scrap.

³ Not separately recorded.

⁴ Total exports of copper, exclusive of ore, concentrate, composition metal, and unrefined copper. Exclusive also of "other manufactures of copper," for which quantity figures are not recorded.

⁵ Includes unrefined copper.

⁶ Includes small exports of unrefined black blister and converter copper (bars, pigs, etc.)

⁷ Excludes rods.

⁸ Apparent consumption; consumers' inventories not taken into account.

⁹ New copper and old scrap only.

No. 893.—COPPER—EXPORTS AND IMPORTS: 1891 TO 1952

[Exports are those classed as "domestic" in foreign trade statistics but include copper smelted or refined in United States from imported ore or unrefined metal. Values include all forms of copper; quantities represent all copper except the small item, "Other manufactures." Copper content of exports of ore for years 1891-1915 and of imports for years 1894-1903 was estimated]

29. Construction and Housing

Construction.—Monthly estimates of the value of work put in place are probably the most widely used of the current Federal statistics on construction. These estimates are prepared jointly by the Department of Commerce and the Bureau of Labor Statistics.

Estimates of privately financed nonresidential construction are primarily the responsibility of the Department of Commerce. Construction estimates for buildings such as stores, warehouses, and factories are based on F. W. Dodge Corporation reports of construction contracts awarded, supplemented by building permit data and information from secondary sources for States which the Dodge Corp. does not cover. Public utility construction estimates are derived from data reported by the Interstate Commerce Commission and other Federal regulatory agencies, and by private associations such as the American Gas Association and the American Transit Association.

Estimates of publicly financed construction of all types and housing construction activity are primarily the responsibilities of the Bureau of Labor Statistics. A considerable number of Federal agencies administer construction programs or award contracts for construction; some of them engage in construction themselves. In this field, construction activity data are derived by the Bureau of Labor Statistics from the reports of the respective Federal agencies; data on State and local governmental construction activity are derived from F. W. Dodge Corporation and Engineering News Record reports. Estimates of residential construction activity, including number of housing units started by type of structure and source of funds, and average construction costs, are based primarily upon reports of building permits granted which are received from nearly 6,000 permit-granting authorities. Field surveys on a sample basis are used to obtain data on housing activity in nonpermit areas. Statistics on housing starts in certain metropolitan areas are available from the Bureau of Labor Statistics for 1946 through the first quarter of 1951. The current program of the Bureau of Labor Statistics provides monthly estimates of the number of housing starts in the nation as a whole, but the series on the local area data have been discontinued.

The Bureau of the Census has taken a Census of Construction for 1929, 1935, and 1939. The last census covered all persons or establishments whose principal business in 1939 was utilizing construction materials and labor in construction work for others, or for themselves for speculative and investment purposes on projects located within the limits of continental United States. Because the census excluded force account work, its coverage was substantially less than current estimates of value of work put in place.

Housing.—The first Census of Housing was taken in 1940 as part of the Sixteenth Decennial Census, although some housing data were collected by the Bureau of the Census in earlier years in conjunction with Censuses of Population and Agriculture. Housing data, in less detail but roughly comparable to those obtained in the 1940 Census, were collected in sample surveys by the Bureau of the Census in October 1944, November 1945, and April 1947 as part of the Current Population Surveys; also, sample data on selected characteristics were collected in May 1948. The 1950 Census

Note.—This section presents data for the most recent year or period available on May 20, 1953, when the material was organized and sent to the printer.

of Housing was the second Census of Housing; this census was authorized by the Housing Act of 1949, which provided also that a Census of Housing be taken decennially thereafter.

Urban and rural, farm and nonfarm residence.—A new definition was adopted for use in the 1950 Census in response to requests from many users of Census data for a more realistic classification by urban and rural residence. For this definition and additional explanation, see page 2. In the 1950 Census, the enumerators in rural areas were specifically instructed to base the farm-nonfarm classification of a dwelling unit on the respondent's answer to the question, "Is this house on a farm?" Farm residence is therefore determined without regard to the occupation of the members of the household. The classification depends upon the respondent's conception of what is meant by the word "farm," and consequently there is considerable variability of response among families living in areas where farm operation is part-time or incidental to other activities.

In rural areas, dwelling units are classified into rural-farm units which comprise all dwelling units on farms, and rural-nonfarm units which are the remaining rural units. In the 1950 Census of Housing, as in 1940 and earlier, farm housing was defined to include all housing on farms. However, in the 1940 and previous censuses, there was no specific exclusion of dwelling units for which cash rent was paid for the house and yard only, nor of institutions, summer camps, and tourist courts; moreover, the enumerators were not specifically instructed to report farm-nonfarm residence according to the respondent's reply to the question concerning location on a farm.

Dwelling unit.—In general, a dwelling unit is a group of rooms or a single room occupied, or intended for occupancy, as separate living quarters by a family or other group of persons living together or by a person living alone. Living quarters of the following types are not included in the dwelling-unit inventory: Rooming houses with five lodgers or more, transient accommodations (tourist courts, hotels, etc., predominantly for transients), and barracks for workers (railroad, construction, etc.).

The count of dwelling units in the 1950 Census may be considered comparable with the count in the 1940 Census. The enumeration of vacant units in the 1950 Census of Housing is not entirely comparable with the procedure used in the 1940 Census. Counts of total vacant units in 1950 are considered more inclusive than in 1940. In 1940, vacant units were enumerated only if they were habitable; vacant units which were uninhabitable and beyond repair were omitted. In 1950, all vacant units, whether or not dilapidated, were included if they were intended for occupancy as living quarters.

Residential financing.—Statistics on residential financing were collected on a sample basis as part of the 1950 Census of Housing. The survey covered nonfarm residential mortgaged properties, both owner and rental. The data are expressed in terms of mortgaged properties, number of mortgages, and outstanding mortgage debt. Construction mortgages were excluded.

Data on home mortgages and foreclosures, based largely on reports from major holders, are provided by the Home Loan Bank Board. The Federal Housing Administration compiles, from its records, data on its real estate financial operations, such as volume of mortgages insured, type of lending institution, etc. The Veterans' Administration also compiles, from its records, data on amounts and types of loans. For explanation of the relationship between the data obtained in the 1950 Census of Housing and those compiled from other sources, see Department of Commerce, Bureau of the Census, 1950 Census of Housing, Volume IV, *Residential Financing*.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series H 1-26") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

FIG. XLII.—NEW CONSTRUCTION ACTIVITY: 1930 TO 1952

[See table 901]

Source: Department of Commerce, Bureau of the Census. Data are from National Production Authority.

No. 901.—CONSTRUCTION IN THE UNITED STATES—ESTIMATED EXPENDITURES FOR PRIVATE AND PUBLIC CONSTRUCTION: 1915 TO 1952

[In millions of dollars. Represents value of work put-in-place during year; consequently differs from building permit and construction contract data which measure value of work started. In addition, coverage generally broader than permit and contract data. Includes value and cost of installation of equipment which is integral part of structure, but not that of machinery, shipbuilding, or land costs. See also *Historical Statistics*, series H 1-26.]

No. 903.—NEW PERMANENT DWELLING UNITS STARTED IN NONFARM AREAS, BY TYPE: 1920 TO 1952

[Figures are estimates covering construction of all new permanent family dwelling units in nonfarm area of United States, based upon building-permit reports, and from 1946, on building-permit information, supplemented by data from field surveys in non-permit-issuing places. This area consists of all urban and rural nonfarm places. Urban designation is applied to all incorporated places with a population of 2,500 or more in 1940, and, by special rule, to a small number of unincorporated civil divisions. Rural nonfarm construction includes all construction for nonagricultural use in unincorporated areas and incorporated places of less than 2,500 population. See also *Historical Statistics*, series H 40-45; data for 1941-1945 in historical volume include temporary units]

¹ Urban and rural nonfarm classification for 1920 and 1925 are based on 1930 Census; for 1930-52, on 1940 Census.

² Includes 1- and 2-family dwellings with stores. ³ Includes multifamily dwellings with stores.

⁴ Private construction costs based on permit valuation, adjusted for understatement of costs shown on permit applications. Public construction costs based on contract values or estimated construction costs for individual projects.

Source: 1920 and 1925, National Bureau of Economic Research; later years, Department of Labor, Bureau of Labor Statistics. Published in monthly releases and in the monthly pamphlet, *Construction*.

No. 904.—FEDERAL CONTRACT AWARDS FOR NEW CONSTRUCTION (VALUE), BY TYPE OF PROJECT: 1935 TO 1952

[In thousands of dollars. Includes force-account construction started, which is work done directly by Federal agency (not through contractor), using separate work force to perform nonmaintenance work on agency's own property. For Federal-aid programs, includes funds to be contributed by owner as well as Federal Government. Major additions and alterations considered new construction. Secret projects sometimes excluded]

No. 906.—CONSTRUCTION CONTRACTS AWARDED IN 37 STATES—VALUE OF CONSTRUCTION AND FLOOR SPACE OF BUILDINGS, BY CLASS OF CONSTRUCTION: 1925 TO 1952

[Public works and public utilities cover some projects not measurable in terms of floor space, such as highways, pipe lines, subways, etc. Statistics for the 37 States were not compiled for years prior to 1925, but available figures covering a varying number of States for earlier years have been published in the 1932 and previous issues of the *Statistical Abstract*. Figures for individual States and districts in table 907 represent value of construction contracts awarded in States and districts where work was actually done. See also *Historical Statistics*, series H 51-57]

[Values in millions of dollars; floor space in thousands of square feet]

YEAR	Total	Residential	Commercial ¹	Manufacturing buildings ²	Public works	Public utilities ¹	Educational	Hospital and institutional	Public buildings	Religious	Social and recreational	Miscellaneous non-residential

¹ Data for airports now included with "Public utilities"; prior to 1930, included with "Commercial."

² Data for pipe lines now included with "Public utilities"; prior to 1929, included with "Manufacturing buildings."

³ Excludes data for 23 Civil Works Program projects, valued at \$29,551,900, not available by class of construction.

⁴ Includes data for Atomic Energy Commission projects (\$90,000,000 in 1951 and \$923,000,000 in 1952) for which floor space data are excluded because of security restrictions.

⁵ Not shown separately; negligible amount with respect to total. ⁶ Data no longer reported.

No. 908.—CONSTRUCTION CONTRACTS AWARDED—INDEXES OF VALUE: 1920 TO 1952

[1947-49=100. Indexes are derived from monthly figures of construction contracts awarded reported by F. W. Dodge Corporation. Reports covered 37 States beginning with May 1924 and a varying number for earlier years. In order to obtain comparable figures from 1919 to date, total value of construction contracts awarded in 37 States was estimated for January 1919 through April 1924. Seasonal adjustments computed separately for "residential" and "all other" types of construction and the two series combined. Indexes based on a 3-month moving average, centered at middle month. More detailed description of indexes obtainable from the Division of Research and Statistics, Board of Governors of the Federal Reserve System]

No. 909.—ENGINEERING CONSTRUCTION CONTRACTS AWARDED AND BACKLOG OF PROPOSED CONSTRUCTION—VOLUME, BY TYPE: 1932 TO 1952

[In millions of dollars. Covers continental U. S. construction projects of following minimum costs: For 1932-35, waterworks, excavation, drainage, and irrigation, \$10,500; other public works, \$17,500; industrial buildings, \$28,000; other buildings, \$105,000. For 1936-45, minimums used were \$15,000, \$25,000, \$40,000, and \$150,000. For 1946-47, these minimums were raised to \$22,500, \$40,000, \$55,000, and \$205,000, respectively, to account for rise in construction costs. For 1948-50, minimums used were \$25,000, \$50,000, \$98,000, and \$250,000. For 1951-52, minimums used were \$34,000, \$60,000, \$82,000, and \$300,000]

**No. 911.—BUILDING CONSTRUCTION IN CITIES OF 50,000 OR MORE INHABITANTS—
VALUE OF ALL CONSTRUCTION AND NUMBER OF NEW DWELLING UNITS: 1948
TO 1952**

[Valuation figures are derived from estimates of construction costs made by prospective builders when applying for permits to build and value of contracts awarded by Federal Government. No land costs are included. For type of building covered see table 902. Cities shown had a population of 50,000 and over in 1950]

¹ American Appraisal Co. Average for 30 cities of 4 types of buildings: Wood frame, brick-wood frame, brick-steel frame, reinforced concrete. Mechanicals not included. Based on actual appraisal costs. Available for individual cities.

² Associated General Contractors of America. Wages and materials for 12 cities combined in 40-60 ratio. Wages, prevailing rates for hod carriers and common labor. Materials, weighted: Sand, gravel and crushed stone, 1; cement, 1; lumber, 1; hollow tile, 1/4; structural and reinforcing steel, 1/2.

³ Engineering News-Record construction cost index has 4 components: (1) Structural steel shapes, base price; (2) cement, which is 20-cities average but prior to July, 1948, was Chicago price only; (3) lumber, which until 1935 was 12 x 12 long leaf yellow pine wholesale at New York, and since 1935 is 2 x 4 S&S pine and fir in carload lots, ENR 20-cities average; (4) common labor, ENR 20-cities average of wage rates in force. ENR Building Cost index provides a more representative measure of building cost movement, the skilled labor trend having been substituted for the common labor trend in the ENR Construction Cost index, and the ENR Building Cost index computed.

⁴ E. H. Boeckh & Assoc., Inc. Individual series for 10 types of buildings for 20 areas. Weights based on studies of actual building costs—vary with different type of structures. Material prices are those paid by contractors to material dealers. Prevailing skilled and common wage rates from contractors. Base: United States average, 1926-29=100. Series given here is commercial and factory buildings, U. S. average converted to 1913=100 base.

⁵ Aberthaw. Until Mar. 31, 1946, New England, 7-story and basement (62' 4" x 202' 4"), reinforced concrete building built in 1914, repriced quarterly as a construction bid to duplicate original building; labor costs based on current experience with similar construction. Since Mar. 31, 1946, New England, composite of 36 major cost items in 3 multi-story and 2 one-story industrial buildings, including all mechanical trades, repriced using actual and estimated labor and material costs.

⁶ George A. Fuller Company. Composite of 36 major cost elements, in 3 commercial type buildings, including mechanicals, elevators, wiring, heating and ventilating, repriced.

⁷ Turner Construction Co. Eastern Cities. Own building cost experience applied to these factors: Labor rates, material prices, productivity of labor, efficiency of plant and management, competitive conditions.

⁸ Marshall and Stevens. Averages for 4 types of building: Fireproof protected steel, fireproof reinforced concrete, masonry, and frame. Designed to reflect normal costs in line with recognized or published prices of building materials, equipment, and labor. Base: U. S. average, 1926=100, converted to 1913=100 base.

⁹ Smith, Hinchman, and Grylls, Inc. Actual in-place costs, using building material costs, freight rates, skilled and unskilled labor rates and including labor efficiency and premiums, bidding competition, contractor profit margins and overhead. Figured with the contractor overhead are taxes, duration of projects, material expediting and labor procurement. This index is reported monthly on a 1926=100 base, converted to 1913=100 base.

¹ Includes PWA, subsistence homestead and Greenbelt town projects.

² Includes 50 PWA units completed in 1934.

³ Includes 60,489 units completed as war housing of which all but 2,698 units have been returned to low-rent use.

⁴ 2,469 permanent family war housing dwelling units have since been conveyed to local authorities for low-rent use under Public Law 475.

⁵ Units completed for emergency flood projects in Portland-Vancouver area.

⁶ Defense housing.

¹ "Occupied dwelling units" for 1940 and 1950 is not exactly same as "Families" for earlier years, but differences are so small as to be negligible. Count of families for 1900 and 1930 represents private families only; that for 1890, 1910, and 1920, includes small number of quasi-family groups which were counted as families in those years.

² Since population in private families was not tabulated separately for all years, population per occupied dwelling unit (or family) is based on total population (including population in quasi-households). See table 10, p. 14.

³ Not available.

⁴ For 1890 to 1920, "Farm" contains a small proportion of urban-farm families in addition to the rural-farm families. For changes in definition of "Farm," see "Farm and Nonfarm Residence," p. 3.

No. 927.—DWELLING UNITS—MORTGAGE STATUS OF NONFARM OWNER-OCCUPIED UNITS: 1890 TO 1950

For 1940 and 1950, mortgage statistics are for owner-occupied dwelling units in 1- to 4-dwelling unit structures without business. An owner-occupied dwelling unit was reported as mortgaged if property on which it was located had an indebtedness in form of a mortgage or deed of trust, or if occupants had contract to purchase property. For 1920 and earlier, mortgage data are for owner-occupied units in all types of structures. Although types of units for which mortgage data were reported are not the same for all censuses, differences are not large enough to invalidate comparisons]

CENSUS YEAR	Total owner-occupied dwelling units	Reporting mortgage status	MORTGAGED		Not mortgaged
			Number	Percent	
1890	2,923,671	2,923,671	809,933	27.7	2,113,738

No. 928.—DWELLING UNITS—CONTRACT AND GROSS MONTHLY RENT OF NONFARM RENTER-OCCUPIED UNITS: 1940 AND 1950

[In thousands of dwelling units. Contract monthly rent is rent contracted for, regardless of whether it includes furniture, heating fuel, electricity, cooking fuel, water, or other services sometimes supplied. Gross monthly rent is contract monthly rent plus reported average monthly cost of utilities (water, electricity, gas) and fuels such as wood, coal, and oil; if furniture was included in contract rent, reported estimated rent of dwelling unit without furniture was used in computation rather than contract rent]

30. Manufactures

Census of Manufactures.—The basic source of comprehensive data on manufacturing production is the Census of Manufactures conducted by the Bureau of the Census. The first Census of Manufactures covered the year 1809 and a census was taken at 10-year intervals in connection with the Decennial Census of Population up to and including 1899, with the exception of 1829. It was conducted at 5-year intervals from 1904 through 1919, and every other year from 1921 through 1939, but was suspended during the war period. The 1947 Census of Manufactures was the first to be taken since 1939. Present legislation provides for a Census of Manufactures to cover the year 1953 and every fifth year thereafter.

The 1947 Census of Manufactures covered all establishments primarily engaged in manufacturing, as defined in the 1945 revision of the Standard Industrial Classification sponsored by the Bureau of the Budget. This Census, as well as the Annual Survey of Manufactures, which is described below, covers operating manufacturing establishments only, omitting separate administrative offices and auxiliary units of operating establishments. Operating establishments, however, account for approximately 98 percent of total manufacturing employment. To the extent possible, this Census was conducted on an establishment basis. As a rule, the term "establishment" signifies a single plant or factory and is not necessarily identical with the business unit or company which may consist of one or more establishments. A company operating establishments at more than one location is required to submit a report for each location; also, companies engaged in distinctly different lines of activity at one location are required to submit separate reports if separate payroll and inventory records are kept for each activity. Census figures differ, therefore, from those prepared on a company basis. They also differ to some extent from other tabulations based on establishment reports, where the definition of an establishment as to location and line of activity is not so rigidly applied.

In the 1947 Census, reports were required from all establishments employing one or more persons at any time during the census year. In other recent censuses, establishments having less than \$5,000 value of products were designated as outside the scope of the census. The change in the minimum size limit in 1947 as compared with 1939 has not appreciably affected the comparability of the figures for these two years, except for data on number of establishments for a few industries.

Each of the establishments covered in the census was classified in one of 458 manufacturing industries in accordance with the industry definitions embodied in the Standard Industrial Classification system. Under this system of classification, an industry is generally defined as a group of establishments producing a single product or a more or less closely related group of products. This product or group of products is in turn said to be "primary" to that industry. Accordingly, an establishment is classified in a particular industry if its production of the primary products of that industry exceeds in value its production of any other group of products. In a few instances, however, the industry classification of an establishment is determined not only by the products it makes but also by the processes employed in making those products.

While some establishments produce only the primary products of the industry in which they are classified, it rarely happens that all the establishments in an industry specialize to this extent. The statistics on employment, payrolls, value added, inventories, and expenditures, therefore, reflect not only the primary activities of the

Note.—This section presents data for the most recent year or period available on May 20, 1953, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

establishments in that industry but also their activities of a secondary nature. For this reason the industry statistics usually cannot be directly related to statistics on the total shipments of commodities.

Comparative figures shown for 1939 are generally slightly lower than those published in the 1939 reports. The 1939 figures have been revised to exclude retail bakeries, machine-shop repairs, and some other types of establishments also omitted from the 1947 Census. Cost of materials and value of products for 1947 were not compiled for summary tables because of the duplication which arises in the combination of individual industries representing successive stages in the production of finished manufactures.

The Bureau of the Census is prohibited by law from publishing any statistics that disclose information reported by individual companies. Figures are, therefore, not shown for an industry or a geographic unit which is represented by only one or two companies, or by more companies when one or two companies produce a very large proportion of the combined output of all the companies. This restriction has no effect upon statistics by industry for the entire United States, or statistics for all industries within States and standard metropolitan areas. There are many instances, however, where this restriction makes it necessary to withhold figures for counties and cities, and for industries within States and areas.

Annual Survey of Manufactures.—This survey, which was conducted for the first time in 1949 and was repeated in 1950 and 1951, carries forward, for the intercensal years, the key measures of manufacturing activity covered in detail by the quinquennial Census of Manufactures. It is designed to yield estimates of general statistics (employment, payrolls, value added by manufacture, inventories, and capital expenditures) for industry groups, important individual industries, geographic divisions, States, and important cross-tabulations of major industry groups by division and by State.

The annual survey is based on a sample of approximately 45,000 out of a total of almost 250,000 manufacturing establishments. Included are all large plants and a representative sample of the much more numerous small plants. The large plants in the survey account for approximately two-thirds of total manufacturing employment in the United States.

The annual survey estimates vary from the totals that would have been obtained from a comparable complete canvass of all manufacturing establishments. The relative magnitude of this sampling variation, expressed in percentage form, is given in the table column captioned "Standard error." The standard error should be interpreted to mean that the sample estimates will differ from complete canvass totals by *less than*: (a) the percentage shown in approximately 2 cases out of 3; (b) twice the percentage shown in approximately 19 cases out of 20; and (c) three times the percentage shown in almost every case. It should be noted that standard errors are shown only for selected items. The standard errors of other measures are shown in the source report cited.

In making any study of the historical trend of the 1947, 1949, 1950 and 1951 figures, it is important to take account of the effect of the sampling variation on the apparent increase or decrease shown between years. In addition to sampling errors, individual figures may be subject to biases arising from undetected response or procedural errors which are not reflected in the "standard errors." In general, figures are withheld from publication in the original source volumes if (a) the standard error of the estimate exceeds 15 percent, or (b) survey estimates are inconsistent with other census series and related data. It must be noted that any estimate which can be derived by subtraction of one published figure from another may have a standard error considerably in excess of 15 percent.

The basic statistical measures of manufacturing activity, such as employment, payrolls, value added, etc., were defined in essentially the same way for the annual surveys

as for the quinquennial census. Consequently, historical series shown in the following tables may be considered to be comparable except as specifically noted. It should be pointed out that for 1949, 1950, and 1951, average employment was calculated from the figures reported for the pay periods ending nearest the fifteenth of March, May, August, and November, whereas for 1947 such averages were based on twelve monthly employment figures.

Current and other statistics.—Monthly, quarterly, and annual commodity surveys are also conducted by the Bureau of the Census. These data are published currently in the *Facts for Industry* series. This series also includes releases of information collected by or for the War Production Board and successor agencies during the war and reconversion periods by the Census Bureau or other Federal agencies.

Reports on current activities of industries, or current movements of individual commodities, are also compiled by trade associations and trade journals, commercial agencies, and by such governmental bureaus as Labor Statistics, Agricultural Economics, Foreign and Domestic Commerce, Fish and Wildlife Service, Tariff Commission, and Internal Revenue, in addition to the Census Bureau previously mentioned.

Abbreviated balance sheet and income account data on all United States manufacturing corporations are compiled and published annually by the Bureau of Internal Revenue from corporation income and profits tax returns and holding company returns.

Data on financial operations and intercorporate relations of manufacturing corporations are collected from time to time by the Securities and Exchange Commission, the Tariff Commission, the Federal Trade Commission, and special investigating agencies. Financial statistics for certain manufacturing industries in the form of balance sheets, profit and loss statements, analyses of sales and expenses, lists of subsidiaries, types and amounts of security issues, and selected data on the salaries paid to officers and directors, are summarized and published for the leading corporations that are registered with the Securities and Exchange Commission. The Tariff Commission publishes commodity surveys which cover economic and competitive aspects of production, distribution, and international trade in selected important industries. Each survey deals with several products which are related because of the raw materials consumed, or competitive uses. The Federal Trade Commission has made several comprehensive studies of individual industries.

Material in other sections.—In addition to the statistics presented in this section, statistics on the output and activities of manufacturers will be found in various other sections of the *Statistical Abstract*. For example, a historical summation of production and consumption of raw materials appears in section 32, Foreign Commerce (see table 1056); data on wages and hours appear in section 8, Labor Force, Employment, and Earnings; statistics on manufacturing corporations compiled from corporation income tax returns appear in section 14, Federal Government Finances and Employment, and in section 17, Business Enterprise; and statistics on lumber production in section 26, Forests and Forest Products. For page references to the commodity or industry, consult the index. For references to the important sources of statistics on manufacturing and related activities, see the listings under the appropriate subjects in the "Bibliography of Sources of Statistical Data," page 969.

Geographic coverage.—Statistics in this section relate to continental United States except as noted.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series J 1-12") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

¹ Beginning 1939 includes data for employees of manufacturing establishments engaged in distribution and construction work. Extent to which data for such employees were included in figures for earlier years is not known.

² Data for 1940-50 based on pay periods ending nearest 15th of Mar., May, Aug., and Nov. For 1947, data represent average of 12 monthly figures; for earlier years, sum of average number of production workers for year and number of nonproduction workers reported for 1 pay-roll period (usually in October).

³ Value of products less cost of materials, supplies, fuel, electricity, and contract work. For 1849-1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture.

⁴ Not available. ⁵ Reduced to gold basis. ⁶ Excludes data for salaried officers of corporations.

⁷ Revised on basis of retabulation of returns to exclude data for establishments classified as nonmanufacturing in 1947. Value added by manufacture on a basis comparable with 1937 and previous years, was \$24.7 billion.

⁸ Number of proprietors and firm members not revised. Figures for "All employees" revised on basis of estimates rather than by retabulation of 1939 reports. (See footnote 7.)

⁹ Estimates based on sample survey; see text, p. 782. For standard errors of estimates, see subsequent tables.

¹⁰ Figures include data for plants idle throughout year, administrative offices, and units auxiliary to manufacturing.

¹ See text, p. 782, for explanation of standard error. Standard errors for column A are approximately the same as corresponding standard errors for column B for "Number of establishments"; and are 5 percent or less for "All employees" and "Value added." Standard errors for column D are: From 5 to 8 percent for apparel and related products, lumber and products, petroleum and coal products, and leather and leather products; and from 1 to 4 percent for textile mill products, fabricated metal products, transportation equipment, and instruments and related products. Other estimates in columns D, E, and F, unless otherwise indicated, are based on reports from all establishments known to be in appropriate size classification.

² Standard error 1 percent.

³ Standard error 3 percent for "Number of establishments," 2 percent for "All employees," and 2 percent for "Value added."

⁴ Withheld because estimate did not meet publication standards. See text, p. 782.

⁵ Data for any size class which cannot be shown without disclosing information for individual companies have been combined with figures for adjacent size class.

⁶ Standard error 3 percent for "Number of establishments," 4 percent for "All employees," and 4 percent for "Value added."

⁷ Data for logging industry and for sawmills producing less than 200,000 board feet of lumber included in these estimates.

⁸ Standard error 2 percent.

⁹ Standard error 5 percent for "Number of establishments," 6 percent for "All employees," and 30 percent for "Value added."

¹⁰ Based on number of employees reported as of mid-March under Old-Age and Survivors Insurance Program.

¹ Value added by manufacture; value of shipments not used for concentration ratios because of excessive duplication in these industries owing to the fact that the products of some establishments of this industry are used as materials by other establishments also classified in this industry. Rank determined by value of shipments, however.

¹ Figures include data for plants idle throughout year; for 1950, such data are included only in figures for "All industries" and major industry group totals.

² Value of products less cost of materials, supplies, fuel, electric energy, and contract work.

³ See text, p. 782, for explanation of standard error. Refers to columns "All employees—Number (average for the year)"; standard errors of estimates for other columns usually of same magnitude.

⁴ Includes estimates for administrative office and auxiliary unit employment.

⁵ Withheld because estimate did not meet publication standards. See text, p. 782.

⁶ Totals include industries not shown separately.

Source: Department of Commerce, Bureau of the Census; advance report of 1951 Annual Survey of Manufactures.

No. 944.—MANUFACTURES—GENERAL STATISTICS, BY INDUSTRY: 1947 AND 1939

[Figures for 1939 adjusted for comparability with 1947. See text, p. 781]

¹ Includes all full-time and part-time production and related workers, force-account construction workers, clerical and routine office workers, administrative, supervisory, sales, technical, and all other personnel on the payrolls of manufacturing establishments. Excludes employees of central administrative offices operated by concerns having 2 or more manufacturing establishments. Wages and salaries represent the gross earnings of employees including commissions, dismissal pay, nonproduction bonuses, vacation and sick leave pay, and compensation in kind, and prior to such deductions as employees' social security contributions, withholding taxes, group insurance, union dues, and savings bonds.

² Value of products less cost of materials, supplies, fuel, electricity, and contract work.

³ There were no establishments classified in this industry in 1939.

¹ Value of products less cost of materials, supplies, fuel, electric energy, and contract work.

² Includes data for plants idle throughout year, administrative offices and units auxiliary to manufacturing.

³ See text, p. 782, for explanation of standard error. Refers to column "All employees—Number"; standard errors of estimates for other columns usually of same magnitude.

⁴ Data for logging industry and for sawmills producing less than 200,000 board feet of lumber included in estimates for 1951, but excluded from figures for 1947.

⁵ Includes privately owned and/or operated establishments classified in "Ordnance and accessories." Government owned and operated establishments excluded from annual survey.

Source: Department of Commerce, Bureau of the Census; advance reports of 1951 *Annual Survey of Manufactures*.

¹ Includes data for plants idle throughout year, administrative offices and units auxiliary to manufacturing.² Value of products less cost of materials, supplies, fuel, electric energy, and contract work.³ See text, p. 782, for explanation of standard error. Refers to columns "All employees—Number (average for the year)"; standard errors of estimates for other columns usually of same magnitude.⁴ Data for North Dakota and South Dakota combined because of high standard errors associated with each State.

¹ Includes all full-time and part-time production and related workers, force-account construction workers, clerical and routine office workers, administrative, supervisory, sales, technical, and all other personnel on payrolls of manufacturing establishments. Excludes employees of central administrative offices operated by concerns having 2 or more manufacturing establishments. Wages and salaries represent gross earnings of employees including commissions, dismissal pay, nonproduction bonuses, vacation and sick leave pay, and compensation in kind, and prior to such deductions as employees' social security contributions, withholding taxes, group insurance, union dues, and savings bonds.

² Value of products less cost of materials, supplies, fuel, electricity, and contract work.

³ Figures will not add to totals because of rounding.

NO. 948.—MANUFACTURES—EXPENDITURES FOR NEW PLANT AND EQUIPMENT, BY INDUSTRY GROUPS: 1947, 1950, AND 1951¹

Dollar figures in thousands. 1950 and 1951 figures based on sample and subject to sampling variation. See text, p. 781. 1947 and 1950 figures exclude expenditures: (1) for plant under construction but not in operation; (2) for plants idle throughout year; (3) for nonmanufacturing establishments of manufacturing companies; (4) for plants and equipment leased to manufacturers by owners; and (5) for used plant and equipment acquired from others. 1951 figures include, for the first time, expenditures for plants under construction but not in operation[.]

¹ Smaller establishments submitting "short" form reports were not requested to include data on capital expenditures. Resulting understatement is negligible (see Ch. VI of Vol. I, "General Summary," *Census of Manufactures, 1947*).

² See text, p. 782, for explanation of standard error. Refers to total expenditures columns. Standard errors for new machinery columns approximately same as those for total expenditures; for new structures columns, vary, usually between 1 and 3 times the standard errors shown for total expenditures, up to a maximum of 15 percent for published totals.

³ Not fully represented in sample; capital expenditures understated by approximately 1 to 10 percent; corresponding understatement of "All industries" total is less than 0.5 percent.

⁴ Withheld because estimate did not meet publication standards. See text, p. 782.

¹ Smaller establishments submitting "short" form reports were not requested to include data on capital expenditures. Resulting understatement is negligible (see Ch. VI of Vol. I, "General Summary," *Census of Manufactures, 1947*).

² See text, p. 782, for explanation of standard error. Refers to total expenditures column. Standard errors for new machinery column approximately same as those for total expenditures; for new structures column, vary, usually between 1 and 3 times the standard errors shown for total expenditures, up to a maximum of 15 percent for published total. ³ Withheld because estimates did not meet publication standards.

⁴ Excludes data for establishments under construction; withheld to avoid disclosure of data for individual companies.

NO. 948.—MANUFACTURES—EXPENDITURES FOR NEW PLANT AND EQUIPMENT, BY INDUSTRY GROUPS: 1947, 1950, AND 1951¹

Dollar figures in thousands. 1950 and 1951 figures based on sample and subject to sampling variation. See text, p. 781. 1947 and 1950 figures exclude expenditures: (1) for plant under construction but not in operation; (2) for plants idle throughout year; (3) for nonmanufacturing establishments of manufacturing companies; (4) for plants and equipment leased to manufacturers by owners; and (5) for used plant and equipment acquired from others. 1951 figures include, for the first time, expenditures for plants under construction but not in operation.

¹ Smaller establishments submitting "short" form reports were not requested to include data on capital expenditures. Resulting understatement is negligible (see Ch. VI of Vol. I, "General Summary," *Census of Manufactures, 1947*).

² See text, p. 782, for explanation of standard error. Refers to total expenditures column. Standard errors for new machinery column approximately same as those for total expenditures; for new structures column, vary, usually between 1 and 3 times the standard errors shown for total expenditures, up to a maximum of 15 percent for published total. ³ Withheld because estimates did not meet publication standards.

⁴ Excludes data for establishments under construction; withheld to avoid disclosure of data for individual companies.

¹ Includes data for Hawaii for all years and data for Puerto Rico beginning with Aug. 1, 1928.

² Separate accounts for alcohol produced at industrial alcohol plants required commencing May 1, 1929.

³ Through 1940, represents *withdrawals* of all products for denaturation, that is, domestic ethyl alcohol, spirits produced by registered distilleries (redesignated upon receipt at denaturing plants as alcohol), and rum. Beginning 1944, represents all products (except rum) used for denaturation, that is, domestic ethyl alcohol, imported ethyl alcohol, and spirits. Rum is included for 1935 and 1940 because denaturated rum is included with specially denaturated alcohol for those years.

⁴ Prior to 1944 includes denaturated rum.

⁵ Represents gross production. Net production (gross production minus products used in redistillation) for 1945, 650,089,874.

¹ Barrels of 31 wine gallons.

² Excludes ethyl alcohol.

³ A tax gallon for spirits of 100 proof or over is equivalent to the proof gallon. For spirits of less than 100 proof the tax gallon is equivalent to the wine gallon.

⁴ Excludes high-proof spirits and unfinished spirits produced at registered distilleries for industrial purposes.

⁵ Includes ethyl alcohol.

⁶ Excludes vermouth and other aperitif wines.

⁷ Production represents total amount removed from fermenters, including distilling material (substandard wines produced with excessive water or residue materials). In 1952, 354,886,942 gallons of distilling materials were produced.

⁸ Standard United States gallon.

⁹ Excludes distilling materials.

¹⁰ Includes champagne, other sparkling wines, and artificially carbonated wines.

¹¹ Tax is payable on each $\frac{1}{2}$ pint or fraction thereof in each bottle or container.

¹ Includes scrap chewing tobacco.

² Number of factories on Jan. 1, 1952: Tobacco and snuff (excluding 169 "quasi" manufacturers), 270; cigars, 1,478; cigarettes, 46.

Source: Treasury Department, Bureau of Internal Revenue; *Annual Report of the Commissioner*.

No. 957.—TOBACCO, LEAF—AMOUNTS CONSUMED IN THE MANUFACTURE OF CIGARS, CIGARETTES, CHEWING AND SMOKING TOBACCO, AND SNUFF: 1896 TO 1951

[All figures in thousands of pounds. Figures represent the equivalent in unstemmed leaf tobacco of stemmed leaf or scraps, cuttings, and clippings. In the following table the tobacco used in the manufacture of cigars and cigarettes was converted on the basis of 3 pounds of stemmed leaf or scraps, etc., to 4 pounds of unstemmed beginning 1915 (conversion prior to 1915 was at the ratio of 3 to 5) and of tobacco and snuff beginning 1903. For 1896 to 1902, tobacco used in manufactured tobacco and snuff was shown only under two heads, namely, "leaf" and "scraps." It is probable that stemmed leaf was included with unstemmed tobacco under the head of "leaf" without the one kind being converted to the equivalent in the other. The conversion ratio of 3 to 4 was applied only to "scraps" for these years. Data exclude tobacco used in bonded manufacturing warehouses. See also *Historical Statistics*, series J 171, for annual total consumption]

¹ 4th quarter data for tire cord not woven included with chafer fabrics.² Included with tire cord fabrics woven.³ Not available.⁴ Rayon only.Source: Department of Commerce, Bureau of the Census; 1939 and 1947 Census of Manufactures reports, and *Facts for Industry*, Series M15A.

No. 960.—COTTON-SYSTEM SPINDLES, COTTON CONSUMPTION, AND STOCKS: 1840 TO 1952

[Statistics for 1915 to 1949 relate to 12 months ending July 31 and those for prior years to 12 months ending Aug. 31. For 1945-49, spindles in place include all cotton-system spindles in place regardless of fiber spun. Prior to 1945, "in place" figure represents all spindles in place used exclusively for spinning cotton. Consumption and stocks are expressed in running bales, counting round as half bales, except that all figures, 1840 to 1870, inclusive, and foreign cotton for all years are in equivalent 500-pound bales. See also *Historical Statistics*, series J 179-180 for data on active cotton-system spindles in the U. S. and total cotton consumed including linters.]

¹ For 1945 and earlier years data represent sum of greatest number of cotton spindles reported by each mill as active at any time during year, regardless of length of time operated. Beginning with 1946, active figure includes all cotton-system spindles active last day of year, regardless of type of fiber spun. On August 2, 1952, there were 19,933,000 spindles active on cotton, 1,159,000 on synthetics, 217,000 on other fibers and blends, and 1,907,000 idle.

² Includes linters for 1840 to 1908. Figures for all years include foreign and domestic cotton.

³ Not available. ⁴ Cotton mills only.

⁵ Includes stocks held in public storage and at compresses beginning 1938.

⁶ Includes linters for 1906 to 1908. ⁷ Average, 1909 and 1910.

⁸ "Upland" includes "American-Egyptian" beginning 1912 (first year produced).

Other woven fabrics, not classified above ⁴	29,806	36,887	62,866	99,328	119,760

¹ Includes estimated production for a few mills not reporting; estimates distributed by fabric classification.

² Included with "All other flat fabrics" to avoid disclosing data for individual establishments.

³ Included with "All other 100 percent spun rayon and/or acetate fabrics" to avoid disclosing data for individual establishments.

⁴ Fabrics containing 51 percent or more rayon and/or acetate by weight, without separation as to type of yarn used; includes filament, spun and mixtures of rayon and/or acetate and other fibers.

⁵ Includes fabrics made of glass, acrylic, and other synthetic fibers and mixtures not chiefly cotton, wool, rayon, or acetate.

Carpet and rug looms	9,796	9,821	10,267	6,557	5,683

¹ Data for 1899, 1914, and 1929 include estimates to provide for these machines in knitting mills. 1929 data also include estimates on number of woolen spinning spindles and worsted cards in knitting mills.

² Data not available.

³ 1943 and other years not strictly comparable. Census of Manufactures for 1899, 1914, 1929, and 1947 called for a report on looms from those mills whose principal products were wool and hair goods while 1943 inquiry covered all mills consuming weaving yarns spun on woolen or worsted spinning spindles. Includes pile fabric looms conforming with these definitions.

No. 971.—CHEMICALS—PRODUCTION, BY KIND, 1939 TO 1952

[Data for chemicals shown are restricted to a selected group comprised for the most part of inorganic chemicals and related products which are sufficiently important economically to justify publication. Data for production by Government-owned arsenals, ordnance works, and certain plants operated for Government by private industry are excluded, except that data for chemicals manufactured by Tennessee Valley Authority are included]

CHEMICAL AND BASIS	Unit	1939	1947	1950	1951	1952
Ammonia, synthetic anhydrous.....	Short tons..	310,822	1,114,000	1,565,569	1,767,043	2,053,786

¹ Preliminary. ² No comparable data.³ Excludes byproduct coke-oven production. Data for 1950-1952 include synthetic ammonium sulfate produced in coke plants, as well as quantities produced for the account of Department of the Army.⁴ Proportion of estimate, 5 percent. ⁵ Not shown separately to avoid disclosure of individual operations.⁶ Includes data for deodorizing, decolorizing, and water purification grades. Data for gas-mask solvent recovery grades excluded.⁷ Excludes quantities produced and consumed in the same plants manufacturing soda ash.⁸ Total production including quantities liquefied for use, storage or shipment.⁹ Includes data for molybdate chrome orange.¹⁰ Excludes quantities produced and consumed in manufacture of methanol and ammonia but includes an unspecified amount of hydrogen produced for sale or interplant transfer to plants consuming this gas in production of ammonia.¹¹ Includes quantities diverted to manufacture of caustic soda and sodium bicarbonate and quantities processed to finished light and finished dense soda ash.¹² Excludes quantities converted to finished dense soda ash.¹³ Collected in cooperation with Bureau of Mines.¹⁴ Proportion of estimate, 5 percent or less.¹⁵ Liquid production figures represent total production for each process, including quantities later evaporated to solid caustic and reported as such.¹⁶ Includes sulfuric acid of oleum grades.Source: Department of Commerce, Bureau of the Census; 1939 and 1947 Census of Manufactures reports; 1950-52 compiled from manufacturers' reports and published in *Facts for Industry*, Series M19A. Monthly data published currently.

¹ Represents type of high explosives approved by Bureau of Mines as suitable for safe use in coal mines provided specifications of use are followed.

² Includes 16,562,000 liquid oxygen explosive in 1947, 15,620,000 in 1948, 13,922,000 in 1949, 13,804,000 in 1950, and 20,341,000 in 1951.

³ Includes 13,742,000 liquid oxygen explosive in 1950, and 20,268,000 in 1951.

⁴ Includes 62,000 liquid oxygen explosive in 1950 and 72,000 in 1951.

⁵ Sold by manufacturer but later returned unused.

¹ Production for Kentucky, Tennessee, and Texas included with Maryland and West Virginia.

² Production for Michigan included with Indiana; production for Minnesota included with Colorado, Utah, and California.

³ Production for Tennessee and Alabama included with Virginia, West Virginia, and South Carolina.

⁴ Includes production for Indiana, Illinois, Iowa, Colorado, and Washington.

¹ Includes skeel beginning 1922.

² Merchant bars include concrete reinforcement bars and, beginning 1934, certain miscellaneous bars previously included in "All other finished rolled production."

³ Average for years 1887-90.

⁴ Average for years 1902-05.

⁵ Average for years 1892-95.

⁶ Average for period July 1, 1897, to Dec. 31, 1900.

⁷ Average for period July 1, 1903, to Dec. 31, 1906.

⁸ Small structural forms not included in 1911.

No. 988.—IRON AND STEEL—AGGREGATE EXPORTS: 1890 TO 1952

[Covers products listed in table 989; excludes data for highly elaborated products of iron and steel. Value figures through 1920 exclude, and those beginning 1923 include data for small items for which quantity figures are not available. Ferromanganese data included for all years. Data for steam and hot-water heating boilers and radiators, formerly classified as heavy iron and steel products, excluded beginning with 1923]

[Quantities in thousands of short tons (2,000 pounds); values in thousands of dollars]

No. 993.—COPPER AND COPPER-BASE ALLOY ROLLED, DRAWN AND EXTRUDED PRODUCTS—SHIPMENTS, BY KIND: 1939 AND 1947

In short tons (2,000 pounds). Covers shipments and interplant transfers of copper and copper-base alloy products, including production of these items consumed by producing plant in manufacturing fabricated products. These figures, therefore, represent gross shipments of copper and copper-base alloy products. 1939 figures for copper-base alloys refer to brass and bronze products only; figures for other copper-base alloys excluded and to this extent data not comparable with 1947. Data on shipments, interplant transfers, and produced and consumed in same plant have been combined since data are not comparable for each of these measures separately. Some establishments which reported rolling mill and fabricating operations at same location in 1939 treated each of these operations as separate establishments in 1947. For this reason some of tonnage reported as produced and consumed in same establishment in 1939 was considered as interplant transfers in 1947]

PRODUCT	1939	1947
Copper and copper-base alloy wire and cable, bare and tinned.....	381,666	911,207
Unalloyed copper.....	336,603	835,927
Copper-base alloy.....	45,063	75,280
Other copper and copper-base alloy rolled, drawn and extruded products.....	842,027	1,526,783
Unalloyed copper:		
Rod and bar.....	¹ 204,903	477,196
Plate, sheet, and strip.....	107,707	165,438
Pipe and tube.....	72,795	185,910
Copper-base alloys:		
Rod.....	¹ 135,156	242,542
Shapes, drawn, and extruded.....	² 6,357	28,611
Plate, sheet, and strip.....	221,224	329,467
Plate and tube.....	93,885	97,619

¹ Excludes tonnage of rods reported as produced and consumed in same establishment, most of which was consumed in production of wire, rather than fabricated products.

² Includes extruded shapes only.

No. 997.—SALES OF HOME APPLIANCES, 1940 TO 1952, AVERAGE RETAIL PRICE, 1952, AND HOMES OWNING AND WITHOUT APPLIANCES, JANUARY 1953

[In thousands of units, except light bulbs and tubes in millions. Compiled from sales reports and estimates of associations and manufacturers, and from Census Bureau surveys of manufactures. Sales figures represent manufacturers' shipments. Unless otherwise specified, figures are for electric appliances only. Estimates for homes owning appliances and homes without appliances are based on the accumulation of yearly sales totals with certain allowances for replacement, trade-ins, junking, and other factors]

FIG. XLIV.—INDEXES OF DEPARTMENT STORE SALES AND STOCKS: 1919 TO 1953
[See table 1024]

Source: Board of Governors of the Federal Reserve System.

31. Distribution and Services

Including Advertising

Data in this section relate to continental United States.

For additional or related data on distribution and service trades other than those included in this section, consult the index.

CENSUS OF BUSINESS

The primary source of data on distribution and services is the Census of Business. The first Census of Business covered the calendar year 1929. Although the next was scheduled by law to cover the year 1939, two special censuses covering the years 1933 and 1935 were taken before the regular 1939 census conducted as part of the 16th Census of the United States.

In accordance with the provisions of the act of June 19, 1948, the Business Census has been separated from the decennial censuses and is to be conducted at 5-year intervals. The first Business Census under the new act was taken in 1949 covering the year 1948. The results have been brought together and issued in seven area and subject volumes.

The business establishments covered in the fields included in the Census of Business may be generally described as follows:

Retail trade.—Places of business primarily engaged in selling merchandise for personal, household or farm consumption;

Wholesale trade.—Establishments primarily engaged in selling goods to dealers and distributors for resale or to purchasers who buy for business uses; and,

Service.—Establishments engaged primarily in the sale of services as contrasted with the sale of merchandise.

The censuses taken for 1929, 1935, and 1939 included information on the distribution of manufacturers' sales showing the proportion of manufacturers' output flowing through various distribution channels. Similar information is not available for the 1948 Census.

The 1948 Census of Business, for the first time, incorporates information on retail warehouses and wholesale and retail administrative offices and other auxiliary units in basic tables. In the case of retail and wholesale trade, separate data for these units for States, metropolitan areas, and counties are presented in Area Bulletins. For service trade, no separate data for these units are presented, but statistics for them have been incorporated with data for operating establishments and are an integral part of all tables.

The most important differences in scope among the four Censuses of Business are to be found in the coverage of service enterprises. Service establishments for the most part were not included in the 1929 Census of Business. The 1933 Census of Business was expanded to include certain service enterprises. These can be broadly classified into the following five major groups: (1) personal services, such as barber shops, laundries, etc., (2) selected business services, (3) repair services, (4) places of amusement, and (5) hotels. The 1935 Business Census added a number of important businesses among which were banking and finance, motor transportation, real estate agencies, warehousing, insurance, and radio broadcasting. The types of business added in 1935 were dropped in 1939 along with a number of minor types of service business. The most significant changes in scope of the service phase of the 1948 Census of Business from the scope of the 1939 Census are exclusion (in whole or substantial part) of the 1939 Census groups entitled "Services Allied to Transportation," and "Custom Industries."

Note.—This section presents data for the most recent year or period available on May 20, 1953, when the material was organized and sent to the printer.

It is important, also, to take cognizance of the kind of businesses, broadly defined, not included in any Census of Business. Outstanding in this group are the business activities of doctors, lawyers, dentists, and others performing a professional or scientific service, educational institutions, religious or charitable institutions, hospitals and infirmaries, public utilities, and government operated enterprises. In the past, these types of economic activity have been omitted largely because of problems in obtaining information or because reasonably adequate data were already available from other sources.

Many of the tables shown in this section contain comparative data from the various Censuses of Business. Adjustments have been made in the figures to make allowances for the changes in scope among the various years compared.

CURRENT STATISTICS

Wholesale trade.—Monthly statistics on trends in sales and inventories of merchant wholesalers, by kinds of business and by geographic divisions, are compiled and published by the Bureau of the Census. These data are based on the reports of approximately 4,000 establishments. Using these survey data as a basis, monthly estimates of aggregate sales of wholesalers raised to national totals are prepared by the Bureau of Foreign and Domestic Commerce and published in the *Survey of Current Business*. The Census Bureau also publishes current data on stocks of canned foods at the wholesale level based on reports submitted by warehouses of retail food chains and a sample of food wholesalers, and a monthly series of inventories of petroleum products (liquid fuels) on hand at the secondary distribution level. The latter series contains measurements of storage capacity on a quarterly basis.

Financial statistics relating to corporations in wholesale trade are available from the annual reports, *Statistics of Income*, published by the Bureau of Internal Revenue.

Current data on the production, movement, stocks, carry-over, receipts, and disappearances at principal markets, etc., for major agricultural commodities are available from the Production and Marketing Administration, Department of Agriculture.

As part of its investigations, the Federal Trade Commission has collected operating statistics on wholesalers as well as on the wholesale business of chains in various lines. Financial statistics on corporations engaged in wholesale trade whose securities are listed on the national securities exchanges are available from the Securities and Exchange Commission.

Retail trade.—The Bureau of the Census compiles and publishes estimates of the total dollar sales in retail stores by kind of business for the country as a whole. It also publishes data on trends in retail store sales by kind of business for the country as a whole and for selected areas, and for all retail trade combined for an additional group of cities and areas. These data are based on reports secured by mail from retail chain store and mail-order houses and the larger independent retail establishments, supplemented by an area sample of smaller retail establishments. These estimates of dollar volume of retail sales by kind of business are also published currently in the *Survey of Current Business*. The Census Bureau also conducts and publishes an annual survey of inventories and receivables for retail stores by kinds of business in the United States as of the end of the calendar year.

Indexes of department store sales and stocks are compiled by the Board of Governors of the Federal Reserve System and by each of the 12 Federal Reserve Banks for its district. These indexes are published monthly in the *Federal Reserve Bulletin* and also in the *Survey of Current Business*. Monthly and annual statistics on consumer credit are compiled by the Board of Governors of the Federal Reserve System and

published currently in the *Federal Reserve Bulletin*. Financial data for corporations engaged in retail trade and filing income tax returns are published by the Bureau of Internal Revenue in its annual report, *Statistics of Income*. Financial statistics on corporations engaged in retail trade whose securities are listed on the national securities exchanges are available from the Securities and Exchange Commission.

Service trades.—Typical of the numerous current statistical reports on personal and business services compiled by private agencies are the *Horwath Hotel Accountant*, *Printers' Ink*, and *National Advertising Records*. Financial statistics of service businesses derived from corporation income tax returns are compiled and published annually by the Bureau of Internal Revenue in its annual report, *Statistics of Income*. Current data on service trades are provided by the Bureau of Foreign and Domestic Commerce in its quarterly and annual estimates of consumption expenditures published in the *Survey of Current Business*.

Advertising.—Statistics shown here on advertising expenditures are compiled by private organizations. McCann-Erickson, Inc., which compiles the data shown on advertising expenditures, defines national advertising as that advertising done for companies whose products are distributed nationally, and for which national media rates are paid. Local advertising is defined as advertising done for companies which market their products locally and may pay special "local" media rates. Monthly figures are published regularly in *Printers' Ink*, in *Tide Magazine*, and also in the Department of Commerce *Survey of Current Business*.

No. 1005.—WHOLESALE TRADE—SALES AND STOCKS: 1939 TO 1952

[In millions of dollars. Data revised to reflect new concepts used in 1948 Census of Business. For explanation of revisions, see *Survey of Current Business*, October 1951]

¹ New series for 1951 and 1952 not comparable to prior years due to change in methodology used to compute retail store sales and inventory estimates; see *Survey of Current Business*, September 1952.

² Sales of other durable goods stores, other food stores, and other nondurable goods stores not shown separately but included in totals.

³ Includes sales of certain milk dealers in the amount of \$130,000,000, not included in tables 1012 and 1020. Data for these concerns were received too late for inclusion in summary tables for 1929.

⁴ Much of increase in sales from 1929 to 1939 results from change in classification. Garages primarily selling gasoline and oil were classified separately as garages in 1929 Census of Retail Trade and included in filling station category in 1939 Census of Retail Trade.

⁵ Not available.

¹ Central cities are those named in title of metropolitan area, with exception of New York-Northeastern New Jersey which includes New York, Newark, and Jersey City.

² Based on advance 1950 population estimates.

³ Per capita sales is ratio of 1948 sales to advance 1950 population estimates.

⁴ Not included in ranking of metropolitan areas by 1950 Census of Population.

No. 1033.—POWER LAUNDRIES, CLEANING AND DYEING ESTABLISHMENTS, AND RUG CLEANING ESTABLISHMENTS—SUMMARY: 1919 TO 1948

[All money figures in thousands of dollars. Statistics for 1948 cover establishments reporting receipts of \$500 or more; statistics for 1939 cover establishments reporting receipts of \$100 or more; for preceding specified census years statistics cover establishments reporting receipts of \$5,000 or more. The Business Censuses of 1948 and 1939 classified establishments shown in this table as service establishments. (See also table 1027.) Statistics for 1935 and earlier years were compiled in connection with the Census of Manufactures. Rug cleaning was treated, in general, as an activity of the power laundry industry for 1929 and earlier years.]

YEAR	Number of establishments	Proprietors and firm members	Salaried employees	Wage earners (average for year)	Salaries	Wages	Cost of supplies, fuel, and purchased electric energy	Cost of contract work	Receipts for work done

32. Foreign Commerce

Including International Accounts and Aid

Balance of payments.—The statistics shown for international balance of payments and the international investment position are compiled in the Balance of Payments Division, Office of Business Economics of the Department of Commerce.

The international accounts of the United States comprise the international balance of payments (tables 1042, 1044, 1045 and 1046) and the international investment position (table 1043). The balance of payments shows for given time periods, e. g., one year, the transfers of assets and the form of compensation for these transfers between this country and the rest of the world; the international investment position indicates for specific dates the value of United States investments abroad and of foreign investments in the United States. The two types of accounts, however, are not strictly comparable; the transfers of assets between countries as shown in the balance of payments is only one of the factors affecting the value of foreign investments. Other factors not shown in the balance of payments are changes in security values and revaluation of assets, and reinvested earnings and losses. For a detailed discussion and analysis of these accounts, see the Department of Commerce publications, *International Transactions of the United States During the War, 1940-45, Economic Series No. 65, 1948, The Balance of International Payments of the United States, 1946-48, 1949, and Balance of Payments of the United States, 1949-51*, a supplement to the *Survey of Current Business*, published in 1952. For current data and revisions, see the monthly *Survey of Current Business*.

Foreign assistance.—Statistics on United States Government grants to and credits utilized by foreign countries and reverse grants and credit repayments received by the Government from abroad are prepared by the Clearing Office for Foreign Transactions, Office of Business Economics. These data are obtained from Federal agencies which report such transactions to the Clearing Office. For detailed information on the statistics provided in tables 1047 and 1048, and on other foreign activities of the Government, see the Department of Commerce publication, *Foreign Aid by the United States Government, 1940-51*, a supplement to the *Survey of Current Business*, published in 1952. For current data and revisions, see the regular quarterly reports of the Clearing Office.

Foreign aid is defined to comprise two categories—grants and credits. Grants are largely outright gifts for which no payment is expected, or which at most involve an obligation on the part of the receiver to extend aid to the United States or other countries to achieve a common objective. Credits are loans or other agreements which give rise to specific obligations to repay or return, over a period of years, usually with interest. In some instances assistance has been given with the understanding that a decision as to repayment will be made at a later date; such assistance is included in grants. At such time as an agreement is reached for repayment over a period of years, a credit is established. Because such credits cannot, as a rule, be deducted from specific grants recorded in previous periods, they are included in both grants (at the earlier period) and credits (at the time of the agreement), and the amounts of such credit-agreement offsets to grants must therefore be deducted from the total of grants and credits in arriving at gross foreign aid. All known returns to the United States Government stemming from grants and credits are also taken into account in net foreign aid. Gross foreign aid less the returns is net foreign aid, which is shown as net grants and net credits. The Government's capital investments in the International Bank (\$635 million) and International Monetary Fund (\$2,750 million) are not in-

Note.—This section presents data for the most recent year or period available on May 20, 1953, when the material was organized and sent to the printer.

cluded in gross foreign aid although they constitute an additional measure taken by this Government to promote foreign economic recovery. Payments to these international financial institutions do not result in immediate equivalent aid to foreign countries. Use of available dollar funds is largely determined by the managements of the two institutions, subject to certain restraints which can be exercised by the United States Government.

The major activities of the Mutual Security Agency (changed to Foreign Operations Administration on August 1, 1953) are summarized in tables 1049-1054, prepared by the Division of Statistics and Reports of that agency. Data are presented on the European Program and the separate program for the Far East.

In these tables, colonies and overseas territories of European countries are reported with mother countries; the Saar is shown with France. Commodity groups shown are based on the Mutual Security Agency commodity classification. In determining the various reporting groups, an attempt has been made to align the coverage of the summary groups shown in these tables as closely as possible with that of reports on United States exports originating in the Bureau of the Census.

These and other data are published in more detail in the several monthly publications of the Division of Statistics and Reports of the Mutual Security Agency.

Foreign trade.—Statistics on foreign trade are compiled by the Bureau of the Census of the Department of Commerce. Annual statistics through 1946 are published in the annual report, *Foreign Commerce and Navigation of the United States*. Preliminary statistics for later years are from current corrected data. Monthly data are published in the *Summary of Foreign Commerce of the United States* (monthly and quarterly through April 1951, quarterly thereafter) and other monthly reports of the foreign trade series. For a complete list of these reports see *Catalog of United States Foreign Trade Statistical Publications* issued by the Bureau of the Census.

Statistics covering shipments made after World War II under the Department of the Army Civilian Supply Program are included in the export statistics for 1948 but not for earlier years. In addition, export data include United States exports under the Lend-Lease, United Nations Relief and Rehabilitation Administration, Economic Cooperation Administration, Mutual Defense Assistance, and other foreign aid programs. Shipments to United States armed forces for their own use are not included in export statistics for any period.

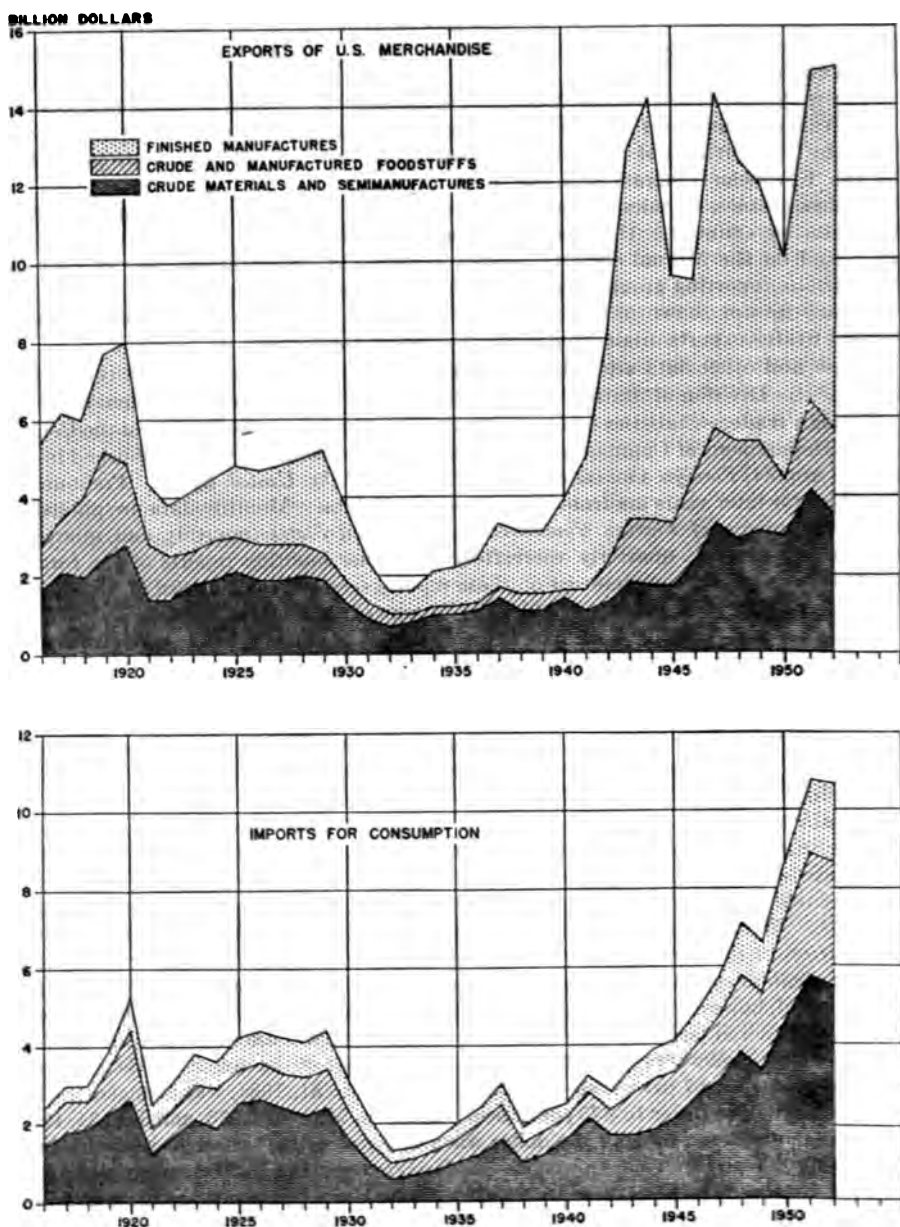

Certain commodity classifications in the export statistics were grouped for security reasons into special categories beginning with May 1949 and data for the individual commodities withheld from publication. The special category list of commodities was amended in July 1949, July 1950, and January 1951 to include additional commodities. With the adoption of new security regulations, effective July 1950, the publication of the country of destination and Customs District detail for the special category commodities and groups were discontinued. Data for special commodities are included, however, in all total export statistics issued by the Bureau of the Census.

Except as noted (as, for example, in table 1076) the values stated are in United States dollars without reference to changes in the gold content of the dollar. (The statutory price of gold—\$20.67 per ounce—in effect prior to Jan. 31, 1934, was changed on that date by Executive Order to \$35 per ounce. Between Mar. 10, 1933, and Jan. 31, 1934, the foreign exchange value of the dollar was permitted to depreciate as a result of the restriction placed on gold shipments to foreign countries.) The geographic area covered by these statistics, except as noted, is the United States customs area, which includes Alaska, Hawaii, and Puerto Rico, and from Jan. 1, 1935, through Dec. 31, 1939, the Virgin Islands (see headnote, table 1060). Other explanations of the trade tables are given in the introduction to the annual report, *Foreign Commerce and Navigation of the United States*.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series M 14-41") provide cross references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

Unclassified commodity refund	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—

1 Includes \$101.4 million authorized and expended for Indonesia in 1948 and 1949 when this country was a Netherlands dependency.

2 Not available.

3 NSA expenditures supplemented by movement reports from U. S. Government agencies; total paid shipments are less than actual movements because of time required for receipt and processing of documents requesting payment.

4 Includes refunds totaling \$20.3 million for unclassified commodities not shown separately.

¹ Procurement authorizations issued with "worldwide source" except for exclusion of recipient country itself and Communist-dominated areas. These authorizations identified as "worldwide source" until closed, at which time actual source countries will be determined.

² Not available.

³ MSA expenditures supplemented by movement reports from U. S. Government agencies; total paid shipments less than actual movements because of time required for receipt and processing of documents requesting payment.

No. 1057.—EXPORTS AND IMPORTS OF MERCHANDISE, GOLD, AND SILVER: 1791 TO 1952

[In thousands of dollars. For basis of dollar values, see general note, p. 890. Figures are for fiscal years ending Sept. 30, 1791 to 1842, and June 30, 1843 to 1915; calendar years thereafter. For total exports and imports of merchandise by individual years prior to 1942, see table 1058. Merchandise figures include gold and silver prior to 1821. See also *Historical Statistics*, series M 42-55]

¹ Includes gold and silver prior to 1821.² Period beginning Oct. 1, 1842, and ending June 30, 1843.³ Represents later date than that shown in table 1055.Source: Department of Commerce, Bureau of Census; annual report, *Foreign Commerce and Navigation of the United States*, and records.

No. 1059.—EXPORTS AND IMPORTS OF MERCHANDISE, PER CAPITA: 1791 TO 1952

[Export figures for 1791 to 1820 are based on total exports including reexports (the latter were then relatively large) and for 1821 to date, on exports of United States merchandise only. Import figures for 1791 to 1820 are based on general imports; for 1821 to 1870, total imports less reexports; and for 1871 to date, imports for consumption. (See tables 1057 and 1077)]

No. 1060.—MERCHANDISE TRADE OF CONTINENTAL UNITED STATES WITH FOREIGN COUNTRIES AND OUTLYING TERRITORIES AND POSSESSIONS: 1903 TO 1950

IMPORTANT NOTE.—This table differs as to its geographic basis from all other foreign trade tables in this section and in other publications: (1) In the case of other tables the data represent the trade of the United States customs area with all foreign countries, including the Philippine Islands and prior to 1935, the Virgin Islands. The U. S. customs area comprises continental U. S., Alaska, Hawaii, Puerto Rico, and during 1935 through 1939, the Virgin Islands. Trade between continental U. S. and the territories mentioned as part of the customs area are therefore excluded from these data. (2) The present table takes continental United States as the basis. In the totals, trade between it and all United States Territories and possessions is included, while the trade between that part of the customs area outside of continental United States and foreign countries is excluded. Practically all other nations calculate their foreign trade in the manner followed in the present table; that is, totaling the trade of the home country with foreign countries and with all outlying areas. Prior to 1901 Alaska was our only outlying area. Therefore, our foreign trade statistics for 1900 and earlier years very nearly represent the trade of continental United States with foreign countries. Data are for years ending June 30 through 1918; thereafter, for years ending Dec. 31. For purposes of continuity of the data in this table, trade with the Republic of the Philippines has been treated as trade with a Territory through calendar year 1946, even though Philippine independence was established in July 1946.

[In thousands of dollars]

No. 1067.—EXPORTS OF U. S. MERCHANDISE AND IMPORTS—INDEXES OF CHANGES IN QUANTITY, UNIT VALUE (PRICE), AND TOTAL VALUE: 1913 TO 1952

[Quantity and unit value indexes have been constructed by so-called "ideal formula," essential feature of which is use of quantities of several articles as weighting factors of their unit values for each pair of years compared. About 265 commodities were included in direct calculations for both exports and imports. It was then assumed that prices of articles in each economic class not directly covered had moved in parallel with those of articles covered and their value, adjusted by computed price index, was included in aggregate totals from which quantity index for each class was calculated. Index of quantity and unit value of total exports and imports was based on aggregate of adjusted totals of classes. In constructing indexes, data for 1919 were linked directly to 1913, and each subsequent year was compared with that preceding. Resulting year-to-year percentages were made into a series by chain method]

(1922-25 average = 100)

¹ Includes beverages.

² Decline from 1949 due in part to low prices on exports from government-owned surplus and on exports subsidized by Department of Agriculture payments.

³ Based on "general imports" through 1933; on "imports for consumption" thereafter.

No. 1070.—EXPORTS OF UNITED STATES MERCHANDISE—VALUE OF SELECTED ARTICLES: 1821 TO 1952

[In thousands of dollars. For basis of dollar values, except export figures for 1870-78, see general note, p. 890. Export figures for those years are mixed gold and currency values. Figures are for fiscal years ending Sept. 30 through 1840, and June 30, 1850 through 1915; calendar years thereafter. In some cases blanks represent entire absence of trade; in other cases the item is not available separately.]

¹ Includes margarine of vegetable origin through 1948. Excludes inedible fish oils. Excludes "lard compounds" beginning 1921; now classified as "vegetable cooking fats." ² Includes fruit and nut preparations.

³ Natural and synthetic rubber. ⁴ Average for period July 1, 1915, to Dec. 31, 1920.

⁵ Includes semimanufactures. ⁶ Average for 1906-10.

⁷ Box, crate and package shooks (except fruit and vegetable) included with "Other wood manufactures" beginning 1949; classified as "Sawmill products" in prior years.

⁸ Exclusive of track-laying tractors of 95 and over drawbar horsepower beginning July 1949.

⁹ Exclusive of machinery and vehicles manufactured to military specifications beginning July 1949.

¹⁰ Includes a small amount of nonferrous metal articles.

SELECTED IMPORTS

911

No. 1071.—IMPORTS—VALUE OF SELECTED COMMODITIES: 1821 to 1952

[In thousands of dollars. For basis of dollar values, see general note, p. 880. Figures represent "general imports" through 1932, "imports for consumption" thereafter. Figures cover fiscal years ending Sept. 30 through 1840, and June 30, 1850 through 1915; calendar years thereafter. In some cases blanks represent entire absence of trade; in other cases the item is not available separately]

¹ Less than 1/10 of 1 percent.

² Period July 1, 1945, to Dec. 31, 1950.

³ Percentages for individual continents are understated since basic continent data excludes, for security reasons, exports of Special Category commodities representing 6.2 percent of total exports in 1950, 10.4 percent in 1951 and 17.1 percent in 1952.

¹ Customs district data exclude certain commodity shipments under security regulations.

² As reported to Treasury Department by collectors of customs, subject in certain cases to subsequent refund as well as drawback. These figures are somewhat higher than duties as calculated on basis of imports for consumption (see table 1077).

³ Includes \$8,380,874,000 in 1949, \$7,434,703,000 in 1950 and \$1,556,192,000 in 1951, not shown by districts.

⁴ Data not individually reported.

⁵ Less than \$500.

⁶ Excluded from totals; not part of U. S. customs area, assessed under tariff law of Virgin Islands.

⁷ Duties less cost of collection are turned into the Island's treasury; excluded from totals.

⁸ Export shipments individually valued under \$100.

Source: Department of Commerce, Bureau of the Census; annual report, *Foreign Commerce and Navigation of the United States*, and records.

**No. 1076.—EXPORTS (INCLUDING REEXPORTS) AND IMPORTS OF MERCHANDISE,
BY PRINCIPAL CUSTOMS DISTRICTS: 1860 TO 1952**

[In thousands of dollars. For basis of dollar values, except export figures for 1870-78, see general note, p. 880. Export figures for those years represent mixed gold and currency values. Figures cover fiscal years to and including 1915; thereafter, calendar years. Import data are "general imports" through 1933; "imports for consumption" thereafter. Areas of districts were rearranged July 1, 1913. Prior to that date some of the districts were more restricted. However, in most cases this change only slightly affects the comparability of the figures. Prior to 1914 the statistics given in the table for Buffalo include the (former) districts of Buffalo Creek and Niagara; those for Michigan include the (former) districts of Superior, Huron, and Detroit; and those for Massachusetts and Maryland were the former districts of Boston and Baltimore, respectively]

No. 1077.—IMPORTS ENTERED FOR CONSUMPTION AND DUTIES THEREON: 1821 TO 1952

[For basis of dollar values, see general note, p. 880. From 1821 to 1866, inclusive, figures of import values represent total imports less reexports, and for 1867 and later years imports entered for consumption. "Ratio of duties to total" is based upon values of imports shown in table. Figures cover fiscal years ending Sept. 30, 1821 to 1862, and June 30, 1845 to 1915; calendar years thereafter. See also *Historical Statistics*, series M 66-74]

¹ Beginning 1947, data from Bureau of Customs and represent unrevised figures based on reports at time of entry.

² Period July 1, 1915, to Dec. 31, 1920.

³ Based on estimated population including armed forces overseas.

Source: Department of Commerce, Bureau of Census; annual report, *Foreign Commerce and Navigation of the United States*, and records, except as noted.

**NO. 1078.—IMPORTED DUTIABLE MERCHANDISE ENTERED FOR CONSUMPTION—
VALUES, CALCULATED DUTIES, AND AVERAGE RATE OF DUTY, BY TARIFF SCHEDULES: 1934 TO 1951**

[All figures except percentages in thousands of dollars. For basis of dollar values, see general note, p. 880. Includes articles on which countervailing and antidumping duties are assessed. Free list commodities taxable under revenue acts excluded from various schedules. Percents represent average ad valorem rate or ratio of duties to values of dutiable merchandise]

No. 1079.—IMPORTS OF MERCHANDISE, FREE AND DUTIABLE, AND PERCENT FREE, BY ECONOMIC CLASSES: 1821 TO 1952

[In thousands of dollars. For basis of dollar values, see general note, p. 880. Figures cover fiscal years ending Sept. 30, 1821 to 1840, and June 30, 1850 to 1915; calendar years thereafter, except as noted. Data are "general imports" through 1933; "Imports for consumption" beginning 1934. Percentage free in general imports is normally slightly lower than in imports for consumption because relatively more of dutiable general imports are reported as reexported than of free general imports. Moreover, in the period 1922-1933, there is an understatement of free goods in general imports because, for 1922 to 1933, carpet wool used for making carpets and, for 1922 to 1928, wheat imported for milling in bond for exports were reported as dutiable when entered, although no duty was ultimately paid on these products. For adjusted figures see table 492 of 1935 issue of *Statistical Abstract*. See also *Historical Statistics*, series M 75-86.]

33. Territories, Possessions, and Other Areas Under the Jurisdiction of the United States

Statistics in this section are presented for the two territories, Alaska and Hawaii; the four principal possessions, Puerto Rico (a commonwealth), Virgin Islands, Guam, and American Samoa; and the Canal Zone. The circumstances under which the Territories, possessions, and other areas were acquired by or came under the jurisdiction of the United States are as follows:

Alaska.—Alaska was acquired by purchase from Russia in 1867 and was organized as a Territory in 1912.

Hawaii.—Hawaii, by voluntary action of its people, ceded its sovereignty to the United States in 1898 and was organized as a Territory on June 14, 1900.

Puerto Rico.—The island of Puerto Rico was formally surrendered by Spain to the United States in October 1898, and was ceded to the United States, together with a few adjacent islands, by the Treaty of Paris, signed December 10, 1898, and ratified in the following year. Puerto Rico acquired the status of a commonwealth on July 25, 1952.

Virgin Islands of the United States.—The Virgin Islands, formerly known as the Danish West Indies, were acquired by the United States by purchase from Denmark in 1917, the formal transfer of possession having taken place on March 31 of that year.

Guam.—The island of Guam was ceded by Spain to the United States under the terms of the Treaty of Paris, signed December 10, 1898, and ratified in the following year.

American Samoa.—American Samoa was acquired by the United States in accordance with a convention between the United States, Great Britain, and Germany, signed December 2, 1899, ratified February 16, 1900, and proclaimed by the President of the United States on the latter date.

Canal Zone.—The use, occupation, and control of the Canal Zone were granted to the United States under the terms of a treaty with the Republic of Panama, signed November 18, 1903, and ratified in the following year.

Trust Territory of the Pacific Islands.—The United States became the administering authority over the Trust Territory of the Pacific Islands (which comprises the Caroline, Marshall, and Marianas Islands except Guam) under an agreement approved by the Security Council of the United Nations on April 2, 1947, and by the United States Government on July 18, 1947.

For a brief summary of the territorial development of the United States, see tables 1 and 3, in section 1.

Sources.—Many of the statistics were obtained from the results of the 1950 Censuses of Agriculture, Population, and Housing conducted by the Bureau of the Census. Other agencies which furnished material for this section are the National Office of Vital Statistics of the Department of Health, Education, and Welfare, the Bureau of Mines of the Department of Interior, and the Department of the Navy.

Material in other sections.—In addition to the statistics presented in this section there are a number of tables on Territories and possessions appearing in other sections of this volume. Thus, statistics on the Alaska Railroad are presented in section 21, Transportation, Air and Land; statistics on cane sugar production in Hawaii and Puerto Rico are given in section 25, Agriculture—Production and Related Subjects; lumber and shingle production for Alaska are given in section 26, Forests and Forest Products; and data on the Panama Canal are presented in section 22, Waterways, Water Traffic, and Shipping. In addition, other data are included as integral parts of several State tables in various sections of the volume.

Note.—This section presents data for the most recent year or period available on May 20, 1953, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

Population, Housing, and Agriculture.—Due to the difference in the population and housing characteristics and the variation in agriculture products between the Territories and possessions, the collection and presentation of data from the 1950 Censuses varies slightly between areas. The tables in this section attempt to take into account these differences and give, as nearly as possible, comparable data between the areas. For definition and explanation of terms see section 1, Area and Population; section 29, Construction and Housing; section 24, Agriculture—General Statistics; and section 25, Agriculture—Production and Related Subjects. However, for detailed treatment of the Territories and possessions, see the original sources.

Commerce.—The statistics on commerce are published by the Bureau of the Census in the *Summary of Foreign Commerce of the United States*. In section 32, Foreign Commerce, the Virgin Islands is treated as a foreign country prior to 1935. On the other hand, Alaska, Hawaii, and Puerto Rico, and for 1935–39, the Virgin Islands, are treated as integral parts of the United States. Neither trade of American Samoa and Guam with foreign countries nor shipments between them and the United States are included in the general tables on foreign trade. See also table 1060, p. 901.

The tables on commerce in this section present the total foreign trade of each of the U. S. Territories and possessions and show separately the trade with United States (unless otherwise indicated) and with foreign countries. The trade with foreign countries represents exports and imports through the respective territorial Customs Districts and does not necessarily represent exports of commodities originating within the designated territory nor imports for direct consumption within the territory. For basis of dollar values, see general note, p. 881.

¹ Data for married couples, income of families and unrelated individuals, school enrollment and years of school completed based on 20-percent sample.

² Censuses taken in 1929 and 1939.

³ Per 100 square miles.

⁴ Urban population is that living in cities, towns, or villages of 2,500 or more. The remainder is classified as rural.

⁵ Includes consensually married.

⁶ Not available.

⁷ Worked as civilians in 1949.

⁸ For Hawaii, income is for families and unrelated individuals.

⁹ Includes 17,989 persons with no income.

¹⁰ Includes 641,508 persons with no income.

¹¹ Includes 6,257 persons with no income.

¹² Median computed on basis of those persons reporting income greater than zero, excludes those reporting no income.

¹³ Represents persons completing 1 or more years.

¹ Retabulated to provide industry statistics comparable with those for 1949.

² Computed by subtracting costs of materials and supplies, fuels, electric energy, and contract work from value of products.

³ Includes data for industry groups not shown separately (to avoid disclosing operations of individual companies) as follows: Rubber, primary metal industries, electrical machinery, and transportation equipment, 1 establishment each; and for instruments and related products, 2 establishments.

⁴ Comparable statistics for 1939 not available. Figures for 1949 include statistics for activities of (1) coffee roasting and grinding and (2) tobacco stemming and redrying, which were classified as manufacturing in 1949 but considered nonmanufacturing in 1939.

⁵ This figure may include an undetermined amount of excise taxes.

⁶ Also includes shortening, cooking oils, and flavorings.

⁷ Also includes fabric and combination dress and work gloves.

⁸ Also includes sporting and athletic goods, hand stamps and stencils, needles, pins, and fasteners, plastic products, brooms and brushes, matches, and hair work.

⁹ Withheld to avoid disclosing figures for individual companies.

Source: Department of Commerce, Bureau of the Census; *Puerto Rico Census of Manufactures, 1949*.

No. 1092.—ALASKA AND HAWAII—SUMMARY OF MANUFACTURES: 1899 TO 1939

[Figures for 1939 do not include data for plants reporting products valued at less than \$2,000; those for earlier years cover all plants having products valued at \$500 or more. This increase in minimum value-of-products limit resulted in some reduction in "Number of establishments" reported as compared with what it would have been had minimum of \$500 been retained, but did not seriously impair comparability of figures for 1939 with those for earlier years]

INDUSTRY	Census year	Number of establishments	Wage earners (average for the year)	Wages	Cost of materials, etc., fuel, electric energy	Value of products	Value added by manufacture ¹
Alaska, all industries	1899	48	2,260	\$1,374,680	\$1,762,583	\$4,194,421	\$2,431,838
	1909	152	3,099	1,948,026	5,119,613	11,340,105	6,220,492
	1919	147	6,575	8,839,452	19,482,485	41,495,243	22,012,768
	1929 ²	230	4,816	6,883,988	20,916,757	38,815,436	17,898,679
Hawaii, all industries	1899 ³	222	3,655	1,473,000	12,251,000	23,354,000	11,163,000
	1909 ³	500	5,904	2,108,903	25,817,734	47,403,880	21,586,146
	1919 ³	496	9,969	6,636,763	81,178,956	133,096,412	51,917,456
	1939	474	17,002	11,458,311	76,651,675	134,005,264	58,353,889

¹ Value of products less cost of materials, etc., fuel, and purchased electric energy.

² Figures for 1939 cover the 12-month period ended Sept. 30, 1939.

³ Includes data for coffee roasting and spice grinding which are no longer treated as manufacturing activities.

¹ Unofficial estimates of value of merchandise shipped from Pacific coast ports to Alaska from 1882 to 1901; from 1903 to date, official figures of shipments to Alaska.

² General imports through 1933; imports for consumption thereafter.

³ 2-year average. ⁴ 4-year average. ⁵ 2-year average.

⁶ Period July 1, 1915 to Dec. 31, 1920.

⁷ For security reasons Customs district of exportation for certain commodities are not reported in export statistics.

⁸ Not available; legal requirement for filing of export declarations for shipments between U. S. and Alaska and Hawaii was removed in April 1948.

34. Comparative International Statistics

The statistics of the various individual nations may be found primarily in the official publications or compendia, generally in the form of *Yearbooks*, issued by most of the nations at various intervals in their own national languages, expressed in their customary national units of measurement. For handier reference, especially for international comparisons, the Statistical Office of the United Nations compiles and issues a number of international summary publications, generally in English and French. Among these, the annual *Statistical Yearbook*, the annual *Demographic Yearbook*, and the *Monthly Bulletin of Statistics* may be most helpful for both general and special users. The Statistical Office of the United Nations also publishes a *Yearbook of International Trade Statistics* and the *National Income Statistics of Various Countries*. For international agricultural statistics, the outstanding source is the *Yearbook of Food and Agricultural Statistics* which is published by the Food and Agricultural Organization of the United Nations. These publications usually present data covering an extensive period of time, frequently up to 20 years.

The information shown in this section was obtained almost entirely from the *Statistical Yearbook, 1952*, a United Nations publication, prepared by the Statistical Office of the United Nations. To facilitate comparison in terms of familiar units, items shown in metric units in the source have been converted to U. S. equivalents by means of the conversion factors given in the *Statistical Yearbook* (see table of conversion factors, p. 945).

Countries and items shown.—Problems of space and availability (or nonavailability) of data are restrictive factors in this presentation of statistics for the various nations.

In particular, the space problem makes it necessary to limit the number of countries for which statistics are shown on a somewhat arbitrary basis. The list of countries included comprises all those who are members of the United Nations or are members of the larger agencies affiliated with the U. N. (see table 1108). In a few instances, such member countries were omitted because of an almost complete lack of data. Data for the Union of Soviet Socialist Republics have been included for those few items for which they were available. For the most part, however, official data for the U. S. S. R. have not been released since the prewar period.

Statistics are shown for a standardized list of countries. No attempt was made to vary the list according to the relative standing or significance of each country with respect to each specific subject item shown. In consequence, there may be instances, with respect to certain subject items shown, in which one or more of the countries omitted from the list are more important, statistically, than some of the countries included. However, cases of this kind are not believed to be numerous.

A high degree of selection also was necessary with respect to subject items included. The items shown here are believed to be among those more significant in reflecting the general industrial structure and the social level of a country.

Certain subject materials of basic import, such as those on national income, are omitted because of the inability to convert the available statistics, stated in terms of the national currencies, to meaningful consistency in United States measures. Finally, items for which figures are available for a large number of countries were favored over items for which information is scanty in order to broaden the scope of comparison as much as possible.

Note.—This section presents data for the most recent year or period available on May 20, 1953, when the material was organized and sent to the printer.

Quality and comparability of the data.—The quality and the comparability of the data presented here are affected by a number of factors which should be kept in mind:

(1) The data shown are for the latest year available for each country; the latest year, however, may vary from item to item for a particular country and within items for different countries. All such variations have been noted (see table headnotes) and should be taken into account. In most instances, the data shown are for calendar years. In a number of instances, however, the 12-month totals shown do not correspond with the calendar year. Problems of space unfortunately made it impracticable to present the data for a series of years.

(2) The bases, methods of estimating, methods of data collection, extent of coverage, precision of definition, scope of territory, and margins of error may vary from item to item within a particular country and within items for different countries. Footnotes and headnotes to the tables give some measure of the qualifications and differences attached to the figures. Again, the compelling limits of space made necessary some condensation and editing of the more detailed notes appearing in the source. The user is, therefore, cautioned to proceed with care in analysis and comparison, since, at best, many of the measures shown are merely rough indicators of magnitude.

(3) Figures shown in this section for the United States may not always agree with figures shown in the preceding sections. Such differences may be attributable to the use of differing original sources, a difference in the definition of geographic limits (continental United States only, or including certain territories and possessions), or to possible adjustments made in the United States figures by the United Nations in order to improve their comparability with figures from other countries.

Because of the many difficult problems inherent in bringing together summary statistics in this fashion, those readers who are interested in detailed comparisons should consult the publications of the United Nations mentioned above.

CONVERSION FACTORS

Metric units	U. S. equivalents
1 km.....	0.621370 mile
1 sq. km.....	0.386101 sq. mile
1 metric ton (1,000 kg.).....	1.102311 short tons
1 passenger-km.....	0.621370 passenger-mile
1 ton-km.....	0.684943 short ton-mile

No. 1100.—POPULATION, AREA, AND VITAL STATISTICS

[For many countries, figures are provisional. Basis and level of reliability of population estimates range from use of a continuous population register (Scandinavian countries) and census enumerations for a recent date (most countries) to "counting procedures not comparable with a census" (China, Lebanon, Syria) and "conjectural estimates derived by other means than counting" (Ethiopia, Afghanistan). Data, in general, refer to present-in-area population of the present territory. Area figures include inland waters. Crude birth rates, infant mortality rates, and death rates derived from data having complete or virtually complete coverage for many countries and incomplete coverage for others. Crude birth rate: Number of live births per 1,000 persons. Crude death rate: Number of deaths, exclusive of stillbirths, per 1,000 persons. Infant mortality rate: Deaths of infants under 1 year of age per 1,000 live births. Data exclude stillbirths. Expectation of life: Average future lifetime (in years) of persons at birth, if subject to mortality conditions of period indicated. See text, p. 944, for general comments concerning quality of the data. Years for which data are shown may vary from column to column and from country to country. Figures which are not for the year shown in the "year" column are prefixed by a letter to indicate the year represented as follows: a represents 1950; b, 1949; c, 1948; d, 1947; e, 1946; f, 1945; g, 1944; h, 1943; i, 1942; j, 1941; k, 1940; l, 1939]

World total.....		2,438,000	52,166,578	47						

¹ Includes white population only. Data for nonwhite population are as follows: 1948, male 58.1 years, female 62.5 years; 1949, male 58.6 years, female 62.9 years.

² Excludes full-blooded aborigines.

³ Data refer to Federal District and 13 cities.

⁴ Registration area only, representing 82.5 percent of total population of 1961 Census.

⁵ Excludes Yukon, Northwest Territories and Newfoundland.

⁶ Taiwan (Formosa).

⁷ Excludes tribal aborigines.

⁸ Excludes Faeroe Islands.

⁹ Inhabited and cultivated area: 13,446 sq. miles; population per sq. mile, 230.

¹⁰ Data relate to Finnish nationals in Finland.

¹¹ Excludes war losses.

¹² Excludes infants dying within 3 days after birth without being registered as live births.

¹³ The former British, French, and U. S. Zones of Occupation, except the Saar. Figures for expectation of life represent former British and U. S. Zones only.

¹⁴ Berlin.

¹⁵ Department of Guatemala only.

¹⁶ Based on population at beginning of rate year.

¹⁷ Includes Hyderabad, but excludes Kashmir-Jammu and tribal areas of Assam.

¹⁸ Includes Hyderabad and Kashmir-Jammu of which political status is not yet determined.

¹⁹ Registration area.

²⁰ Pre-partition India, including Burma.

²¹ Indonesian population of Java and Madura only.

²² Europeans only.

²³ Jewish population only.

²⁴ Excluding 7 islands of Jitso Son (Tokara-Gunto) transferred from Ryukyu Islands by Japanese Peace Treaty of Dec. 5, 1951.

²⁵ Territory of Japan proper as of date; Japanese nationals only.

²⁶ Excludes inland waters.

²⁷ Excludes Elten and Tuddern.

²⁸ Excludes minor islands which are uninhabited.

²⁹ Excludes Maoris.

³⁰ Registration area only; represents about 90 percent of total population.

³¹ Excludes tribal Indians.

³² Excludes jungle population.

³³ Excludes nomads.

³⁴ Estimate issued in 1946; refers to 1939 territory.

³⁵ In Europe, 1939 territory.

³⁶ England and Wales.

³⁷ Excludes tribal Indians estimated at 105,120 in 1950.

³⁸ Land area including inland waters but excluding certain uninhabited polar regions and some uninhabited islands.

¹ 1934-1938=100, except as follows: China, 1931-1937; Spain, 1931-1935; Australia, 1936-1939; Canada, New Zealand, United States and South American countries, 1935-1939. Computed by U. N. Food and Agricultural Organization.

² Includes mining, manufacturing, and public utilities; excludes construction.

³ Refers in general to wage-earners in manufacturing (excluding public utilities, building and other construction).

⁴ In many instances, represents index only for principal city (or cities) of particular country.

⁵ General wholesale price index numbers usually weighted by volume of sales on wholesale markets. As indicated by other footnotes, sometimes weighted only by volume of home produced goods or by volume of home consumed goods.

⁶ Indexes based primarily on common shares traded on leading exchange or exchanges of each country covering representative sample of companies in manufacturing, mining, and construction, and excluding wherever possible public utilities, transportation, distribution, and finance companies.

⁷ Derived from official or semiofficial publications. Represents per capita national income or expenditure at constant prices, at factor cost, unless otherwise indicated. Data particularly subject to error.

⁸ Excludes electricity and gas.

⁹ 1947-49=100.

¹⁰ Per capita gross national expenditure at market prices.

¹¹ Includes salaried employees.

¹² Includes manufacture of gas and electricity.

¹³ Home consumed goods.

¹⁴ Excludes manufactured gas.

¹⁵ Not including rent.

¹⁶ Home consumption of foods, farm products and industrial raw materials.

¹⁷ Luxembourg included with Belgium.

¹⁸ Farm products only.

¹⁹ Per capita gross domestic product at factor cost.

²⁰ Excludes mining, includes building.

²¹ Retail price index of food only.

²² Includes public utilities.

²³ January-September.

²⁴ Per capita net material product.

²⁵ 1949=100.

²⁶ Excludes mining.

²⁷ Exported goods only.

²⁸ Per capita net domestic product at factor cost.

²⁹ Groceries only.

³⁰ Includes persons on strike or temporarily laid-off.

³¹ Former biannual area.

³² Index of industrial products only.

³³ January-June.

³⁴ Java and Madura.

³⁵ Free market price on food only.

³⁶ Unweighted index of 44 imported items.

³⁷ Excludes electricity and manufactured gas.

³⁸ Includes working proprietors.

³⁹ Per capita consumers' expenditure at market prices.

⁴⁰ Department stores only.

⁴¹ 1950=100.

⁴² Food, clothing, coal and soap.

⁴³ Per capita national income at market prices.

⁴⁴ Food only.

⁴⁵ Excludes electricity.

⁴⁶ Per capita gross domestic product at market prices.

⁴⁷ Data relate to December.

⁴⁸ Home produced goods.

⁴⁹ 1947=100.

⁵⁰ Includes mining.

⁵¹ 1935=100.

⁵² Per capita national income at market prices minus direct taxes.

⁵³ Includes building.

⁵⁴ Europeans only.

⁵⁵ Data refer to June.

⁵⁶ Excludes Northern Ireland.

⁵⁷ Per capita gross national product at factor cost.

⁵⁸ Food, coal and soap.

⁵⁹ January 1951=100.

⁶⁰ Excludes U. S. S. R.

¹ Manufacturing relates to production (including repair work) in factories, and excludes mining, building and construction, and public utilities (gas, electricity and water supply).

² In general, single plants or factories.

³ Includes wage earners and salaried employees and represents average number engaged on production (excluding sales and distribution staff). Salaried employees include working proprietors and directing, managing, clerical, and technical staff.

⁴ Figures expressed in United States dollars of gold content fixed on Jan. 31, 1944, and refer to merchandise, including silver, in all forms, excluding gold and issued paper currency. Imports are generally valued c. i. f.; exports, f. o. b. Postal and governmental trade are generally included; war reparations and restitutions are generally excluded. Figures for United States are for "general trade." For other countries, figures shown are not distinguished here as to "general trade" or "special trade." Roughly half the countries fall into each category; see source publication for distinction as to categories. Comparability between countries is undoubtedly affected by this distinction.

⁵ Refers to gross holdings of gold of central banks, treasuries, exchange stabilization funds, and other official institutions as of end of period indicated. Gold used in payment of subscriptions to International Monetary Fund or International Bank for Reconstruction and Development are not included. Gold holdings reported at 35 dollars per fine troy ounce. U. S. data refer to holdings of treasury, and gold in active portion of stabilization fund.

⁶ In U. S. cents per unit of foreign exchange. Represents domestic par values or basic official rates for single rate countries, and range of significant rates for countries employing multiple rates. For fluctuating or market rates, data represent annual averages. For administratively determined or non-fluctuating rates, data represent, for any given period during which a change occurred, the rate in effect for major portion of that period. The exchange rates shown are not necessarily those used to convert trade figures to U. S. dollars.

⁷ Includes distribution and construction employees on payrolls of manufacturing establishments.

⁸ Imports valued f. o. b.

⁹ United States customs area including Alaska, Hawaii, Puerto Rico.

¹⁰ Establishments employing 4 or more persons or using mechanical power.

¹¹ Belgium and Luxembourg combined.

¹² Establishments in 22 State capitals having annual sales of not less than 100,000 cruzeiros.

¹³ Factories employing 20 or more wage earners.

¹⁴ Wage earners. ¹⁵ Includes Newfoundland.

¹⁶ Establishments having a capital of 100,000 pesos or more or production exceeding 250,000 pesos.

¹⁷ January to October.

¹⁸ Establishments employing 6 or more wage earners and with products valued at 5,000 pesos or more.

¹⁹ Gold and net foreign exchange.

²⁰ Currency maintained at par with U. S. dollar.

²¹ January to September.

²² Establishments employing 6 or more wage earners.

²³ Excludes dairies and bacon factories but includes their preserving and canning plants. Persons employed exclude home workers and working proprietors but include canteen and sales staff.

²⁴ Excludes trade with Anglo-Egyptian Sudan.

²⁵ Includes Saar.

²⁶ Establishments employing 10 or more persons. Includes mining.

²⁷ Establishments employing 5 or more persons.

²⁸ Currency maintained at 2 units per United States dollar.

²⁹ Reporting establishments employing 20 or more wage earners and using power. Persons employed includes distribution staff of salaried workers.

³⁰ Excludes land trade.

³¹ Excludes pipe-line exports of crude petroleum.

³² Establishments employing 3 or more wage earners.

³³ Includes public utilities.

³⁴ Includes mining.

³⁵ Establishments employing 2 or more persons or using mechanical power.

³⁶ Establishments whose wage earners were employed a total of 12,000 hours or more during the year.

³⁷ Excludes working proprietors.

³⁸ Includes Svalbard.

³⁹ Excludes Panama Canal Zone and national exports to the zone.

⁴⁰ Registered establishments.

⁴¹ Establishments employing 5 or more wage earners. Includes mining.

⁴² Establishments employing more than 10 wage earners or having an installed capacity of more than 20 hp.

⁴³ Quotations for Syria and Lebanon.

⁴⁴ Excludes establishments in villages with 500 or less population.

⁴⁵ Establishments employing 3 or more persons, using any form of mechanical power or using boilers for producing steam.

⁴⁶ Excludes Northern Ireland. Establishments employing 10 or more persons.

⁴⁷ Includes sales and distribution staff.

⁴⁸ Includes United States and Canadian dollar holdings of the Exchange Equalization Account.

⁴⁹ Excludes electrical products, precision instruments and miscellaneous industries.

⁵⁰ Establishments employing 20 or more wage earners or having an installed capacity of 20 hp. or more.

⁵¹ World totals exclude trade of Bulgaria, China, Hungary, Romania, U. S. S. R. and Eastern Germany.

¹ Beet and cane. Figures expressed generally in terms of raw sugar. Most of series relate to a crop year beginning September of year shown.

² In terms of carcass weight; refers to beef and veal (including buffalo meat), pork (including bacon and ham), mutton, lamb (including goat meat). Excludes lard, tallow, and edible offals. Figures relate to commercial and farm slaughter.

³ Represents net supply of foodstuffs, other than alcoholic beverages, available at retail level for human consumption within the country.

⁴ Includes offals.

⁵ Belgium and Luxembourg combined.

⁶ Includes fat.

⁷ Commercial slaughter only.

⁸ 22 provinces.

⁹ Includes Manchuria.

¹⁰ Excludes Formosa and Manchuria.

¹¹ Includes allowance for export of live animals.

¹² Includes Eastern and Western Germany.

¹³ Includes Pakistan.

¹⁴ Centrifugal sugar only.

¹⁵ Excludes meat from animals slaughtered in villages.

¹⁶ Excludes U. S. S. R.

¹ Includes utilities (publicly and privately owned plants supplying energy to consumers), plus industrial, transport and other plants generating electricity primarily for their own use. Capacity represents nominal power of all generators available for simultaneous operation in hydroelectric and thermoelectric plants.

² Figures are provisional and refer to gross inland consumption of mineral fuels and water power. Computed mainly from data on production, trade and processing of major sources of energy, with allowance for, as far as possible, changes in stocks, and fuels loaded in bunkers of vessels and aircraft in international trade. Production data employed cover coal and lignite; petroleum, shale oil, natural gasoline and, when available, motor alcohol; natural gas; and hydroelectric power. Trade data include foregoing and derivatives: briquettes, coke (including petroleum coke), motor spirit (petrol, gasoline), kerosene, fuel oils, and, when available, benzols; manufactured and bottled gases; and electric power. In calculating consumption, duplication has been eliminated in all cases. Fuel wood and other vegetal fuels and peat omitted for want of adequate data although believed to provide a major share of energy supply in all but a few countries. Minimum amount of energy obtained from such sources estimated, for most countries, as equivalent to about 0.25 ton of coal per capita per annum.

³ Anthracite and bituminous coal (including semibituminous). Excludes lignite and brown coal.

⁴ Excludes natural gasoline and shale oil. In many cases figures represent conversions from original data expressed in units of capacity.

⁵ Including manganiferous iron ores but excluding pyrites. Data are sometimes only rough estimates obtained by applying a fixed percentage to figures for production of crude ores.

⁶ Total production of crude steel, both ingots and steel for castings, whether obtained from pig iron or scrap. Excludes wrought (puddled) iron.

⁷ Covers, as far as possible, both natural and artificial (portland, etc.) cements.

⁸ Excludes manganiferous iron ores.

⁹ Public utility plants only.

¹⁰ Luxembourg combined with Belgium.

¹¹ Consumption in cities of Rio de Janeiro and São Paulo.

¹² Includes Newfoundland.

¹³ Shipments.

¹⁴ Plants under Government control only.

¹⁵ Includes lignite.

¹⁶ Excludes Formosa and Manchuria.

¹⁷ Formosa only.

¹⁸ Excludes Manchuria.

¹⁹ Production by 3 principal enterprises.

²⁰ Partial production only: coal transported by rail.

²¹ Includes wrought (puddled) iron.

²² Excludes Saar.

²³ Production of the Anglo-Iranian Oil Co.

²⁴ Consumption in Baghdad.

²⁵ Sales.

²⁶ About 90 percent of total production.

²⁷ Excludes private plants of less than 500 kw.

²⁸ All of Korea, North and South.

²⁹ Syria combined with Lebanon.

³⁰ Includes ferro-titanium.

³¹ Cities of Panama and Colon.

³² Consumption in cities of Lima and Callao.

³³ Manila only.

³⁴ Crude ore.

³⁵ Ingots and finished castings for February-December.

³⁶ Ingots and finished castings.

³⁷ Includes Basutoland, Bechuanaland, Swaziland and South West Africa.

³⁸ Great Britain only: includes production of railway and transport stations.

³⁹ Great Britain only. Excludes coal produced at quarries but includes open-cast coal.

⁴⁰ Estimated by Economic Commission for Europe.

⁴¹ U. S. S. R. (excludes Sakhalin) estimated by Economic Commission for Europe. Includes lignite.

⁴² Production in States of Guarico and Tachira.

⁴³ Plants with installed capacity of 100 kw. or more.

⁴⁴ Excludes U. S. S. R. and China.

⁴⁵ Excludes U. S. S. R., China, and Korea.

⁴⁶ Excludes U. S. S. R.

⁴⁷ Excludes China, Manchuria, and U. S. S. R.

World total	1951	87,245		705,479		1,444,000		

¹ Figures relate to merchant fleets on June 30. They are given in gross registered tons (100 cubic feet or 2.83 cubic meters) and represent total volume of all permanently enclosed spaces of vessels to which figures refer. Only vessels of 100 gross tons and over are included. Excludes vessels without mechanical means of propulsion, but includes sailing vessels with auxiliary power. Excludes the following classes of ships, not entered in Lloyd's Register: Ships trading on Caspian Sea; wooden or composite ships trading on Great Lakes of North America.

² In general, represents sum of net registered tonnages of seagoing foreign and domestic merchant vessels (power and sailing) entered with cargo to a foreign port and refer to only 1 entrance for each foreign voyage including foreign commerce on inland waterways, such as Great Lakes. Excludes, if possible, "in ballast," i.e. entering without unloading goods.

³ Represents weight of all goods (including its packing) in external trade loaded to and unloaded from seagoing vessels of all flags at ports of country in question. Excludes mail, bullion, specie, passengers' baggage, bunkers, ships' stores, ballast, floating appliances when delivered as goods without being loaded on other ships, government stores when carried in government vessels or without revenue in merchant vessels, and transshipment (goods transhipped from an importing vessel to an exporting vessel). Includes goods unloaded into or loaded from bonded warehouse.

⁴ Relates to domestic and international traffic on all railway lines within each country shown except railways entirely within an urban unit and plantation, industrial, mining, funicular and cable railways. Passenger miles include all passengers except military, government and railway personnel when carried without revenue; ton miles relate to freight net ton miles and include all goods whether carried by fast or ordinary trains except service traffic, mail, baggage and nonrevenue government stores.

⁵ Covers both domestic and international scheduled services operated by companies registered in each country. Includes supplementary services occasioned by overflow traffic on regularly scheduled trips and preparatory flights for new scheduled services.

⁶ For years in which a census or registration took place, census or registration figure is shown; for other years officially estimated number of vehicles in use is shown. Includes passenger cars and commercial vehicles. Excludes trams, trolley-buses, special and government service vehicles, motorcycles, trailers, farm and road tractors.

⁷ Includes Great Lakes. ⁸ Includes Alaska, Hawaii, Puerto Rico, Virgin Islands.

⁹ Includes international traffic in Great Lakes. Excludes goods in transit and Department of Defense controlled imports and exports and commodities classified as "special category."

¹⁰ Including vessels in ballast.

¹¹ Government railways.

¹² Joint United Kingdom-Australia service of QEA includes some duplication. ¹³ State railways.

¹⁴ Operations of Sabena in Belgian Congo included.

¹⁵ Government vehicles included.

¹⁶ Excluding goods to and from bonded warehouse.

¹⁷ Excluding livestock.

¹⁸ Including nonrevenue traffic.

¹⁹ Including service traffic.

²⁰ Including vessels trading on Great Lakes (701,857 gross tons).

²¹ Great Lakes traffic included.

²² Including Newfoundland.

²³ Gross. ²⁴ Linea Aerea Nacional only.

²⁵ Nonscheduled operations of Civil Air Transport included.

²⁶ Nonrevenue traffic and nonscheduled flights included.

²⁷ Total imports and exports. ²⁸ All entrances counted.

²⁹ International ferry traffic excluded. ³⁰ Danish share of Scandinavian Airways System included.

³¹ Including coastwise traffic.

³² Including bunkers and ships' stores.

³³ Traffic of Air France only.

³⁴ Commercial vehicles only.

³⁵ Excluding occupation traffic.

³⁶ Excluding "Franco-Hellenic" lines.

³⁷ Domestic traffic of Hungarian line and foreign lines on Budapest route; foreign traffic of associated foreign lines.

³⁸ Special service vehicles included.

³⁹ Federal area only. ⁴⁰ Principal port only.

⁴¹ 2 principal railways, including some lines in North Ireland. ⁴² Excluding petroleum.

⁴³ Including Trieste. ⁴⁴ Excluding Trieste.

⁴⁵ Excludes wooden or composite ships with auxiliary power under 300 tons.

⁴⁶ Goods carried by steel vessels. Excluding military goods. ⁴⁷ Small size vehicles excluded.

⁴⁸ All entrances counted.

⁴⁹ Port of Beirut only.

⁵⁰ Including floating appliances when delivered as goods without being loaded on ships.

⁵¹ Excluding suburban traffic. ⁵² Taxis included.

⁵³ Excluding live animals. ⁵⁴ Including tankers.

⁵⁵ Including Canary Islands and Spanish Morocco.

⁵⁶ Swedish portion of SAS included.

⁵⁷ Includes nonmilitary government vehicles.

⁵⁸ Foreign vessels only. ⁵⁹ Main line railways.

⁶⁰ Including British Colonies (except Hong Kong) and British dependencies (70 percent of gross tonnage).

⁶¹ Including South-West Africa and Vryburg-Bulawayo line of Rhodesia railways.

⁶² Including tonnage on bare boat charter from U. S. A. and Canada.

⁶³ Excluding Northern Ireland.

⁶⁴ Includes service traffic carried on revenue-earning trains.

¹ Figures relate to number of public and private telephones (including extension instruments) connected to a central exchange.

² Figures cover, in general, all types of telegrams including cablegrams and radiograms, but exclude messages in transit.

³ Letters mailed for distribution within national territories. Figures cover letters (airmail, ordinary mail and registered), postcards, printed matter, business papers, small merchandise samples, small packets, and phonopost packets. Includes mail carried without charge, but excludes ordinary packages, and letters and packages with a declared value.

⁴ Publications devoted mainly to recording current events and appearing 6 or 7 times a week.

⁵ Figures relate only to stations broadcasting to the public; excludes service stations (e. g., aeronautical and naval stations). Each station counted for as many units as it possesses different transmitting frequencies (wave lengths).

⁶ Figures shown for most countries relate to number of licenses issued for receiving sets, figures which are estimates of number of sets actually in use are footnoted. In general, figures should be used with considerable caution as number of licenses falls, in varying degree from country to country, to represent full number in use. On the other hand, figures given for estimated number in use may in some cases be overstatements. Data apply to all types of sets for radio broadcasts to the public, including loud-speakers connected to a "radio redistribution system" but excluding television sets.

⁷ Includes messages to Canada, Mexico, St. Pierre, and Miquelon.

⁸ Includes Alaska, Guam, Hawaii, and Puerto Rico.

⁹ English language dailies only.

¹⁰ Estimates of number of sets actually in use.

¹¹ All telegrams sent and received by land are counted as domestic. Letters sent include foreign.

¹² Including Faeroe Islands and Greenland.

¹³ Including Algeria, Guadeloupe, Martinique, French Guianas, and Reunion.

¹⁴ Excluding Saar.

¹⁵ Includes Algeria.

¹⁶ Excluding free licenses. A single license may cover several sets.

¹⁷ Comprising English language dailies and dailies in Afrikaans.

¹⁸ Includes newspapers published in Channel Islands and Isle of Man.

¹⁹ Includes 1,697,900 combined sound-television licenses.

No. 1107.—EDUCATION AND HEALTH

[Education: Figures usually refer to both official (public) and independent (private) schools, to school year beginning in year stated, and generally exclude adult education, evening classes, apprenticeship courses and correspondence schools; intercountry comparisons are subject to caution owing to variations in definitions employed and in scope of data; usually exclude (unless otherwise stated) nursery schools, kindergarten and other preschool education. Health: Data do not allow of a close comparison between countries which present a similar standard, whether high or low, in respect of strength and character of their medical facilities. However, they may be used to judge approximate difference in standard between advanced and underdeveloped countries. Data for hospital beds usually refer to both private and public hospitals, nursing homes, infirmaries and dispensaries, but are not always quite complete. See text, p. 944, for general comments concerning quality of the data. Years for which data are shown may vary from column to column and from country to country. Figures which are not for the year shown in the "year" column are prefixed by a letter to indicate the year represented, as follows: a represents 1950; b, 1949; c, 1948; d, 1947; e, 1946; f, 1945]

¹ Secondary schools included with primary schools.

² Excludes Formosa and 10 provinces.

³ Excludes Formosa and Southwest Region.

⁴ Government hospitals personnel only.

⁵ In 428 public hospitals.

⁶ Data refer to reporting institutions only.

⁷ Public schools only.

⁸ Includes normal schools.

⁹ Civil personnel.

¹⁰ Includes 114,900 beds in homes for the aged.

¹¹ Excludes Hamburg and Bremen.

¹² In general hospitals only.

¹³ Includes technical schools.

¹⁴ Area under authority of Interim Federal Government before Dec. 18, 1948.

¹⁵ Includes preschool.

¹⁶ Includes infant departments.

¹⁷ Includes vocational schools.

¹⁸ Public schools only, excluding higher primary.

¹⁹ Includes advanced primary and normal schools.

²⁰ Excludes beds in mental hospitals.

²¹ Excludes vocational schools.

²² England and Wales only.

²³ Personnel of health institutions only.

1 Unofficial percentages, calculated from official scale of assessments.
 2 Includes contributions for the following countries not shown separately: Byelorussian S. R., Cambodia, Hashemite Kingdom of Jordan, Laos, Libya, Monaco, Morocco, Nepal, Saudi Arabia, Southern Rhodesia, Tunisia, Ukrainian S. R., Viet Nam, Yemen.
 3 Regular 1953 budget less \$5,238,200 estimated miscellaneous income, plus \$2,780,880 adjustment in 1952 budget and miscellaneous income, less \$670,380 savings in 1953 and 1951 accounts.
 4 Regular 1953 budget less \$42,217 casual revenue.
 5 Regular 1953 budget less supplementary receipts of \$81,800. Gross assessments, against which credits in respect of 1949, 1950 and 1951 balances (\$479,346), and of working capital fund (\$346,717) are to be deducted for certain members.
 6 Regular 1953 budget less \$479,298 estimated miscellaneous income. Gross assessments against which credits in respect of working capital fund (\$89,700) are to be deducted for certain members.
 7 Regular 1953 budget less transfer of assets from "office" of \$23,164, miscellaneous income of \$277,150 and \$552,240 in adjustments.
 8 Inactive members. This scale of assessments included inactive members, even though these States have announced that they no longer consider themselves as members.
 9 Gross assessment. Due to credit of \$355,000 as result of adjustment of advances to working capital fund on basis of 1953 scale of assessments, U. S. net assessment is \$15,167,046.
 10 Regular 1953 assessment. Due to credit of \$132,452 in respect of 1951 balances, and a credit of \$65,420 in respect of working capital fund, U. S. net assessment is \$1,431,286.

No. 1109.—NET GEOGRAPHICAL PRODUCT BY INDUSTRIAL ORIGIN (PERCENT DISTRIBUTION)

[Net geographical product relates to the product of all industry within a nation's boundaries; it is given in this table at factor cost, and therefore equals the sum of factor incomes (wages, rent, profits, interest) paid by industry. Exemptions are listed in the footnotes. Estimates are not fully uniform from country to country in items of income covered and industrial classifications used. Some of the major differences are indicated in footnotes below. In general, "Agriculture" includes also forestry, hunting and fishing; "Manufacturing and construction" includes mining; "Trade" covers wholesale and retail distribution; "Transport and communications" includes public utilities; "Government" includes administration, defense and public services, but not public enterprises, which are classified under relevant industry; category "All others" comprises finance, insurance, ownership of dwellings and personal and other nongovernment services. See text, p. 944, for general comments concerning quality of the data]

¹ Includes public enterprises.

² Includes cash rents paid by business.

³ Includes net income from abroad.

⁴ Gross geographical product at factor cost.

⁵ Public utilities included under "Manufacturing and construction."

⁶ Banking and insurance included under "Trade."

⁷ Income from ocean shipping excluded.

⁸ Finance, insurance and real estate included under "Trade."

⁹ Gross geographical product at market prices.

¹⁰ Includes personal and business rent and government payments to teachers.

¹¹ Excludes postal services.

¹² Beginning 1946, all farm rent included under "All others."

¹³ Hotels and restaurants included under "Transport and communication."

¹⁴ Gross national income.

¹⁵ Finance included under "Trade."

¹⁶ Includes public enterprises other than transport, etc.

¹⁷ Construction included under "Transport and communication."

¹⁸ Gross geographical product at factor cost before deduction of adjustment for stock appreciation.

APPENDIX I

HISTORICAL APPENDIX: INDEX OF HISTORICAL STATISTICS SERIES AND STATISTICAL ABSTRACT TABLES IN WHICH THOSE SERIES APPEAR

[Comprises statistical time series (identified by number) shown in the historical supplement entitled *Historical Statistics of the United States, 1789-1945*. Historical series are listed only: (1) where comparable data are available for a year or years later than 1945; (2) where data are included in a table in this *Abstract*. For a more complete listing of series for which data are available for the years 1946 to 1961, see Appendix I of the 1946, 1950, 1961, and 1962 editions of the *Statistical Abstract*]

APPENDIX II

Weights, measures, and foreign exchange

UNITED STATES UNITS WITH METRIC EQUIVALENTS

1 inch = 2.540 centimeters.	1 liquid quart = 0.9463 liter.
1 foot = 0.3048 meter.	1 gallon = 231 cubic inches = 3.785 liters.
1 yard = 0.9144 meter.	1 bushel (measured) = 2,180.4 cubic inches = 35.24 liters.
1 mile = 1,609 kilometers.	1 avoirdupois ounce = 28.35 grams.
1 square yard = 0.8361 square meter.	1 troy ounce = 31.10 grams.
1 acre = 0.4047 hectare.	1 pound = 0.4536 kilogram.
1 square mile = 2,590 square kilometers.	1 long ton = 2,240 pounds = 1.0160 metric tons of 1,000 kilograms.
1 cubic inch = 16.39 cubic centimeters.	1 short ton = 2,000 pounds = 0.9072 metric ton.
1 cubic foot = 0.02832 cubic meter.	
1 cubic yard = 0.7646 cubic meter.	

UNITED STATES GALLON AND BUSHEL WITH BRITISH EQUIVALENTS

1 United States gallon = 231 cubic inches = 0.8331 imperial gallon.	1 United States bushel = 2,150.4 cubic inches = 0.9094 imperial bushel.

OFFICIAL WEIGHTS OF THE UNITED STATES BUSHEL

	Pounds	Kilograms
Wheat, beans, peas, potatoes (Irish or white).....	60	27.22
Rye, corn (maize), linseed (flaxseed), mealin (mixed grain).....	56	25.40
Barley, buckwheat.....	48	21.77
Onions.....	57	25.86
Rough rice.....	45	20.41
Malt.....	34	15.42
Oats.....	32	14.51
Peanuts, green, in shell.....	22	9.98
Castor beans.....	50	22.68

APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, not weight. Whether handled in containers or without them the quantities are customarily reduced to the equivalent of barrels of 42 United States gallons (barrel thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table:

	WEIGHT OF UNITED STATES GALLON		WEIGHT OF BARREL OF 42 GALLONS	
	Pounds	Kilograms	Pounds	Kilograms
Crude petroleum.....	7.3	3.311	306.6	139.07
Lubricating oils.....	7.0	3.175	294.0	133.36
Illuminating oils (kerosene).....	6.6	2.994	277.2	125.74
Gasoline and related products (motor spirit, benzine, etc.).....	6.1	2.767	256.2	116.21
Fuel and gas oils.....	7.7	3.493	323.4	146.69

¹ Average of daily rates for part of year during which quotations were certified (see previous Abstracts for exact periods).² Prior to Nov. 1, 1942, official designation for Brazilian cruzireiro was milreals.³ As of Aug. 27, 1951, quotations on Straits Settlements dollar discontinued and quotations on Malayan dollar substituted. The two rates had been identical for a considerable period.⁴ Based on quotations through Aug. 14, 1952.⁵ Based on quotations through May 8, 1952.⁶ Excludes Pakistan, beginning April 1948.⁷ Beginning October 1948, application depends upon type of merchandise.Source: Board of Governors of the Federal Reserve System; annual and monthly figures published in *Federal Reserve Bulletin*.

BIBLIOGRAPHY OF SOURCES OF STATISTICAL DATA

This bibliography contains under the various subject headings references to the important primary sources of statistical information for the United States. Secondary sources have been referred to if the information contained therein is presented in a particularly convenient form or if primary sources are not readily available. Non-recurrent studies presenting compilations or estimates for several years or new types of data not available in regular series are included.

Much valuable information will also be found in State reports and in reports for particular commodities, industries, or similar segments of our economic and social structure. However, because of the large number of such references, they are not included here.

Section references on the right-hand side of each page indicate where data from the report cited appear in the *Statistical Abstract*. Where current reports and a summary volume are both cited in the bibliography the section reference will often appear opposite the summary volume only. Reference to the sections indicated will enable the user to ascertain the type of information presented in the original source. However, it should not be assumed that all of the subjects from that source are summarized in the *Abstract*.

The location of the publisher of the report is given except for Federal governmental agencies located in Washington. Major inquiries, such as the Census of Population, are referred to by name rather than by specific volume references under the various topic headings. The final reports of the Seventeenth Census, which include those on the Censuses of Agriculture, Population, and Housing, are listed at the end of the bibliography together with the final reports of the 1948 Census of Business and the 1947 Census of Manufactures.

PUBLICATIONS OF MAJOR CENSUSES

[Each part of a volume in this list is a separate book or pamphlet. Preliminary bulletins, which were issued in advance of final reports, are not included in the list. A detailed catalog of Census publications is available upon request]

17th DECENNIAL CENSUS**Agriculture:**

- Vol. I: Counties and State Economic Areas. Detailed statistics by counties and economic areas. Economic areas within each State comprise groups of counties having similar agricultural, demographic, and other characteristics. A series of 34 separately published parts.
- Vol. II: General Report. Summary data and analyses by subjects for States, for geographic divisions, and for the United States. Subject matter chapters also issued as separate bulletins.
- Vol. III: Irrigation of Agricultural Lands. State reports with statistics for counties and drainage basins, and a summary for the United States. State reports also issued as separate bulletins.
- Vol. IV: Drainage of Agricultural Lands. Data for States, for counties, and for the United States; all in one part.
- Vol. V: Special Reports (10 parts).
- Part 1. Horticultural Specialties.
- Part 2. Multiple-Unit Operations.
- Part 3. Ranking Agricultural Counties.
- Part 4. Land Utilization—A Graphic Summary.
- Part 5. Farm Tenure—A Graphic Summary.
- Part 6. 1950 Census of Agriculture—A Graphic Summary.
- Part 7. Irrigation of Agricultural Lands—A Graphic Summary.
- Part 8. Farm Mortgage Debt.
- Part 9. Economic Class and Type of Farm—A Graphic Summary.
- Part 10. Farms and Farm Characteristics, by Subregions.

Housing:

- Vol. I: General Characteristics. A separate bulletin is also issued for the United States, each State and the District of Columbia, Alaska, Hawaii, Puerto Rico, and the Virgin Islands of the United States. Characteristics by States, counties, standard metropolitan areas, urban places, and other constituent areas.
- Vol. II: Nonfarm Housing Characteristics. Chapters also issued as separate bulletins for the United States and the 9 geographic divisions, and for each of the 152 standard metropolitan areas of 100,000 or more inhabitants including the 106 cities of 100,000 inhabitants or more in the United States.
- Vol. III: Farm Housing Characteristics. Analytical data for the rural-farm segment of the dwelling-unit inventory; for the United States and each of the 119 economic subregions. Subregions usually are combinations of two or more counties having relatively homogeneous agricultural conditions.
- Vol. IV: Residential Financing. Financial characteristics of nonfarm mortgaged residential properties, for the United States, the 4 geographic regions, and for the 25 largest standard metropolitan areas as measured by 1940 population figures (2 parts).
- Part 1. United States.
- Part 2. Large standard metropolitan areas and comparable data for the United States.
- Vol. V: Block Statistics. Separate reports for each of the 209 cities in the United States which had a population of 50,000 or more inhabitants in 1940, or in a subsequent special census prior to 1950. (These bulletins *not* bound in a single publication.)

Population:

- Vol. I: Number of Inhabitants. General characteristics of the population by States, counties, standard metropolitan areas, urban places, and other constituent areas. State chapters also issued as separate bulletins.
- Vol. II: Characteristics of the Population. A series of separately published parts, one for each State and the District of Columbia, a summary for the United States, and another part for the Territories and possessions. Each part comprises the following chapters: (A) Number of Inhabitants, (B) General Characteristics, and (C) Detailed Characteristics. Each of these chapters also issued separately as State bulletins.
- Vol. III: Census Tract Statistics. Selected population and housing data by census tracts. 64 separate bulletins for tracted cities. (These bulletins *not* bound in a single publication.)
- Vol. IV: Special Reports. Comprises Series P-E Bulletins including: Employment and Personal Characteristics; Institutional Population; Marital Status; Nonwhite Population by Race; Persons of Spanish Surname; Puerto Ricans in Continental U. S.; State of Birth; Characteristics by Size of Place; Education.

1945 CENSUS OF BUSINESS

Subject and area volumes: Subject volumes include a United States Summary chapter, a separate chapter for each subject, a miscellaneous chapter, and a chapter on Territories (Alaska and Hawaii). Area volumes contain statistics for standard metropolitan areas, cities, and counties as well as for the United States, geographic divisions, and States.

Retail Trade:

Vol. I: General Statistics, Part 1.

Vol. II: General Statistics, Part 2, and Merchandise Line Sales Statistics.

Vol. III: Area Statistics.

Wholesale Trade:

Vol. IV: General Statistics and Commodity Line Sales Statistics.

Vol. V: Area Statistics.

Service Trade:

Vol. VI: General Statistics.

Vol. VII: Area Statistics.

Trade bulletins (data for continental United States only):

The Grocery Trade.

Department Stores.

Variety Stores.

The Electrical Goods Trade.

The Automotive Trade.

The Drug Trade.

The Jewelry Trade.

The Apparel Trade.

The Furniture Trade.

The Lumber Trade.

The Hardware, Plumbing and Heating Equipment Trade.

Marketing by Producers of Basic Iron and Steel Products.

The Motion Picture Trade.

The Optical Goods Trade.

Census monograph: The Manufacturers' Agent as a Marketing Institution.

1947 CENSUS OF MANUFACTURES

Vol. I: General Summary. Detailed comparative statistics for industries and for geographic areas.

Vol. II: Reports for Industries. Also issued as 82 separate bulletins for approximately 460 industries.

Vol. III: Reports for States. Also issued as separate bulletins for each State and the District of Columbia.

Product Supplement. Data on shipments and/or production for more than 6,000 manufactured products.

Indexes of Production. Measures of the physical volume of 1947 production as compared with 1939 production for total manufacturing, for 20 major industry groups, and for approximately 200 individual industries.

Classes of Products, by State. Value of shipments by State for 890 classes of products.
